| Contingency plan | a court. It is a project in which the studen writing of a set of explanations, the | t has to show the knowledge heories, ideas, reasoning, de y a tutor or tutors, who will er sibility of the applicant for the e maintained attention to students | acquired during the master scription of developments on their progression and | ented in public and is evaluated by It must end with the writing in r designs, etc. on a theme chosen the level of quality. However, the |

| | Study programme competences / results |
|------|---|
| Code | Study programme competences / results |
| A1 | CE1 - To know, to understand and to apply the tools of cryptography and cryptanalysis, the tools of integrity, digital identity and the protocols for secure communications |
| A2 | CE2 - Deep knowledge of cyberattack and cyberdefense techniques |
| А3 | CE3 - Knowledge of the legal and technical standards used in cybersecurity, their implications in systems design, in the use of security tools and in the protection of information |
| A4 | CE4 - To understand and to apply the methods and tools of cybersecurity to protect data and computers, communication networks, databases, computer programs and information services |
| A5 | CE5 - To design, deploy and operate a security management information system based on a referenced methodology |
| A6 | CE6 - To develop and apply forensic research techniques for analysing incidents or cybersecurity threats |
| A7 | CE7 - To demonstrate ability for doing the security audit of systems, equipment, the risk analysis related to security weaknesses, and for developing de procedures for certification of secure systems |

| ۸٥ | CER Skills for consolve decign deploy and operate subgroup with systems |
|-----|--|
| A8 | CE8 - Skills for conceive, design, deploy and operate cybersecurity systems |
| A9 | CE9 - Ability to write clear, concise and motivated projects and work plans in the field of cybersecurity |
| A10 | CE10 - Knowledge of the mathematical foundations of cryptography. Ability to understand their evolution and future developments |
| A11 | CE11 - Ability to collect and interpret relevant data the field of computer and communications security |
| A12 | CE12 - Knowledge of the role of cybersecurity in the design of new industrial processes, as well as of the singularities and restrictions to be addressed in order to build a secure industrial infrastructure |
| A13 | CE13 - Ability for analysing, detecting and eliminating software vulnerabilities and malware capable to exploit those in systems or networks |
| | |
| A14 | CE14 - Ability to develop a continuity business plan on the guidelines of commonly accepted norms and standards |
| A15 | CE15 - Ability to identify the value of information for an institution, economic or of other sort; ability to identify the critical procedures in an |
| | institution, and the impact due to their disruption; ability to identify the internal and external requirements that guarantee readiness upon |
| 140 | security attacks |
| A16 | CE16 - Ability for envisioning and driving the business operations in areas related to cybersecurity, with feasible monetization |
| A17 | CE17 - Ability to plan a time schedule containing the detection periods of incidents or disasters, and their recovery |
| A18 | CE18 - Ability to correctly interpret the information sources in the discipline of criminal law (laws, doctrine, jurisprudence) both at the |
| | national and international levels |
| A19 | CE19 - To learn how to identify the best professional profiles for an institution as a functions of its features and activity sector |
| A20 | CE20 - Knowledge about the firms specialized in cybersecurity in the region |
| B1 | CB1 - To possess and understand the knowledge that provides the foundations and the opportunity to be original in the development and |
| | application of ideas, frequently in a research context |
| B2 | CB2 - Students will be able to apply their knowledge and their problem-solving ability in new or less familiar situations, within a broader |
| | context (or in multi-discipline contexts) related to their field of specialization |
| В3 | CB3 - Students will be able to integrate diverse knowledge areas, and address the complexity of making statements on the basis of |
| | information which, notwithstanding incomplete or limited, may include thoughts about the ethical and social responsibilities entailed to the |
| | application of their professional capabilities and judgements |
| B4 | CB4 - Students will learn to communicate their conclusionsand the hypotheses and ultimate reasoning in their support to expert and |
| | nonexpert audiences in a clear and unambiguous way |
| B5 | CB5 - Students will apprehend the learning skills enabling them to study in a style that will be selfdriven and autonomous to a large extent |
| B6 | CG1 - To have skills for analysis and synthesis. To have ability to project, model, calculate and design solutions in the area of information, |
| | network or system security in every application area |
| B7 | CG2 - Ability for problem-solving. Ability to solve, using the acquired knowledge, specific problems in the technical field of information, |
| | network or system security |
| B8 | CG3 - Capacity for critical thinking and critical evaluation of any system designed for protecting information, any information security |
| | system, any system for network security or system for secure communication |
| B9 | CG4 - Ethical commitment. Ability to design and deploy engineering systems and management systems with ethical and responsible |
| | criteria, based on deontological behaviour, in the field of information, network or communications security |
| B10 | CG5 - Students will have ability to apply theoretical knowledge to practical situations, within the scope of infrastructures, equipment or |
| | specific application domains, and designed for precise operating requirements |
| B11 | CG6 - Ability to do research. Ability to innovate and contribute to the advance of the principles, the techniques and the processes within |
| | their professional domain, designing new algorithms, devices, techniques or models which are useful for the protection public, private or |
| | commercial of digital assets |
| C1 | CT1 - Ability to apprehend the meaning and implications of the gender perspective in the different areas of knowledge and in the |
| | professional exercise, with the aim of attaining a fairer and more egalitarian society |
| C3 | CT3 - Ability to include sustainability principles and environmental concerns in the professional practice. To integrate into projects the |
| | principle of efficient, responsible and equitable use of resources |
| C4 | CT4 - Ability to ponder the importance of information security in the economic progress of society |
| | |

| Topic | Sub-topic Sub-topic |

| The Master's Thesis is an academic, personal and original |
|---|
| work in which the student has to show the knowledge |
| obtained during the master. |

Therefore, the content of each work must be unique. Nevertheless, it must show the ability of the student to analyze a problem in a systematic way, propose solutions, analyze the results obtained and expose them clearly.

| Methodologies | | | |
|---------------------|---|--|--|
| Methodologies | Description | | |
| Oral presentation | Presentation of the academic work | | |
| Supervised projects | The student will complete an academic, personal and original work in which he will have to show the knowledge obtained | | |
| | during the master. It must conclude with a set of written explanations, theories, ideas, reasoning, description of developments | | |
| | or designs, etc. on a subject chosen by the student, and supervised by a tutor or tutors, who will ensure the correct | | |
| | progression and the quality level. | | |

| Personalized attention | | | |
|------------------------|--|--|--|
| Methodologies | Description | | |
| Supervised projects | During the Master's Thesis there will be periodic meetings between the student and the tutors to define, orient, supervise and | | |
| Oral presentation | delimit the work, as well as to orient the writing of the dissertation. | | |
| | The directors of the work will guide the student in the preparation of the presentation of the work at the end of the master's degree. | | |

| | | Assessment | |
|---------------|----------------|-------------|---------------|
| Methodologies | Competencies / | Description | Qualification |
| | Results | | |

| Supervised projects | A1 A2 A3 A4 A5 A6 | The work will be evaluated by a panel. The student will provide a written dissertation, | 100 |
|---------------------|---------------------|---|-----|
| | A7 A8 A9 A10 A11 | and will make a public presentation. The panel will use a rubric that will be publicly | |
| | A12 A13 A14 A15 | available. | |
| | A16 A17 A18 A19 | | |
| | A20 B1 B2 B3 B4 B5 | | |
| | B6 B7 B8 B9 B10 B11 | | |
| | C1 C3 C4 C5 | | |
| Oral presentation | B4 C5 | Assesment specified in the rubric | 0 |
