

Teaching Guide				
Identifying Data				2019/20
Subject (*)	Engineering Metrology and Quality Control	Code	730G03032	
Study programme	Grao en Enxeñaría Mecánica			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Third	Obligatory	6
Language	SpanishGalician			
Teaching method	Face-to-face			
Prerequisites				
Department	Enxeñaría Naval e Industrial			
Coordinador	Lopez Diaz, Ana Jesus	E-mail	ana.xesus.lopez@udc.es	
Lecturers	Lopez Diaz, Ana Jesus Yañez Casal, Armando Jose	E-mail	ana.xesus.lopez@udc.es armando.yanez@udc.es	
Web				
General description	<p>The subject of Metrology and Quality Control deals with the techniques necessary for the planning and implementation of quality control in manufacturing processes. First introduced on the concepts fundamental measurement to characterize the variables that will later be used in quality control.</p> <p>Later, it focuses on the close relationship between the variability of the manufacturing parameters and quality end product, for day after studying such variability from a statistical viewpoint.</p> <p>Finally, describes the technical quality control based on statistics, which is known as statistical process control. Such techniques are aimed at finding a balance between the costs of quality control, cope with the costs of making a potential insufficient control.</p>			

Study programme competences / results	
Code	Study programme competences / results
A26	TEM8 - Coñecemento aplicado de sistemas e procesos de fabricación, metroloxía e control de calidade.
B1	CB01 - Que os estudantes demostren posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral e adoita encontrarse a un nivel que, aínda que se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vangarda do seu campo de estudo
B2	CB02 - Que os estudantes saiban aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo
B4	CB04 - Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como leigo
B5	CB05 - Que os estudantes desenvolvan aquelas habilidades de aprendizaxe necesarias para emprenderen estudos posteriores cun alto grao de autonomía
B7	B5 - Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas
B9	B8 - Adquirir unha formación metodolóxica que garanta o desenvolvemento de proxectos de investigación (de carácter cuantitativo e/ou cualitativo) cunha finalidade estratéxica e que contribúan a situarnos na vangarda do coñecemento
C1	C3 - Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C4	C6 - Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C5	C7 - Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

Learning outcomes	
Learning outcomes	Study programme competences / results

Knowing the tools currently available to characterize dimensionally industrial product. Select the most appropriate to take a measurement.	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
Knowing the measurement principles that should be taken into account to make a measurement	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
Understanding the importance of quality control in modern manufacturing processes. Studying different types of variability, its causes and effects. Understanding variability as a measure of the quality of a manufacturing process.	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5

Contents	
Topic	Sub-topic
1. Introduction to metrology.	1.1. Introduction and history of metrology. 1.2. Systems units. The International System. 1.3. The measurement procedure. 1.4. Uncertainty quantification 1.5. Traceability and calibration
2. Applications of metrology industry	2.1. Dimensional metrology. 2.2. Length measurement. Instrumentation. 2.3. Surface quality: Roughness 2.4. Other measures: mass, time, temperature, light intensity and electrical quantities.
3. Quality Control	3.1. Introduction to quality control 3.1.1. Historical development of quality control 3.1.2. Maintaining and improving quality 3.2. Basic tools for quality improvement 3.2.1. Data collection. 3.2.2. Diagrams and their types: Pareto, cause and effect, bivariate.
4. Variability in quality control	4.1. Causes of variability 4.2. Probabilistic models. 4.3. Comparison of two treatments. 4.4. Comparison of more than two treatments: Analysis of variance
5. Statistical Process Control	5.1. introduction 5.2. Control charts. 5.3. for variables 5.4. For attributes. 5.5. Other control charts.
Ferramentas e técnicas para o control da calidade	
Control estatístico de procesos	
Introdución á metroloxía	

Planning

Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A26 B1 B5 B7 B9 C1 C4 C5	30	34.47	64.47
Problem solving	A26 B1 B2 B4 B5 B7 B9 C1 C4 C5	17	17	34
Mixed objective/subjective test	A26 B1 B2 B4 B5 B7 B9 C1 C4	2	2	4
ICT practicals	A26 B1 B2 B4 B5 B7 B9 C1 C4 C5	11	11	22
Supervised projects	A26 B1 B2 B4 B5 B7 B9 C1 C4 C5	4	21.52	25.52
Personalized attention		0	0	0

(\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Lectures which will develop the course content
Problem solving	Interactive classes in which they solve exercises representative of content covered in lectures.
Mixed objective/subjective test	In addition to the various activities planned, students must take a final exam on the content of the material, which consist of a series of short questions of theory and practice, as well as two or three issues of implementation, with a total duration of approximately two hours.
ICT practicals	Metodoloxía que permite ao alumnado aprender a través de actividades de carácter práctico (demostracións, simulacións, etc.) a teoría dun ámbito de coñecemento, mediante a utilización das tecnoloxías da información e as comunicacións.
Supervised projects	El alumnado deberá desarrollar y entregar una serie de ejercicios y actividades propuestas durante el curso, sobre aplicaciones concretas de algunos aspectos de la materia.

Personalized attention	
Methodologies	Description
ICT practicals	For any aspect that students consider appropriate, in addition to small group tutoring, six hours per week of tutoring in the time published through the UDC website.
Guest lecture / keynote speech	Students who have an academic exemption will not be required to attend class but must submit the same works and, in general, on the same dates as the other students of the course.
Problem solving	
Mixed objective/subjective test	
Supervised projects	

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	A26 B1 B2 B4 B5 B7 B9 C1 C4	In addition to the various activities planned, students must take a final exam on the contents of the subject, which consist of a series of short questions of theory and practice, as well as two or three issues of implementation, with a total duration of approximately two hours.	40
Supervised projects	A26 B1 B2 B4 B5 B7 B9 C1 C4 C5	Students must develop and deliver a series of exercises and activities proposed during the course, on the specific application of some aspects of the subject.	60

## Assessment comments

As persoas matriculadas a tempo parcial deberán poñerse en contacto, a principio de curso, coa coordinadora da materia para programar as actividades que deberán desenvolver para superala.

O alumnado con dispensa académica poderá solicitar a realización das

titorías para desenvolver os traballos tutelados nun horario diferente ao publicado na web da UDC.

## Recommendations

### Subjects that it is recommended to have taken before

Physics I /730G03003

Statistics/730G03008

### Subjects that are recommended to be taken simultaneously

Manufacturing Processes/730G03022

### Subjects that continue the syllabus

## Other comments

To help achieve a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan":The delivery of the documentary works made in this subject:\* They will be requested in virtual format and / or computer support\* It will be done through Moodle, in digital format without the need to print themIf it is necessary to make them on paper:\* Plastics will not be used\* Double-sided prints will be made.\* Recycled paper will be used.\* The printing of drafts will be avoided.
