Teaching Guide				
Identifying Data				2020/21
Subject (*)	Proteomics		Code	610441013
Study programme	Mestrado Universitario en Bioloxía Molecular , Celular e Xenética			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	2nd four-month period	First	Optional	3
Language	SpanishGalicianEnglish			
Teaching method	Face-to-face			
Prerequisites				
Department	BioloxíaDepartamento profesorado máster			
Coordinador	Cerdan Villanueva, Maria Esperanza	E-mail	esper.cerdan@udc.es	
Lecturers	Cerdan Villanueva, Maria Esperanza	E-mail	esper.cerdan@udc.es	
Web				
General description	It is coordinated by María Esperanza Cerdán Villanueva (esper.cerdan@udc.es) and is taught by INIBIC teachers (contact: cristina.ruiz.romero@sergas.es) The aim of this subject is to train the student to: .-Understand the basic techniques of working in proteomics .-Obtain and manage protein samples .-Know the techniques for the separation and massive detection of proteins .-Understand large-scale proteomic data analysis methods .-Know the applications of proteomics in basic, applied and clinical research .-The critical reading and understanding of scientific publications in the field of proteomics			
Contingency plan	In case of a new closure due to covid19: 1. There will be no changes in the contents. 2. All classes and activities will be replaced by online activities in Moodle or Teams 3. The mechanisms for personalized attention to students will be through email, videoconference or chat implemented in TEAMS. 4. The evaluation will be online, but there will be no changes in the percentages assigned to the exam, practical exercises and activities. 5. Bibliography in Moodle			

Study programme competences / results	
Code	Study programme competences / results
A2	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and instruments as well as understanding potentials of their uses and applications.
A3	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A9	Skills of understanding the structure and dynamics of proteins to individual and proteomic level, as well as the techniques that are necessary to analyze them and to study their interactions with other biomolecules.
B1	Analysis skills to understand biological problems in connection with the Molecular and Cellular Biology and Genetics.
B3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions and to prepare reasoned reports on scientific and biotechnological questions
C1	Adequate oral and written expression in the official languages.

Learning outcomes			
Learning outcomes	Study programme competences / results		
In this course knowledge and skills about the extraction, purification and characterization of proteins from biological systems is adquired.	AR2 AR3 AR9	BR1 BR3	CC1

Contents	
Topic	Sub-topic
Proteomics	1.-The concept of proteomics and its applications. 2.-Preparation of protein extracts and protein solubilization. 3.-Proteomics by two-dimensional electrophoresis. 4.-Handling two-dimensional proteomics bioinformatics programs. 5.-Identification and characterization of proteins in micro-scale. Differential expression proteomics: DIGE. 6.-Protein expression and protein chips. 7.-Protein identification by peptide mass fingerprinting. 8.-Tandem mass spectrometry (MS/MS): peptide sequencing. 9.- Databases and search programs for assisted protein identification by MS. 10.-Proteomics differential expression without gel: ICAT, iTRAQ, SILAC. 11.-Applications of proteomics in the field of Biomedicine. 12.-The human proteome.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A9	9	18	27
Laboratory practice	A2 A3 A9 B1 B3 C1	9	0	9
Objective test	A2 A3 A9 B1 B3	2	37	39
Personalized attention		0		0
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Magistral exposures
Laboratory practice	A guided tour of techniques at the Proteomic unit
Objective test	Questionary about the program content

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech Laboratory practice	Students with part-time dedication or waiver of presence should contact the teachers of the subject in the early going to establish a schedule of activities to acquire and evaluate in a complementary way the competences.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Guest lecture / keynote speech	A9	Attendance and participation	25
Laboratory practice	A2 A3 A9 B1 B3 C1	Attendance and participation	25
Objective test	A2 A3 A9 B1 B3	Multiple options selection/test	50

Assessment comments
Students with part-time dedication or waiver attendance may choose to be evaluated in a final exam if they do not qualify for continuous evaluation.

Sources of information	
Basic	Se especifican en Moodle junto co resto dos materiais a utilizar. Se especifican en Moodle junto co resto dos materiais a utilizar.
Complementary	Se especificarán en la aplicación de la materia

Recommendations
Subjects that it is recommended to have taken before
Subjects that are recommended to be taken simultaneously
Subjects that continue the syllabus
