Assessment comments
The subject is divided into two parts (directive-based programming and message passing). Each part represents 50% of the final grade of the subject.
To pass the subject, the student must obtain a minimum grade of 5 averaging both parts, with a minimum of 4 in each one. In the second chance only
is possible to improve the grade of the supervised projects. The qualification of the lab practices will be the one obtained previously throughout the
academic year.
