

Teaching Guide				
Identifying Data				2019/20
Subject (*)	Heat transfer	Code	730G05022	
Study programme	Grao en Enxeñaría Naval e Oceánica			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Third	Obligatory	4.5
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Ciencias da Navegación e Enxeñaría Mariña Construcións Navais Enxeñaría Naval e Industrial			
Coordinador	Lamas Galdo, Isabel	E-mail	isabel.lamas.galdo@udc.es	
Lecturers	Lamas Galdo, Isabel	E-mail	isabel.lamas.galdo@udc.es	
Web				
General description	Heat transfer modes: conduction, convection and radiation. Practical applications.			

Study programme competences / results	
Code	Study programme competences / results
A14	Knowledge of the applied thermodynamics and of the transmission of the heat.
B2	That the students know how to apply its knowledge to its work or vocation in a professional way and possess the competences that tend to prove itself by the elaboration and defense of arguments and the resolution of problems in its area of study
B3	That the students have the ability to bring together and to interpret relevant data (normally in its area of study) to emit judgments that include a reflection on relevant subjects of social, scientific or ethical kind
B4	That the students can transmit information, ideas, problems and solutions to a public as much specialized as not specialized
B5	That the students developed those skills of learning necessary to start subsequent studies with a high degree of autonomy
B6	Be able to carrying out a critical analysis, evaluation and synthesis of new and complex ideas.
C1	Using the basic tools of the technologies of the information and the communications (TIC) necessary for the exercise of its profession and for the learning throughout its life.
C4	Recognizing critically the knowledge, the technology and the available information to solve the problems that they must face.

Learning outcomes			
Learning outcomes			Study programme competences / results
Know the basic concepts of heat transfer. Know the basics of the processes of conduction and convection of heat as a transport mechanism. Know the basic concepts of heat transfer of external and internal flow of fluids for its application on fluid mechanics processes. Know the operation of heat exchange equipment for industrial use to develop projects of some simple equipment.	A14	B2	C1
		B3	C4
		B4	
		B5	
		B6	

Contents	
Topic	Sub-topic
The following topics develop the contents indicated in the Verification Memory (Memoria de Verificación), which are:	Conduction Convection Heat exchangers
1. Introduction	Introduction Heat transfer modes Conservation of energy

2. One-dimensional steady heat conduction	Introduction General heat conduction equation Cartesian coordinates Thermal contact resistance Cylindrical coordinates Spherical coordinates Fins
3. Numerical methods	Introduction Solution of the governing equations
4. Transient heat conduction	Lumped system analysis Semi-infinite solids Other cases
5. External forced convection	Introduction Flow across flat plates Flow across cylinders Flow across spheres Flow across tube banks Other cases
6. Internal forced convection	The entrance region Laminar flow Turbulent flow Non-circular tubes Distribution of temperature
7. Free convection	Introduction Vertical plates Inclined and horizontal plates Cylinders Spheres
8. Boiling and condensation	Boiling Condensation
9. Heat exchangers	Introduction DTML method Epsilon-NUT method
10. Radiation heat transfer	Fundamentals Radiation heat transfer

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Guest lecture / keynote speech	A14 B2 B3 B4 B5 B6 C1 C4	30	30	60
Mixed objective/subjective test	A14 B2 B3 B4 B5 B6 C1 C4	9.5	0	9.5
Problem solving	A14 B2 B3 B4 B5 B6 C1 C4	21	21	42
Personalized attention		1	0	1
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description

Guest lecture / keynote speech	Classes
Mixed objective/subjective test	Exam/s
Problem solving	Students must deliver exercises

Personalized attention

Methodologies	Description
Guest lecture / keynote speech	Attention by tutorials and e-mail.
Problem solving	Academic dispense is allowed. Students who request it must contact teacher to realize additional homework.
Mixed	
objective/subjective test	

Assessment

Methodologies	Competencies / Results	Description	Qualification
Problem solving	A14 B2 B3 B4 B5 B6 C1 C4	Students must deliver exercises	20
Mixed objective/subjective test	A14 B2 B3 B4 B5 B6 C1 C4	Exam/s	80
Others			

Assessment comments

Students who request academic dispense must realize other activities proposed by the teacher. The qualification is the same as problem solving.

The evaluation criteria of the 2nd opportunity are the same as those of the 1st opportunity except that, in case of partial exams, the mark obtained in these will not be taken into account in the 2nd opportunity.

In order to pass it will be necessary to obtain at least 4 in the final exam and 5 in the global score.
