

Teaching Guide				
Identifying Data			2020/21	
Subject (*)	Urbanism 5	Code	630G02042	
Study programme	Grao en Estudos de Arquitectura			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Fifth	Obligatory	6
Language	SpanishGalicianEnglish			
Teaching method	Face-to-face			
Prerequisites				
Department	Proxectos Arquitectónicos, Urbanismo e Composición			
Coordinador	Rodriguez Alvarez, Jorge	E-mail	jorge.ralvarez@udc.es	
Lecturers	Diaz Revilla, Alfonso Llamazares Castro, Jesus Rodriguez Alvarez, Jorge Seoane Prado, Enrique	E-mail	a.diaz.revilla@udc.es j.llamazares@udc.es jorge.ralvarez@udc.es enrique.seoane@udc.es	
Web				
General description	The development of the course through theoretical classes and workshop will be jointly held with Architectural Projects . It is intended to transform an infill site. It will tackle the challenge of acting on spaces with poor or none accessibility, where the integration of uses and building types shall propose rehabilitative responses in the built environment			

Contingency plan

1. Modifications in the contents

-No changes are made

2. Methodologies

\* Teaching methodologies that are maintained

ANALYSIS OF DOCUMENTARY SOURCES.

CASE STUDY

\* Teaching methodologies that change

MASTER SESSION. Adaptation of the traditional face-to-face form to the non-face-to-face form through the Teams platform

DIRECTED DISCUSSION. Adaptation of the traditional face-to-face form to the non-face-to-face form through the Teams platform and Moodle forums

WORKSHOP. The supervision of this work will be carried out through the digital platforms provided by the UDC. (Teams) through tutorials agreed with each team

OBJECTIVE TEST. The final objective test will not be performed. The assessment of this knowledge incorporates the case study methodology

PRACTICAL TEST. The final mixed test will not be conducted. The assessment of this knowledge incorporates the case study methodology.

Mechanisms of personalized attention to students will be by Teams or Moodle

3. Mechanisms of personalized attention to students

- E-mail: Daily, from Monday to Friday and during school hours. Useful for making inquiries, requesting virtual meetings to resolve doubts and follow up on supervised work.

- Moodle: Daily, from Monday to Friday and during school hours. According to the need of the student. They have "thematic forums associated with the modules" of the subject, to formulate the necessary queries. There are also "specific activity forums" to develop the "Directed Discussions", through which the development of theoretical contents of the subject is put into practice.

- Teams: 1 weekly session in large group for the advance of the theoretical contents and the supervised works in the time slot that has assigned the subject in the calendar of classrooms of the school. From 1 to 2 weekly sessions in small groups (up to 6 people), for monitoring and support in carrying out the "supervised work". This dynamic allows a standardized and adjusted follow-up of the student's learning needs to develop the work of the subject.

4. Modifications in the evaluation

Tutored work (100%): In relation to supervised work, the following will be valued:

- The methodological adequacy of the work proposals.

? The depth of the content.

? Mastery of the applications used in the elaboration of the proposals.

? The treatment of a language specific to the disciplinary context.

? The use of complementary and current documentary sources.

? The presentation and clarity of the presentation.

\* Evaluation observations:

They remain the same as in the teaching guide, except that:

?- References to the calculation of attendance, which will only be made with respect to the sessions that took place until the time when the face-to-face activity was suspended.

1. SITUATIONS:

A) Full-time students:

Attendance / participation in the activities of minimum class of 80%:

a) Elaboration and presentation of the works of small group (100%).

B) Students with recognition of part-time dedication and academic exemption from exemption from attendance, as

established in the "STANDARD REGULATING THE REGIME OF DEDICATION TO THE STUDY OF UNDERGRADUATE STUDENTS IN THE UDC (Arts. 2.3; 3.be 4.5) (29 / 5/212):

Attendance / participation in the activities of minimum class of 80%:

a) Elaboration and presentation of the works of small group (100%).

2. REQUIREMENTS TO EXCEED THE SUBJECT:

1. Attend and participate regularly in class activities.
2. Obtain a score of 50% of the weight of each of the parts to be evaluated.
3. Deliver and present the supervised works on the date indicated.
4. The July opportunity will be subject to the same criteria as the June one.

5. Modifications to the bibliography or webography

No changes will be made.

Study programme competences / results	
Code	Study programme competences / results
A34	Ability to design, implement and develop sketches and drafts, concept designs, developed designs and technical designs (T)
A35	Ability to design, implement and develop urban projects (T)
A36	Ability to design, implement and develop construction management (T)
A37	Ability to develop functional programs for buildings and urban spaces (T)
A39	Ability to remove architectural barriers (T)
A41	Ability to solve the passive environmental conditioning, including thermal and acoustic insulation, climate control, energy efficiency and natural lighting (T)
A42	Ability to catalogue the built and urban heritage and plan its protection (T)
A44	Ability to develop civil work projects (T)
A45	Ability to design and execute urban layouts and urbanization, gardening and landscape design projects (T)
A46	Ability to apply standards and urban regulations
A47	Ability to develop environmental, landscape and environmental impact correction studies (T)
A52	"Adequate knowledge of ecology, sustainability and the principles of conservation of energy and environmental resources. "
A53	Adequate knowledge of the architectural, urban and landscape traditions of Western culture, as well as their technical, climatic, economic, social and ideological foundations.
A55	Adequate knowledge of the relationship between cultural patterns and social responsibilities of the architect
A58	Adequate knowledge of the methodological foundations of territorial, metropolitan and urban planning.
A59	Knowledge of the mechanisms of development and management of urban planning at all scales
A60	Knowledge of the legal framework in terms of civil laws, administration, planning, construction and building industry according to the professional practice
A61	Knowledge of feasibility analysis and the surveillance and coordination of integrated projects
A62	Knowledge of real estate valuation
A63	Development, presentation and public review before a university jury of an original academic work individually elaborated and linked to any of the subjects previously studied
B4	Students can communicate information, ideas, problems and solutions to both specialist and non-specialist public
B5	Students have developed those learning skills necessary to undertake further studies with a high level of autonomy
B8	Knowing the urbanism and techniques applied in the planning process
B11	"Knowing the industries, organizations, regulations and procedures involved in translating design concepts into buildings and integrating plans into planning "
B12	Understanding the relationship between people and buildings and between these and their environment, and the need to relate buildings and the spaces between them according to the needs and human scale
C1	Adequate oral and written expression in the official languages.
C3	Using ICT in working contexts and lifelong learning.
C4	Exercising an open, educated, critical, committed, democratic and caring citizenship, being able to analyse facts, diagnose problems, formulate and implement solutions based on knowledge and solutions for the common good
C5	Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C6	Critically evaluate the knowledge, technology and information available to solve the problems they must face
C7	Assuming as professionals and citizens the importance of learning throughout life
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

Learning outcomes	
Learning outcomes	Study programme competences / results

<p>To learn how to organize the construction process of urbanity and to deepen the definition of urban activities, giving priority to the treatment of the form and the space of urban design, perfecting the ability of the student to intervene on the different urban, suburban or rural sites, projecting its growth, improvement or transformation, putting it in relation to normative, constructive aspects and of temporal and economic planning</p>	<p>A34 A35 A36 A37 A39 A41 A42 A44 A45 A46 A47 A52 A53</p>	<p>B4 B5 B8</p>	<p>C1 C3 C4 C5 C7</p>
<p>Establish criteria for projecting outdoor space</p>	<p>A55 A58 A59 A60 A61 A62 A63</p>	<p>B11 B12</p>	<p>C6 C8</p>
<p>Acquire knowledge to lead and coordinate the material execution of the urban development works</p>	<p>A34 A35 A36 A37 A39 A41 A42 A44 A45 A46 A47 A52 A53 A55 A58 A59 A60 A61 A62 A63</p>	<p>B4 B5 B8 B11 B12</p>	<p>C1 C3 C4 C5 C6 C7 C8</p>

Contents	
Topic	Sub-topic
<p>1. Understand and analyze the existing reality and expose it based on techniques of representation that prioritize the capacity for synthesis and communication.</p>	<ul style="list-style-type: none"> <li>- Synthetic and analytical representation of the territory through sketches, diagrams, diagrams, perspectives, plants and sections, etc.</li> <li>- Representation and analysis of the territory through real and virtual models.</li> <li>- Representation and complex and sectoral information of the territory through blogs, platforms, video photographs, collages, etc.</li> </ul>
<p>2. Propose a structured program and develop proposals</p>	<p>Brief and land use, urban development and basic conditions of the transforming operation.</p>

3, Preparation of proposals, strategies or projects..	- Strategic plans. - Special plans (internal reform, protection, environmental, etc.) urban planning.
Formalization of the group proposal and the individual proposal	- Urban projects. - Urbanization projects. - Projects of conditioning of outer space.

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Case study	The theoretical concepts presented in the lectures will be applied in a short original essay through the study and analysis of cases
Workshop	Workshop sessions will be dedicated to the practical work in the classroom. It will consist of an analysis project in intervention in a field with environmental interest. It will be done in groups, with an individual part. Part of this coursework will be carried out jointly with the workshop courses (Projects, Construction and structural foundations)
Directed discussion	Public presentations will serve as a starting point for discussions on topics relevant to the subject
Guest lecture / keynote speech	Each week, a topic will be introduced by the lecturers. The student will have to supplement this presentation with the reading of recommended bibliography extracts. Attendance to lectures is mandatory, with a maximum of 20% of unexcused absences admitted. Sessions will be strictly timely. The use of mobile devices (such as computers, tablets or phones) will not be allowed during the course of the class
Document analysis	An important part of coursework consists in selecting the relevant information and data. Therefore, the student should be familiar with the instruments of the discipline.
Objective test	Theoretical examination of the contents explained in the class and / or in the bibliography of the subject
Practical test:	A test, based on a possible real case of intervention on the landscape. It will be done individually in the designated classroom

Personalized attention	
Methodologies	Description

Practical test: Workshop	The coursework will be carried out according to the tutor's guidelines. The workshops will be developed in the classroom where the tutor will be available to answer the doubts. The follow-up of activities will be carried out in tutorials. Common questions can be resolved through moodle
-----------------------------	--

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Practical test:	A34 A35 A36 A37 A39 A41 A42 A45 A46 A47 A52 A53 A59	The capacity for effective interpretation and resolution of the proposed problem will be assessed, taking into account local, programmatic, environmental, topographic or regulatory restrictions.	15
Case study	C5 C6 C7 C8	A brief research work will be carried out on topics relevant to the subject. Objectivity, critical review ability, originality, use of conventions in the writing of scientific articles and use of the bibliography will be evaluated.  Plagiarism will be a reason for suspending the subject according to UDC regulations	10
Workshop	A34 A35 A36 A37 A39 A41 A42 A44 A45 A46 A47 A52 A53 A55 A58 A60 A61 A62 A63 B4 B5 B8 B11 C1 C3 C4	Active participation in the classroom, attendance, adequate progress in work and the fulfillment of the specific objectives proposed in the workshop statement will be evaluated. The works will include a part of the group and an individual development. Each of these parts will be assessed independently and both parties will have to approve.	50
Directed discussion	B8 B11 B12 C1 C3 C4 C5 C7 C8	Participation will be evaluated actively, critical attitude, architectural and urban culture and the ability to articulate and expose public-motivated opinions.	5
Guest lecture / keynote speech	A52 A53 A55 A58 A59 A61 B8 B11	Assistance and assimilation and application of the contents will be evaluated in class practices and case studies. Attendance is mandatory.  In magisterial classes the use of mobile devices or computers will not be allowed unless instructed by the teacher	5
Objective test	A35 A52 A53 A55 A58 A59 A60 B8 C1	The acquisition of the theoretical knowledge introduced in the course will be evaluated	15

Assessment comments
<p>In the general assessment of the course, the following aspects will be present: class attendance and workshops, assessment of group work, individual work evaluation, objective test.</p> <p>Class attendance (minimum 80%) and passing the practical test, course sheet and objective test are fundamental to pass the subject.</p> <p>In the case of suspension of one of the parties, the latter must be repeated in the second opportunity</p> <p>The objective test and the practical test are part of the final exam, so that suspending a part must be repeated the full examination of the second opportunity (practical test plus objective test)</p> <p>In the case of adaptation due to COVID, the contingency plan will be apply</p>
