Seneral description					

happens with the SQL language test and the mixed objective/subjective test.

- In case of retaking a part at the second opportunity the final grade for that part will be the one obtained during the second opportunity (which can be higher or lower than the one obtained in the first opportunity).
- If a student decides to not retake one of the parts at the second opportunity, he/she will keep the grade for that part obtained in the first opportunity.
- 5. Modifications to the bibliography or webgraphy
  - No changes are considered.

	Study programme competences
Code	Study programme competences
A18	Coñecemento e aplicación das características, funcionalidades e estrutura das bases de datos, que permitan o seu adecuado uso, e o
	deseño e a análise e implementación de aplicacións baseadas nelas.
A19	Coñecemento e aplicación das ferramentas necesarias para o almacenamento, procesamento e acceso aos sistemas de información,
	incluídos os baseados en web.
B1	Capacidade de resolución de problemas
В3	Capacidade de análise e síntese
B4	Capacidade para organizar e planificar
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e
	para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

Learning outcomes			
Learning outcomes		Study programme	
		competences	
Knowledge and understanding of the concepts, principles, and basic theories of relational databases.		В3	C7
Ability to model and design relational databases in order to allow the storage of the information needed for specific application		B1	СЗ
domains, taking special care with the integrity of the data and the needs of the organization that will use the database.		В3	C6
		B4	
Ability to manage and use relational databases by executing SQL statements.	A18	B1	C3
	A19	В3	C7

	Contents	
Topic	Sub-topic	
Relational databases	SQL: advanced queries, DDL, embedded SQL, views.	
Database design	Design problems	
	Design phases	
	Normalization	
	Conceptual design	
	ER to relational model translation	
File systems	Files	
	Indexes	
Concurrency and fail recovery	Problems due to concurrency and failures	
	Transactions	
	Recovery techniques	
	Concurrency control techniques

(*)The information in the planning table is for	r guidance only and does not to	ake into account the	heterogeneity of the stud	lents.

	Methodologies
Methodologies	Description
Guest lecture /	* Face-to-face theoretical teaching groups: classroom lectures.
keynote speech	* On-line theoretical teaching groups: combination of on-line Teams sessions (synchronous) and videos (asynchronous).
	During these lectures the fundamental contents of the subject will be exposed. They are devoted to show objectives,
	motivation, concept development, utility, and summary.
Problem solving	* Face-to-face theoretical teaching groups: classroom problem solving lectures.
	* On-line theoretical teaching groups: combination of on-line Teams sessions (synchronous) and videos (asynchronous).
	Problem solving lectures where a problem to solve is exposed. First, the student tries to solve the problem for a while, considering different aspects to solve it. Finally, the problem is solved, showing the typical errors of the solutions provided by the students.
Laboratory practice	* Face-to-face lectures for all teaching groups.
	In laboratory classes, teachers present the knowledge needed to acquire the proposed skills, and students will do exercises that will lead them to develop their operative skills.
	During these classes, students will also make the design and implementation of a relational database. Each student shall develop it alone, with some assistance from the teacher.
Mixed objective/subjective test	Face-to-face tests to be done in a limited time, in which both theoretical and practical knowledge is evaluated.

	Personalized attention
Methodologies	Description
Laboratory practice	In the laboratory, there will be a semi-personalized support (since the groups are formed by around 15/20 people). The
	teacher will attend specific questions of each student.

		Assessment	
Methodologies	Competencies	Description	
Mixed objective/subjective test	A18 B1 B3 C6	Both at the FIRST OPPORTUNITY and at the SECOND OPPORTUNITY, for passing the course it is necessary to pass a conventional written exam which will represent 60% of the global grade.  To pass the course globally it is necessary to obtain in the written exam a minimum grade of 3 (over 6). If that minimum grade is not achieved, the maximum global grade will not exceed 4.5 (and therefore the course will be failed)  Maximum grade: 6 points  Minimum grade to pass the course: 3 (over 6)	60

Laboratory practice	A18 A19 B1 B3 B4 C3	For the FIRST OPPORTUNITY:	40
	C6		
		-SQL language test (maximum grade 2 pt).	
		-Relational database design and implementation project (Maximum grade 2 pt).	
		For the SECOND OPPORTUNITY:	
		-SQL language test (maximum grade 2 pt).	
		-The grade corresponding to the database design and implementation project is	
		unrecoverable. The grade from the first opportunity is kept.	

## **Assessment comments**

## FIRST OPPORTUNITY

In the FIRST OPPORTUNITY, students that do not take the written exam will obtain a grade of "Non presentado" (Absent). According to the UDC regulations, if a student passes the course in the FIRST OPPORTUNITY, he/she will not be able to be evaluated in the SECOND OPPORTUNITY in order to improve his/her grade. If a student fails the course in the FIRST OPPORTUNITY, he/she can retake the SQL language test, the written exam or both in the SECOND OPPORTUNITY. SECOND OPPORTUNITYIn the SECOND OPPORTUNITY, students that do not re-take any of the tests (written test and/or SQL language test) will obtain a grade of "Non presentado" ("Absent"). If a student decides to retake a test, the final grade for that test will be the one obtained during the second opportunity (which can be higher or lower than the one obtained in the first opportunity). If a student decides to not retake one of the two tests, he/she will keep the grade for that test obtained in the first opportunity. ACADEMIC DISPENSATION:

Students officially enrolled part-time who have been granted an official dispensation from attending classes, as stipulated in the regulations of this University, will be able to do (and submit) all (or part) of the practices by their own. In the case that the activities require specific equipment, or are scheduled for a specific date and time, a viable alternative will be provided, where possible, at their request. ADVANCED OPPORTUNITY:

The assessment for the advanced opportunity will consist of a written exam that will compute for the 100% of the grade.
