

Teaching Guide

Identifying Data					2020/21
Subject (*)	Inglés Técnico Marítimo	Code	631311110		
Study programme	Licenciado en Máquinas Navais				
Descriptors					
Cycle	Period	Year	Type	Credits	
First and Second Cycle	Yearly	First	Obligatory	5	
Language	English				
Teaching method	Face-to-face				
Prerequisites					
Department	Letras				
Coordinador		E-mail			
Lecturers		E-mail			
Web					
General description	Esta asignatura se centra en la práctica de las cuatro destrezas lingüísticas en el contexto técnico-marítimo.				
Contingency plan	1. Modifications to the contents 2. Methodologies *Teaching methodologies that are maintained *Teaching methodologies that are modified 3. Mechanisms for personalized attention to students 4. Modifications in the evaluation *Evaluation observations: 5. Modifications to the bibliography or webgraphy				

Study programme competences / results

Code	Study programme competences / results

Learning outcomes

Learning outcomes	Study programme competences / results

Contents

Topic	Sub-topic
1 Introduction to Maritime English	1 Introduction to Maritime English 2 Numbers in the maritime context: numbers, fractions, decimals, percentages, dates, calculations, measurements, distances, speed, tonnage, time at sea
2 Ships and machinery: An Overview	1 Ships 2 Machinery: arrangement; slow-speed diesel, medium-speed diesel; steam turbine; operations and maintenance

3 Diesel engines	<ol style="list-style-type: none">1 The two-stroke engine and its cycle2 The four-stroke engine and its cycle3 Comparison4 Power measurement5 The gas exchange process6 Fuel oil system7 Lubrication8 Cooling9 Starting air system10 Control and safety devices11 Operating procedures
4 Steam turbines and gearing	<ol style="list-style-type: none">1 Turbine types2 Astern arrangements3 Gearing4 Operating procedures
5 Boilers	<ol style="list-style-type: none">1 Boiler types2 Other boiler arrangements3 Combustion4 Purity of boiler feed water5 Boiler operation
6 Feed systems	<ol style="list-style-type: none">1 Open feed systems2 Closed feed systems3 Auxiliary feed system4 System components
7 Pumps and pumping systems	<ol style="list-style-type: none">1 Pumps2 Pump types: displacement, axial flow and centrifugal3 Piping systems4 Bilge and ballast systems
8 Auxiliaries	<ol style="list-style-type: none">1 Air compressor2 Heat exchangers3 Distillation systems4 Oil/water separators5 Sewage treatment6 Incinerator
9 Fuel oils, lubricating oils and their treatment	<ol style="list-style-type: none">1 Fuel oils2 Lubricating oils3 Oil treatment4 Homogenisers5 Blenders6 Filters and strainers7 Microbiological infestation
10 Refrigeration, air conditioning and ventilation	<ol style="list-style-type: none">1 Refrigeration: refrigerants, system components; Cargo refrigeration2 Air conditioning3 Ventilation

11 Deck machinery and hull equipment	<ol style="list-style-type: none">1 Steam2 Hydraulic systems3 Electrical operation4 Cargo handling equipment5 Hatch covers6 Stabilising systems7 Watertight doors8 Bow thruster9 Safety equipment
12 Shafting and propellers	<ol style="list-style-type: none">1 Thrust block2 Shaft bearing3 Sterntube bearing
13 Steering gear	<ol style="list-style-type: none">1 Variable delivery pumps2 Telemotor control3 Electrical control4 Power units5 All-electric steering6 Twin system steering gears7 Steering gear testing
14 Fire fighting and safety	<ol style="list-style-type: none">1 Detection2 Fire fighting equipment3 Fire fighting strategy4 Safe working practices
15 Electrical equipment	<ol style="list-style-type: none">1 Direct current generators2 Alternate current generators3 Alternating current motors4 Batteries5 Emergency generator supply6 Navigation lights7 Insulation resistance measurement8 Electrical hazards
16 Instrumentation and control	<ol style="list-style-type: none">1 Pressure measurement2 Temperature measurement3 Level measurement4 Flow measurement5 Other variables6 Control theory7 Transmitters8 Controller action9 Controllers10 Correcting unit11 Control systems12 Centralized control13 Unattended machinery spaces14 Bridge control15 Integrated control

17 Engineering materials	1 Material properties 2 Testing of materials 3 Iron and steel production 4 Heat treatment 5 Material forming 6 Common metals and alloys 7 Non-metallic materials 8 Joining metals 9 Corrosion
18 Watchkeeping and equipment operation	1 The Engineering Department ?The watchkeeping system ?Operating the watch 2 Bunkering 3 Periodic and safety routines

Planning

Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Glossary		5	10	15
Diagramming		6	12	18
Workbook		10	20	30
Student portfolio		3	6	9
Objective test		2	0	2
Guest lecture / keynote speech		15	15	30
Multiple-choice questions		2	2	4
Collaborative learning		5	10	15
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

Methodologies	Description
Glossary	El alumno elaborará un glosario a lo largo del curso.
Diagramming	Se harán esquemas de las lecturas e incluirán en el portafolio.
Workbook	Lecturas de textos técnicos
Student portfolio	Incluirá esquemas y distintos trabajos.
Objective test	Examen final.
Guest lecture / keynote speech	Clases magistrales para introducir conceptos claves.
Multiple-choice questions	Controles relacionados con las lecturas.
Collaborative learning	Trabajos en parejas sobre una unidad del temario.

Personalized attention

Methodologies	Description
---------------	-------------

OBJETIVOS: Dotar al alumno de una base amplia en terminología básica relacionada con las instalaciones y maquinaria propia del buque así como de una competencia comunicativa hablada, escrita y comprensible que le permita redactar correspondencia comercial y técnica utilizando términos comerciales así como abreviaturas y expresiones propias del mundo marítimo en el que se desarrollará su actividad. Se incluyen técnicas de planificación de la escritura, condensación de la información, ordenación lógica de la misma, técnicas para la utilización de correspondencia comercial e informes técnicos así como diversos procedimientos recomendados por la Organización Marítima Internacional (International Maritime Organization ?I.M.O.?) para la formación de Marineros. El curso desarrollará las capacidades de los alumnos para la utilización del idioma a un nivel medio / alto con el empleo de terminología propia de Inglés Marítimo hasta alcanzar un nivel que les permita la comprensión y utilización de la lengua acorde con los requisitos de la ?International Convention on Standards of Training, Certification and Watchkeeping for Seafarers (STCW)? Adquisición de conocimientos suficientes del idioma Inglés de modo que el oficial pueda utilizar e interpretar correctamente las publicaciones sobre maquinaria naval y desempeñar sus funciones.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Diagramming		Ver descripción en Metodologías.	10
Glossary		Ver descripción en Metodologías.	5
Collaborative learning		Ver descripción en Metodologías.	10
Workbook		Ver descripción en Metodologías.	10
Student portfolio		Ver descripción en Metodologías.	5
Objective test		Ver descripción en Metodologías.	40
Guest lecture / keynote speech		Asistencia y participación	10
Multiple-choice questions		Ver descripción en Metodologías. Dos pruebas.	10
