General description	Introductory course to Operating Systems dealing with File Systems, Memory, Input/Output, Processes and Concurrence. Practical examples are included using modern OS like Unix and its descendants.					
Contingency plan	<p>1. Modifications to the contents Without modifications 2. Methodologies *Teaching methodologies that are maintained All *Teaching methodologies that are modified None 3. Mechanisms for personalized attention to students Mail, moodle, teams.</p> <p>For this subject individual assistance to student is planned via Teams, moodle and mail since the beginning of the course. Also, there is a group where the theoretical lectures are done in the virtual classroom via Teams. All other groups for theoretical lectures and laboratory classes would change to the virtual classroom via Teams in case of need.</p> <p>4. Modifications in the evaluation none *Evaluation observations:</p> <p>5. Modifications to the bibliography or webgraphy None</p>					

Study programme competences	
Code	Study programme competences
A4	Coñecementos básicos sobre o uso e a programación dos ordenadores, sistemas operativos, bases de datos e programas informáticos con aplicación na enxeñaría.

A16	Coñecemento das características, funcionalidades e estrutura dos sistemas operativos, e deseñar e implementar aplicacións baseadas nos seus servizos.
B1	Capacidade de resolución de problemas
B2	Traballo en equipo
B3	Capacidade de análise e síntese
B4	Capacidade para organizar e planificar
B5	Habilidades de xestión da información
B6	Toma de decisións
B7	Preocupación pola calidade
B9	Capacidade para xerar novas ideas (creatividade)
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C4	Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes		
Learning outcomes	Study programme competences	
C1 - C8 (See Nuclear competences of the studies)		C1 C2 C3 C4 C6 C7 C8
Knowledge of the characteristics, functionalities and structure of operating systems and design and implement applications based on its services.	A4 A16	
B9-B17 (Transversal capacities: see study competences)		B1 B2 B3 B4 B5 B6 B7 B9

Contents		
Topic	Sub-topic	
Introduction	Introduction OS Concepts OS Services	

Process management & scheduling	Processes Process Control Block Process States Process Scheduling. Algorithms Process communications Unix Processes
Memory management	Basic Concepts Segmentation & Pagination Virtual memory. Page replacement Examples of current systems Memory management in Unix
File Systems	File Systems. Methods for assignment and accounting Directory structures Protection Unix File Systems
Input/Output	Basic concepts. Memory-mapped and port-mapped I/= Polling and Direct Memory Access for I/O I/O software layers

**Planning**

Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Laboratory practice	A4 A16 B1 B2 B3 B4 B5 B6 B7 B9 C2 C3 C4 C6 C7	20	20	40
Supervised projects	B1 B6 B7 B9 C1 C2 C3 C4 C6 C7 C8	10	20	30
Objective test	A4 A16 B1 B9 C1 C6 C8	4	20	24
Guest lecture / keynote speech	A4 A16 B7 C1 C4 C6 C7 C8	30	21	51
Personalized attention		5	0	5

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

**Methodologies**

Methodologies	Description
Laboratory practice	Laboratory assignments. Systems programming,
Supervised projects	Problems and projects to do under de teacher's supervision
Objective test	Written exam
Guest lecture / keynote speech	Lectures with contents detailed in step 3

**Personalized attention**

Methodologies	Description
Laboratory practice	The teacher will individually respond the questions of students about the work to do in laboratory assignments, problems and exercises.
Supervised projects	

Assessment					
Methodologies	Competencies	Description			Qualification
Laboratory practice	A4 A16 B1 B2 B3 B4 B5 B6 B7 B9 C2 C3 C4 C6 C7	The students must finish and send their laboratory assignments according with the established procedures and correctly answer the teacher's questions about their work during the hours of practical laboratory classes. The maximum score of this part is 2.5/10			25
Objective test	A4 A16 B1 B9 C1 C6 C8	The written exam can contain question about the contents of the lectures, problems, exercises and laboratory assignments, The maximum score of this part is 7.5/10 It is required to obtain a 40% of the score in this part to pass the subject.			75

Assessment comments	
The students that do not get the minimum required in th objective test can only get a maximum score of 4.5 (out of 10)	
Partial time students have the same scale of qualifications and continuous assessment as other students
