	Study programme competences
Code	Study programme competences
A1	Skills of working in a sure way in the laboratories knowing operation handbooks and actions to avoid incidents of risk.
A2	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and
	instruments as well as understanding potentials of their uses and applications.
А3	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A8	Skills of having an integrated view of the previously acquired knowledge about Molecular and Cellular Biology and Genetics, with an
	interdisciplinary approach and experimental work.
A13	Skills to become a professional in health, pharmacy, veterinary, animal production, biotechnology or food sectors.
B4	Organization and work planning skills: that are able to manage the use of the time as well as available resources and to organize the work
	in the laboratory.
В6	Skills of team work: that are able to keep efficient interpersonal relationships in an interdisciplinary and international work context, with
	respect for the cultural diversity.
B7	Personal progress skills: that are able to learn from freelance way, adapting to new situations, developing necessary qualities as the
	creativity, skills of leadership, motivation for the excellence and the quality.
C1	Adequate oral and written expression in the official languages.
C3	Using ICT in working contexts and lifelong learning.

C4	Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C5	Understanding the importanceof entrepreneurial culture and the useful means for enterprising people.
C6	Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable
	environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.
C9	Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and
	accomplishing them.

Topic	Sub-topic
Once each student has been assigned to a company /	
institution, the tutor in the company will prepare a descriptive	
plan of the practical work and methodology. This plan will also	
include the timetables for the implementation of practices and	
methods of supervision by the tutor of the company. There is	
a standard form available on the website of Master BMCG .

	Methodologies
Methodologies	Description
Introductory activities	Interview and presentation of training plan. The academic tutor will supervise the student practices and procedures as well as
	informs necessary for the realization of external practices.
Document analysis	Analysis of literature and protocols necessary for the implementation of practices and understanding of its various applications
	to the solution of problems and the development of ideas for innovation.

Laboratory practice	This methodology refers to practical work in the company / institution and its specific development for each case will be
	proposed by the tutor in the company.
Summary	The student will develop a memory in which techniques and procedures developed during their stay in the company are
	collected and their personal assessment of the application of this knowledge to solve problems related to the fields of
	application of the Master and its potential for business development . There is a type format available on the website of the
	Master .

	Personalized attention
Methodologies	Description
Introductory activities	The academic tutor will guide students in their choice of practical work and how to prepare and submit the written summary.

Summary	A2 A3 A8 C1 C3 C6	The student makes a report on the external practices that must be made ??with the	50
	C8 C9	approval of the company tutor and academic supervisor. There is a standard form of	
		memory that is available to students on the website of the Master .	
		The academic tutor assesses the report of the tutor in the company and the report	
		submitted by the student and in turn issued a report with a recommendation rating.	

Assessment comments

The overall process of assessing the PEX is based on three processes

- a) The report by the tutor of the company
- b) The report prepared by the academic tutor who assesses the report of the company tutor and memory prepared by the student
- $\ensuremath{\text{c}}$) The joint evaluation by the Commission of the Degree of the evidence collected in a) and $\ensuremath{\text{b}}$)
