

Teaching Guide

Teaching Guide				
Identifying Data				2019/20
Subject (*)	Home Automation Systems (Domotics)		Code	770G02038
Study programme	Grao en Enxeñaría Eléctrica			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Fourth	Optional	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Enxeñaría Industrial			
Coordinador	Casteleiro Roca, José Luis	E-mail	jose.luis.casteleiro@udc.es	
Lecturers	Casteleiro Roca, José Luis	E-mail	jose.luis.casteleiro@udc.es	
Web				
General description	The subject's main objective is to give students theoretical knowledge, and operation ways, of various types of Home Automation Systems, in order to achieve the necessary knowledge for their manage, analysis and design.			

Study programme competences

Code	Study programme competences
A4	Capacidade de xestión da información, manexo e aplicación das especificacións técnicas e da lexislación necesarias no exercicio da profesión.
A5	Capacidade para analizar e valorar o impacto social e medioambiental das solucións técnicas actuando con ética, responsabilidade profesional e compromiso social, e buscando sempre a calidade e mellora continua.
B1	Capacidade de resolver problemas con iniciativa, toma de decisións, creatividade e razoamento crítico.
B4	Capacidade de traballar e aprender de forma autónoma e con iniciativa.
B5	Capacidade para empregar as técnicas, habilidades e ferramentas da enxeñaría necesarias para a práctica desta.
B10	CB3 - Que los estudiantes tengan la capacidad de reunir e interpretar datos relevantes (normalmente dentro de su área de estudio) para emitir juicios que incluyan una reflexión sobre temas relevantes de índole social, científica o ética.
B11	CB4 - Que los estudiantes puedan transmitir información, ideas, problemas y soluciones a un público tanto especializado como no especializado.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.

Learning outcomes

Learning outcomes	Study programme competences		
Know the energy certification of housing	A4	B10	C3
Know the different facilities in a home and / or building	A4	B1 B4	C3
Knowing home automation systems and their application to housing and building installations	A5	B5 B11	C3

Contents

Topic	Sub-topic

The contents described in the verification memory are developed below according to the distribution shown	Introduction to home automation systems and their applications. (Topic 1)
	Main domotic systems. (Topic 2, 3, 4 and 5)
	Installations in a house, and its integration with a home automation system. (Topic 6 and 7)
	Energetic certification. (Topic 8)
Topic 1: Introduction to Home Automation	<ul style="list-style-type: none">1.1. General characteristics1.2. Features and applications of the Home Automation in housing1.3. Components of a Home Automation system
Topic 2: Applications and types of automation systems	<ul style="list-style-type: none">2.1. Services and Home Automation applications at homes2.2. Classification of Home Automation systems2.3. Wireless systems
Topic 3: Power Line Carrier systems	<ul style="list-style-type: none">3.1. The X-10 standard3.2. Main components3.3. Installation and configuration3.4. Other possibilities
Topic 4: Systems with Programmable Logic Controller	<ul style="list-style-type: none">4.1. Characteristics of systems with Programmable Logic Controller4.2. SIMON system4.3. Basic components4.4. Installation and configuration4.5. Other systems with programmable controller
Topic 5: Data Bus systems	<ul style="list-style-type: none">5.1. KNX standard features5.2. Basic components5.3. Installation and configuration5.4. Programming with ETS
Topic 6: Installations	<ul style="list-style-type: none">6.1. Electrical installations6.2. Telecommunication installations6.3. Plumbing installations6.4. Air conditioning installations6.5. LPG installations

Topic 7: Installations basic legislation	<p>7.1. The planning act in construction law</p> <p>7.2. The technical building code</p> <p>7.3. Electrical low voltage regulation</p> <p>7.4. Thermal installations regulation</p> <p>7.5. Common telecommunications infrastructure regulation</p>
Topic 8: Energy management and certification	<p>8.1. Legislation</p> <p>8.2. Home Automation involvement in the energy rating</p> <p>8.3. Residential buildings certification</p> <p>8.4. Tertiary sector buildings certification</p>

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Guest lecture / keynote speech	A5 B4 C3	17	30	47
Problem solving	A4 C3	16	30	46
Laboratory practice	A4 B10	6	20	26
Workshop	A5 B5 B11	3	23	26
Mixed objective/subjective test	B1 B5	2	0	2
Personalized attention		3	0	3
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	<p>Keynote speech complemented with the use of audiovisual media and the introduction of some questions to students, in order to transmit knowledge and facilitate learning.</p> <p>The order of the topics covered will not have to be the one described in the teaching guide. In addition, there will be topics that can be seen together on the development of others, and the division between them may not be strict.</p>
Problem solving	Solving exercises and specific problems in the classroom, from the knowledge explained.
Laboratory practice	Performing laboratory practice as far as possible; or, failing that, solving exercises and specific problems in the classroom, from the knowledge explained.
Workshop	An individual work was carried out, along with the correction of the work of other colleagues. In addition, this work will have to be presented in class.
Mixed objective/subjective test	It consists in carrying out an objective test of approximately 2 hours, in which the acquired knowledge will be evaluated.

Personalized attention	
Methodologies	Description
Laboratory practice	The student has the relevant meetings of personalized tutorials, to resolve the concerns arising from the matter.

Assessment			
Methodologies	Competencies	Description	Qualification

Laboratory practice	A4 B10	Some tasks established in the subject, within the framework of this methodology	25
Mixed objective/subjective test	B1 B5	Exam type objective test	45
Workshop	A5 B5 B11	Realization of a personal work, together with the evaluation of other work of colleagues.	30
Others			

Assessment comments

As part of the "Laboratory practice" may include aspects such as attendance, attitude, etc., to help obtain the approved. In addition, it may also include in this methodology the assessment of the presentation in class of personal work.

The "Mixed Test" can be divided into a multiple choice part and a few questions.

It will be necessary to exceed 50% of the score in the multiple choice of the "Mixed Test" to pass, as well as having completed and approved the works

Recommendations

Subjects that it is recommended to have taken before

Electric Installations low voltage/770G02022

Automation/770G02028

Power Electronics/770G02029

Technical Office/770G02034

Industrial installations and comercial/770G02031

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

Efficient management of electric power/770G02040

Industrial Instrumentation/770G02042

Other comments
