| General description      | The subject focuses on the knowledge and application of computational methods in processes of heat transfer and fluid mechanics to the design and calculation of marine equipment and systems installations.<br><br>Limitations of the method and the accuracy of the results will be detected, taking into account the starting hypothesis, using software CFD-FloEFD |        |                       |           |

## Study programme competences

| Code | Study programme competences                                                                                                                                                                                                                                                                    |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A20  | Capacidade para desenrolar tarefas de análise e síntese de problemas teórico-prácticos en base a conceptos adquiridos noutras disciplinas do ámbito marítimo, mediante fundamentos físico-matemáticos.                                                                                         |
| A21  | Operar, reparar, manter, reformar, deseñar e optimizar a nivel de xestión as instalacións industriais relacionadas coa enxeñaría mariña.                                                                                                                                                       |
| A22  | Capacidade para desenrolar métodos e procedementos para gañar competitividade na industria marítima.                                                                                                                                                                                           |
| B1   | Aprender a aprender.                                                                                                                                                                                                                                                                           |
| B2   | Resolver problemas de forma efectiva.                                                                                                                                                                                                                                                          |
| B3   | Comunicarse de maneira efectiva nun entorno de traballo.                                                                                                                                                                                                                                       |
| B4   | Traballar de forma autónoma con iniciativa.                                                                                                                                                                                                                                                    |
| B5   | Traballar de forma colaborativa.                                                                                                                                                                                                                                                               |
| B6   | Comportarse con ética e responsabilidade social como cidadán e como profesional.                                                                                                                                                                                                               |
| B7   | Capacidade para interpretar, seleccionar e valorar conceptos adquiridos noutras disciplinas do ámbito marítimo, mediante fundamentos físico-matemáticos.                                                                                                                                       |
| B10  | Comunicar por escrito e oralmente os coñecementos procedentes da linguaxe científica.                                                                                                                                                                                                          |
| B11  | Capacidade para resolver problemas con iniciativa, toma de decisións, creatividade, razoamento crítico e de comunicar e transmitir coñecementos, habilidades e destrezas.                                                                                                                      |
| B12  | Posuír e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación                                                                                                                     |
| B13  | Que os estudantes saiban aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos máis amplos (ou multidisciplinares) relacionados coa súa área de estudo                                                    |
| B14  | Que os estudantes sexan capaces de integrar coñecementos e enfrontarse á complexidade de formular xuízos a partires dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vencelladas á aplicación dos seus coñecementos e xuízos |
| B15  | Que os estudantes saiban comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun xeito claro e sin ambigüidades                                                                                                   |
| B16  | Que os estudantes posúan as habilidades de aprendizaxe que lles permitan continuar estudando dun xeito que haberá de ser en grande medida autodirixido ou autónomo.                                                                                                                            |
| C1   | Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.                                                                                                                                                                                       |
| C2   | Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.                                                                                                                                                                                                            |

|    |                                                                                                                                                                                                                                                        |

| Methodologies                  | Description                                                                                                                                                                                                                                                                                                           |
| Guest lecture / keynote speech | There will be a detailed explanation of the contents of the material, distributed across topics. The student will have a typed copy of the subject matter in each keynote session. Students are encouraged to participate in class, through comments linking the theoretical contents with real life experiences.     |
| Problem solving                | Problems will be solved for each item proposed, allowing the application of mathematical models appropriate to each case, including managing software of FloEFD de Mentor Graphics, applying the most appropriate assumptions, the theoretical relation developed in lectures and relation with professional practice |
| Supervised projects            | Problems more difficult than those solved in class or issues of special relevance.                                                                                                                                                                                                                                    |
| Objective test                 | The degree of acquired knowledge about the contents assessed, taking into account both theory and problem solving.                                                                                                                                                                                                    |

| Personalized attention                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Assessment comments

The official tests of the first chance (May-June) will collect the different assessment methodologies and must be completed by those students who have not fully passed the continuous assessment. This test will be designed in such a way that the student can deal with the methodologies of problem-solving and objective test, where he has not reached 30% of the total rating. The students required to attend the official tests of the second chance (June-July) will retain the qualification achieved in all methodologies, except for the one obtained in the objective tests of the first chance, which will be replaced by the 2nd. In the same way, you can only opt for honours if the maximum number of these for the corresponding course is not covered in full at the first chance. For the students with recognition of part-time dedication and academic exemption of attendance exemption, the qualification obtained in the activities associated with the personalized tutoring system will correspond to the evaluation of the methodology of problem-solving and objective tests, with 30 % and 70 % of total rating, respectively.

## Recommendations

Subjects that it is recommended to have taken before

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

## Other comments

It would be desirable the student has a laptop for installing FloEFD software.
