Methodologies

Methodologies	Description
Guest lecture / keynote speech	The teaching staff will explain each of the topics of the program, insisting on the fundamental concepts and their relationships. The oral presentation made by the teaching staff may be complemented with the support of audiovisual media and with the posing of some questions addressed to the students, to transmit knowledge and facilitate learning and facilitate participation.
Problem solving	Through this methodology, the goal is that the look for a solution to a specific problem or situation, based on the knowledge previously worked on, which may have more than one solution. This situation will be proposed in the form of the issues or practical questions that students have to answer. It is a complement to the theoretical knowledge acquired through lectures and study. The students will come to a solution applying their academic background in working environments, in which the intervention and personal contribution of the students is the central axis.
Workbook	Some readings about academic or current texts, related to the content of the subject so that your students can analyze, interpret and understand on the basis of more economic analysis tools, which are studied in the subject.
Objective test	This methodology consists of a test for learning assessment. It can combine different types of questions: multiple choice, ranking, short answer, discrimination, completion and/or association questions. It can also be made with just a kind of any of these questions. It may include both theoretical and practical questions or problems. Throughout the course, students must solve some objective tests. This is a part of the continuous evaluation. It can be done online through the Moodle platform or in person.
ICT practicals	Students will try to apply the use of ICT to learn effectively, through practical activities based on written, audiovisual and any kind of documentation related to the subject, through the use of information technologies and the communications. It is about expanding knowledge and obtaining information to facilitate autonomous learning and critical reasoning. The Moodle platform will be an essential vehicle for the application of this methodology.
Mixed objective/subjective test	It may consist of problem-solving, short questions, essay questions or multiple-choice questions. Throughout the course, the students will solve some mixed tests. This is a part of the continuous evaluation. It can be done online through the Moodle platform or in person.

Personalized attention

Methodologies	Description
ICT practicals	The teaching team will be available to provide personalized attention to students, whenever they require it, for those topics they deem appropriate, concerning the subject's content. Particularly for solving problems, readings, etc.
Problem solving	
Workbook	This attention may be online through the mechanisms provided by the university.

Assessment comments

The following observations are made:

1. Not presented grade: corresponds to the student who has only participate in assessment activities that with a weight of less than 20% of the final grade, regardless of the mark achieved.
2. Second opportunity and advance call: the evaluation criteria are the same for all evaluation opportunities. In all of them, the continuous evaluation weighs 100%, and the required tests will be available to the concerned students in the corresponding call.
3. Students with recognition of part-time dedication and academic exemption from attendance: since the evaluation is 100% continuous, these students must solve all the proposed tests, agreeing at the beginning of the course on a specific calendar of dates compatible with their dedication.
4. Regarding final evaluation conditions: it will be the one obtained through continuous evaluation, and all the tests must be completed according to the established deadline.
5. Student identification: The student must prove her personality under current legal norms.

Other comments

It is recommended to follow regularly the indications and news of the MOODLE platform, since this platform, together with the face-to-face classes; It constitutes an essential communication system between the teaching team and the students. Additionally, the next general observations and recommendations are made:
1. The delivery of the outstanding works for this subject will never be printed, and instead of, they should be delivered:
a. by means of virtual/online procedure
b. through the Moodle platform
2. The ethic principles and values of personal and professional sustainable behaviour should be assumed.
3. Everyone should try to identify and modify sexist pre-judgements trying to avoid them and boosting equalitarian behaviours.
4. The full inclusion of disabled students should be facilitated and promoted. Regardless of the physical, psychologic, sensorial or socio-cultural reasons, discrimination must be avoided for all the university community and helping to achieve equalitarian university environments.
