Identifying Data				2020/21
Subject (*)	Simulation of Mechanic and Structural Systems		Code	730497224
Study programme	Mestrado Universitario en Enxeñaría Industrial (plan 2018)			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	2nd four-month period	Second	Optional	4.5
Language	Spanish			
Teaching method	Hybrid			
Prerequisites				
Department	Enxeñaría Naval e Industrial			
Coordinador	Gutierrez Fernandez, Ruth Maria	E-mail	ruth.gutierrez@udc.es	
Lecturers	Gutierrez Fernandez, Ruth Maria	E-mail	ruth.gutierrez@udc.es	
Web	http://https://sites.google.com/site/structuralanalysislab/home			
General description	Nesta materia preténdese adquirir competencias para o deseño e análise de sólidos e conxuntos mecánicos sometidos a esforzos e capacidades de análise dos estados de deformación e tensión dos seus elementos.			
Contingency plan	<ol style="list-style-type: none">Modifications to the contentsMethodologies *Teaching methodologies that are maintainedTeaching methodologies that are modifiedMechanisms for personalized attention to studentsModifications in the evaluation *Evaluation observations:Modifications to the bibliography or webgraphy			

Study programme competences	
Code	Study programme competences
A19	EI3 - Knowledge and skills for the calculation and design of structures.
B1	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
B2	CB7 - That students know how to apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of ??study.
B3	CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
B4	CB9 - That the students know how to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized audiences in a clear and unambiguous way.
B5	CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B6	G1 - Have adequate knowledge of the scientific and technological aspects in Industrial Engineering.
B7	G2 - Project, calculate and design products, processes, facilities and plants.
B13	G8 - Apply the knowledge acquired and solve problems in new or unfamiliar environments within broader and multidisciplinary contexts.
B14	G9 - Be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments.

B15	G10 - Knowing how to communicate the conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized publics in a clear and unambiguous way.
B16	G11 - Possess the learning skills that allow to continue studying in a self-directed or autonomous way.
C1	ABET (a) - An ability to apply knowledge of mathematics, science, and engineering.
C2	ABET (b) - An ability to design and conduct experiments, as well as to analyze and interpret data.
C3	ABET (c) - An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
C5	ABET (e) - An ability to identify, formulate, and solve engineering problems.
C6	ABET (f) - An understanding of professional and ethical responsibility.
C7	ABET (g) - An ability to communicate effectively.
C8	ABET (h) - The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
C9	ABET (i) - A recognition of the need for, and an ability to engage in life-long learning.
C11	ABET (k) - An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Methodologies	
Methodologies	Description
Seminar	Técnica de trabajo en grupo para resolver problemas, mediante exposición, discusión, participación e cálculo. Emprégase calculadora.
Laboratory practice	Metodoloxía que permite a realización de actividades de carácter práctico con computador, tales como modelización, análise e simulación de elementos mecánicos e estruturais
Supervised projects	Metodoloxía deseñada para promover a aprendizaxe autónoma dos estudiantes, resolvendo un problema que involucre o conter da materia e involucre as competencias específicas da mesma, realizado baixo a tutela do profesor Alternativamente proponse un traballo tutelado no ámbito do aprendizaxe-servizo, que combina o servizo á comunidade coa aprendizaxe nun só proxecto, no que o alumnado se forma traballando en necesidades reais da súa contorna co fin de melloralo
Guest lecture / keynote speech	Exposición oral complementada co uso de medios audiovisuais, que ten como finalidade transmitir coñecementos e facilitar a aprendizaxe da materia

Personalized attention	
Methodologies	Description
Laboratory practice	Seguimiento e orientación acerca da solución de problemas concretos surtidos no desenvolvemento das distintas actividades expostas na materia.
Supervised projects	Asistencia na realización dos traballos tutelados

Assessment			
Methodologies	Competencies	Description	Qualification

Laboratory practice	A19 B2 B3 B5 B13 B15 B14 B16 B7 B6 C1 C2 C3 C5 C6 C7 C8 C9 C11	Hai que asistir sistematicamente ás prácticas e elaboralas durante as sesións prácticas da materia e nas horas non presenciais asignadas. O seguimento do traballo realizado realizase nestas sesións prácticas. A avaliación realiza mediante a presentación dos informes das prácticas.	30
Supervised projects	A19 B2 B3 B5 B13 B15 B14 B16 B7 B6 C1 C3 C5 C6 C7 C8 C9 C11	O traballo involucra os contidos teóricos e prácticos desenvoltos na materia. Débese realizar individualmente nas sesións de prácticas ao longo do curso e en casa, nas horas non presenciais asignadas a este proxecto. Vai realizar un seguimento da realización do traballo nas sesións de prácticas. A avaliación realiza mediante a presentación do traballo tutelado.	70

Assessment comments

A dispensa académica é aceptada. O estudiante, cuxa presencia ao longo do cuatrimestre sexa insuficiente para realizar o seguimento do seu traballo, terá igualmente que elaborar e presentar as prácticas e o traballo tutelado para a súa valoración. O seguimento do devandito traballo efectuarase nas sesións de titoría. Neste caso, o proceso de avaliación da materia pode incluir ademais da presentación das prácticas e do traballo tutelado, unha sesión práctica individual ou en grupo, na que o estudiante resolve manualmente e/ou co computador os problemas expostos pola profesora.

Para a segunda oportunidade pódese presentar o traballo pendente e mellorar o xa realizado. O seguimento realiza en sesións de titoría. A avaliación realiza mediante a presentación das prácticas e dos traballos tutelados pendentes e/ou mellorados. O proceso de avaliación da materia pode incluir, ademais da presentación das prácticas e do traballo tutelado, unha sesión práctica individual ou en grupo, na que o estudiante resolve manualmente e/ou co computador os problemas expostos pola profesora.
