General description	<p>As persoas con trastornos graves e severos do desenvolvemento presentan xunto con outras dificultades, graves problemas no eido da comunicación. É posible que as súas habilidades de comunicación sexan non intencionais, que os seus actos comunicativos teñan intencionalidade pero non a amosen no nivel simbólico e mais é posible que xa estean comezando a comunicarse con símbolos. En calqueiera dos casos hai que apoialas para que poidan realizar as transicións cara a seguinte etapa da comunicación. Para poder axudalas non só hai que ter en conta á persoa con discapacidade senon tamén aos interlocutores, quen poden non saber como desenvolver un estilo de comunicación responsivo, senon tamén a contorna que pode non estar proporcionando oportunidades para a comunicación. Neste sentido cómpre desenvolver valoracións ecolóxicas, e identificar e recoñecer as modalidades comunicativas idiosincrásicas da persoa para entendelas como actos comunicativos potenciais. É a partires desta valoración que se poderá elixir a vía cara a intervención axeitada.</p>
