	Study programme competences / results
Code	Study programme competences / results
A1	Manage an enterprise or small organization, understanding their competitive and institutional position and identifying their strengths and
	weaknesses
A2	Integrate in any functional area of micro-firms or SMEs and perform fluently any management task commissioned
A3	Evaluate and foreseeing, from relevant data, the development of a company.
A4	Elaborate advisory reports on specific situations of companies and markets
A5	Write projects about specific functional areas (e.g. management, marketing, financial) of the company
A6	Identify the relevant sources of economic information and to interpret the content.
A8	Derive, based on from basic information, relevant data unrecognizable by non-professionals.
A9	Use frequently the information and communication technology (ICT) throughout their professional activity.
A10	Read and communicate in a professional environment at a basic level in more than one language, particularly in English
A11	To analyze the problems of the firm based on management technical tools and professional criteria

B1	CB1-The students must demonstrate knowledge and understanding in a field of study that part of the basis of general secondary
	education, although it is supported by advanced textbooks, and also includes some aspects that imply knowledge of the forefront of their
	field of study
B2	CB2 - The students can apply their knowledge to their work or vocation in a professional way and have competences typically demostrated
	by means of the elaboration and defense of arguments and solving problems within their area of work
B3	CB3- The students have the ability to gather and interpret relevant data (usually within their field of study) to issue evaluations that include
	reflection on relevant social, scientific or ethical
B4	CB4-Communicate information, ideas, problems and solutions to an audience both skilled and unskilled
B5	CB5-Develop skills needed to undertake further studies learning with a high degree of autonomy
B6	CG1-Perform duties of management, advice and evaluation in business organizations
B7	CG2-Know how to use the concepts and techniques used in the various functional areas of the company and understand the relationships
	between them and with the overall objectives of the organization
B8	CG3- Know how to make decisions, and, in general, assume leadership roles.
B9	CG4-Learn to identify and anticipate opportunities, allocate resources, organize information, select and motivate people, make decisions
	under conditions of - uncertainty, achieve the proposed objectives and evaluate results
B10	CG5-Respect the fundamental and equal rights for men and women, promoting respect of human rights and the principles of equal
	opportunities, non-discrimination and universal accessibility for people with disabilities.
C1	Express correctly, both orally and in writing, in the official languages of the autonomous region
C4	To be trained for the exercise of citizenship open, educated, critical, committed, democratic, capable of analyzing reality and diagnose
	problems, formulate and implement knowledge-based solutions oriented to the common good
C5	Understand the importance of entrepreneurial culture and know the means and resources available to entrepreneurs
C6	Assess critically the knowledge, technology and information available to solve the problems and take valuable decisions
C7	Assume as professionals and citizens the importance of learning throughout life.
C8	Assess the importance of research, innovation and technological development in the economic and cultural progress of society.

Learning outcomes

	Methodologies	
Methodologies	Description	
Guest lecture / keynote speech	Presentation of the general aspects of the subject.	
Case study	The core of the course will be the analysis of realistic investment projectss. Additional exercises will deal with specific models and techniques.	
ICT practicals	Development and application of analytical models using spreadsheet and / or specific software	
Mixed objective/subjective test	Written examination of theoretical-practical content	

Personalized attention	
Methodologies	Description

Mixed	Individualized tutoring will be carried out (in the official hours published by the Faculty for each teacher) through Microsoft
objective/subjective	Teams, as well as the short group tutorials that are scheduled. Outside these hours students will be able to raise questions
test	through the forums established in Moodle.
Guest lecture /	
keynote speech	
ICT practicals	
Case study	

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		
Mixed	A3 A4 A8 A10 A11 B2	With an essentially practical focus, pretends to measure the general quality of the	40
objective/subjective	B3 B5 B6 B7 B8 C1	learning, the skills and competencies developed by the students.	
test	C6		
ICT practicals	A1 A2 A3 A4 A5 A6	ICTs have in this subject an instrumental role. Accordingly, while these skills will not	0
	A8 A9 A10 A11 B2 B3	be assessed directly, some evaluated problem solving might make use of IT tools.	
	B4 B5 B6 B7 B8 B9		
	C1 C5 C6 C7		
Case study	A1 A2 A3 A4 A5 A6	The capacity to frame, solve and analize models for investment project evaluation will	60
	A8 A10 A11 B2 B3 B4	be valued.	
	B5 B6 B7 B8 B9 C1		
	C6 C7		

Assessment comments	
On the first opportunity evaluation 7 continuous	
evaluation tests, with a value of 1 point each, will be carried out. The worst	
mark will be discarded, so the maximum total score will be 6 points. The	
activities are integrated into the classes and will only be evaluated when they	
are carried out in the corresponding session. However, the qualification of one	
of the tests could be replaced by that obtained through participation in	
scheduled complementary activities (conferences, seminars).	
The second evaluation opportunity will include the	
possibility to catch-up the continuous evaluation mark through a test that will	
be assessed on a maximum of 4 points, which will replace the mark obtained in	
the continuous first opportunity evaluation if it is higher.	
The final exam will have a value of 4 points, both in the	
first and second evaluation opportunities. In accordance with the	
applicable regulations, examinations must be carried out on the official dates	
established, except in the exceptional cases expressly considered in the	
academic regulations.	
The "absent" mark will be granted only to	
students participating in activities with a weight below 20% of the assessment, regardless of the	
rating achieved.	
In the advance call the evaluation is carried out through	
a specific proof comprehensive of the global contents and competences of the	
subject.

Other comments

In the blended teaching scenario, face-to-face and online sessions would be combined, following the instructions of the institution. Inface-to-face and blended scenarios, attempts would be made to facilitate, as far as possible, the online following of face-to-face sessions. The use of electronic devices (computers, tablets and phones) in the classroom may be authorised exclusively for academic uses.
