General description	Tratanse aspectos de base neuroxe	enética que poden a	fectar á disca	apacidade e a depend	dencia.	
Contingency plan	1. Modifications to the contents2. Methodologies*Teaching methodologies that are r	maintained				
*Teaching methodologies that are modified 3. Mechanisms for personalized attention to students 4. Modifications in the evaluation						
	*Evaluation observations: 5. Modifications to the bibliography	or webgraphy				

	Study programme competences
Code	Study programme competences
A1	To recognize and respect human diversity and to understand that psychological explanations may vary across populations and contexts.
A2	To identify the personal, psycho-social and / or educative factors that may put human health at risk.
А3	Being able to elaborate a scientific report which involves defining a research problem, the hypotheses and variables, and defining the
	design, the sample and its method of selection, the tools for collecting data and their subsequent analysis and discussion.
A8	To know the basis for hypotheses establishment with respect to a particular case, and from them to deduce contrastable statements.
A12	To acquire a basic theoretical knowledge about the state of the art in the different areas involved in applied psychology.
A13	Knowing and being able to use the different models, theories, methods and assessment and intervention techniques that are specific of
	the different areas of research in Applied Psychology, and developing a critical attitude typical of the scientific spirit.
B2	Capacity for organization and planning.
C3	Using the basic tools of information and communication technologies (ICT) necessary for the exercise of the profession and for lifelong
	learning.
C8	Assessing the importance of research, innovation and technology development in the socio-economic and cultural progress of society.

	Contents
Topic	Sub-topic
1. Neurogenetics. overall rank	
2. The trinucleotide expansion.	
3. The deleccións and uniparental disomy. Genomic	
imprinting.	
4. Point mutations. Environmental considerations	
5. Genetically heterogeneous disease.	
6. Problems neurogenetics	

	Planning			
Methodologies / tests	Competencies	Ordinary class	Student?s personal	Total hours
		hours	work hours	
Guest lecture / keynote speech	A1 A2 A3 A8 A12 A13	9	27	36
	C3			
Problem solving	A1 A2 B2	7	14	21
Speaking test	B2	2	3	5
Objective test	A1 C8	3	0	3
Personalized attention		10	0	10
