	This source complements the contents	acquired in Plant Physic	and I from an ann	liad parapactiva Will be	
General description	This course complements the contents acquired in Plant Physiology I and II, from an applied perspective. Will be addressed in different subjects, agricultural, experimental and industrial processes, where the theoretical concepts of Pla				
		urai, experimentai and in	dustrial processes, where	e the theoretical concepts of Pl	
	Physiology are implemented.				
Contingency plan	1.Modifications in the contents				
	The contents will not be modified, as they are basic for the formation of a Graduated in Biology				
	2. Methodologies				
	Being a subject of the first semester two	situations can occur:			
	A- Hybrid teaching, if access to the Fact	ulty had been restricted of	during hours or capacity.	In which case there would be a	
	combination of face-to-face and online t	eaching. This is the meth	nod foreseen in the Facu	ty for the first semester.	
	B- No face-to-face, if access to the Facu	ulty was totally prohibited	I in that semester. In that	case the teaching would be	
	completelly online.

	Study programme competences / results
Code	Study programme competences / results
A10	Avaliar actividades metabólicas.

A18	Levar a cabo estudos de produción e mellora animal e vexetal.
A21	Deseñar modelos de procesos biolóxicos.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A29	Impartir coñecementos de Bioloxía.
A30	Manexar adecuadamente instrumentación científica.
A31	Desenvolverse con seguridade nun laboratorio.
B2	Resolver problemas de forma efectiva.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B4	Traballar de forma autónoma con iniciativa.
B5	Traballar en colaboración.
B6	Organizar e planificar o traballo.
B8	Sintetizar a información.
B9	Formarse unha opinión propia.
B10	Exercer a crítica científica.
B11	Debater en público.
B12	Adaptarse a novas situacións.
B13	Comportarse con ética e responsabilidade social como cidadán e como profesional.

	Methodologies
Methodologies	Description
Guest lecture /	Oral presentation of the topic supplemented with PowerPoint presentations, videos and / or diagrams on the board. During the
keynote speech	development of the topic questions will be inserted students to reflect on and answer them orally, prior to explanation by the
	teacher.
Seminar	Technical working group aims intensive study of a topic. It will take place in very small groups of 10-15 students. It will include
	making of audiovisual materials on the topic studied.
Mixed	Consist of two parts, in which the knowledge acquired theoretical and practical point is evaluated. The mixed evidence may
objective/subjective	include essay questions, multiple choice or problems
test	
Laboratory practice	Methodology that allows estudantes effectively learn through conducting practical activities, such as demonstrations,
	exercises, experiments and research.

Personalized attention		
Methodologies	Description	
Seminar	Students, in groups of 10, will meet with the teacher to prepare the seminar work. In addition, tutorial sessions, each student	
	will discuss with the teacher the progress of the work and all the doubts that may arise.	
	For those students with official half-time dedication, the tutorial sessions might be replaced by a written work, if the student	
	requires it.	
	requires it.	

Assessment			
Methodologies	Competencies /	Description	Qualification
	Results		
Mixed	A10 A18 B2 B6 B8	Examination of the theoretical and practical knowledge.	60
objective/subjective		40% theorical.	
test		20% practical.	
Seminar	B4 B5 B6 B9 B10 B11	Activities during the seminars will be evaluated on an ongoing basis by the teacher.	40
	B12 B13		

Assessment comments

The qualification assessment will have two parts:

Theoretical part of the course, including two methodologies: "Seminario" ("seminar"), and the theoretical part of "proba mixta" (final exam).
Practical part of "proba mixta" (final exam).

To get a pass a student has to get a minimum of 4 points out of 10 in the Theoretical part of the course and a minimum of 4 points out of 10 in the Practical part. Moreover, a minimum of 4 points out of 10 has to be got in in the theoretical part of the "proba mixta" and also in the practical part of the "proba mixta". Moreover, in order to get the pass, the average/mean of the different parts and methodologies has to be at least 5 points out of 10. Attendance to practicals is compulsory. If a student does not attend to one or two sessions of the practicals, he/she will have a penalty of one and two points, respectively, to be substracted from the score of the ?proba mixta?. If the student does not attend to three or more sessions of the practicals, he/she will get a fail as the final score in the course.

The students that do not carry out the "proba mixta" will be qualified as "NO PRESENTADO". For those students with official half-time dedication and academic exemption, the tutorial sessions might be replaced by a written work, if the student requires it.
