General description	The aim for students is to acquire the knowledge and perspective of economic activity as a subsystem integrated into the global system of society, understood as a general body or as a whole, with its corresponding integral parts, including those corresponding to economic actions, with their specific and common purposes. In this global or overall vision, it is about making known that the students understand the connections, implications, reciprocity and reflexivity of the economic activity within the general activity of society. That the students have as clear as possible the role of economic activity in the scenario of society.			

Study programme competences / results	
Code	Study programme competences / results
A3	Evaluate and foreseeing, from relevant data, the development of a company.
A4	Elaborate advisory reports on specific situations of companies and markets

Personalized attention		4	0	4

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Objective test	Written test to evaluate learning, whose distinctive feature is the ability to determine whether the answers given are correct or not. It is a measurement instrument, rigorously developed, that allows to evaluate knowledge, abilities, skills, performance, aptitudes, attitudes, intelligence, etc. It is applicable for both diagnostic, formative and summative evaluation.
Workshop	Oriented training to the application of apprenticeships in which different methodologies can be combined (exhibitions, simulations, debates, problem solving, guided practices, etc.) through which the student develops eminently practical tasks on a specific topic, with the support and supervision of the teaching staff.
Guest lecture / keynote speech	Oral presentation complemented with the use of audiovisual media and the introduction of some questions addressed to students, in order to transmit knowledge and facilitate learning. The master class is also known as lecture, expository method or master class. This last modality is usually reserved to a special type of lesson given by a teacher on special occasions, with a content that supposes an original elaboration and based on the almost exclusive use of the word as a way of transmitting the information to the audience.

Personalized attention	
Methodologies	Description
Workshop	<p>The personalized attention in office tutorials will allow the teacher to guide the student on objectives and methodology.</p> <p>The hours of personalized attention may be devoted to the explanation, comment and / or correction of the workshop practices.</p> <p>In addition to the schedule of face-to-face tutoring in the hours that are determined at the beginning of the course by each teacher, the student will be able to access virtual tutorials through the Moodle tool, as well as through the teacher's email.</p>

Assessment			
Methodologies	Competencies / Results	Description	Qualification

Objective test	A5 A7 A12 B1 B2 B3 B4 C1	It will be required the realization of a final exam type objective test according to the contents of the program. It is important to remember that even if the student passes this test, it is not a sufficient requirement to pass the subject, since it is necessary to have done the practical part that is explained below.	50
Workshop	A4 A9 C8	The practices will be carried out on the topics proposed in the program	50

Assessment comments

To pass the subject it will be necessary:

1.- Pass the final exam on the proposed topics. It is necessary to obtain a minimum of 5 out of 10 in the exam to pass the subject.

This exam supposes 50% of the qualification, although (independently of the obtained qualification), it is not sufficient to approve the subject. In

addition, you will have to:

2.- Deliver all the proposed practices on time. Each practice not delivered will be graded with a zero, computing as such in the calculation of the average. In case of a duly justified fault, the teacher will communicate the proposed solution to the student in a timely manner.

3.-Participation in class and public exposure of the practices and other exercises proposed will be valued.

In the case that the student approves the practical part and will not pass the objective test, it will be examined at the second opportunity of the call for the objective test, maintaining the note of the practical part accordingly. In case there is any student for the advanced call, the evaluation criteria of the second opportunity will be maintained.

Anyone who does not pass the practical part will have to perform some major test at the second opportunity to be able to pass the subject.
