| Web | | | | | | |
| General description | In this subject students are show | n physical separatio | n systems, tran | nsfer operations, phys | sical separation systems as well a | |
| - | transfer operations, all applied to | | - | | | |
| | separation | | | | | |
| | To understand the storage possi | bilities and the probl | ems of the sam | ne | | |
| Contingency plan | Changes in content | | | | | |
| | - No changes will be made | | | | | |
| | | | | | | |
| | 2. Methodologies | | | | | |
| | Teaching methodologies that are maintained | | | | | |
| | - Master session | | | | | |
| | - Tutored works (computes in the | e evaluation) | | | | |
| | - Laboratory practices (essential | to pass the subject) | | | | |
| | - Mixed probability | | | | | |
| | - Problem solving | | | | | |
| | - Field trips | | | | | |
| | Teaching methodologies that are modified | | | | | |
| | - Field trips (will not be done in case we are not allowed to do them) | | | | | |
| | Mechanisms for personalized attention to students | | | | | |
| | - Email: Daily. Of use to make consultations, request virtual meetings to resolve doubts and follow up on supervised work. | | | | | |
| | - Moodle: Daily. According to the needs of the students. | | | | | |
| | - Teams: 1 weekly session in a large group to advance two theoretical contents and supervised works in the time slot | | | | | |
| | assigned to the subject in the School's classroom calendar. From 1 to 2 weekly sessions (or more depending on the | | | | | |
| | demand or students) in a small group (up to 6 people), for follow-up and support in carrying out the "supervised work". This | | | | | |
| | dynamic allows a standardized and adjusted monitoring of the learning needs of the students to develop the work of the | | | | | |
| | subject. | | | | | |
| | 4. Modifications in the evaluation | | | | | |
| | | | e event that an | y of the scheduled ac | ctivities cannot be scored. this | |
| | There will be no modifications to the evaluation. In the event that any of the scheduled activities cannot be scored, this activity will go to the mixed test. | | | | | |
| | 5. Modifications of the bibliography or webgraphy | | | | | |
| | No changes will be made. | | | | | |

Study programme competences / results

| Code | Study programme competences / results |
|------|---|
| A28 | TEQ3 Capacidade para o deseño e xestión de procedementos de experimentación aplicada, especialmente para a determinación de |
| | propiedades termodinámicas e de transporte, e modelado de fenómenos e sistemas no ámbito da enxeñaría química, sistemas con fluxo |
| | de fluídos, transmisión de calor, operacións de transferencia de materia, cinética das reaccións químicas e reactores. |
| B4 | CB4 Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como leigo |
| В6 | B3 Ser capaz de concibir, deseñar ou poñer en práctica e adoptar un proceso substancial de investigación con rigor científico para |
| | resolver calquera problema formulado, así como de comunicar as súas conclusións ?e os coñecementos e razóns últimas que as |
| | sustentan? a un público tanto especializados como leigo dun xeito claro e sen ambigüidades |
| В7 | B5 Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas |
| В8 | B7 Deseñar e realizar investigacións en ámbitos novos ou pouco coñecidos, con aplicación de técnicas de investigación (con |
| | metodoloxías tanto cuantitativas como cualitativas) en distintos contextos (ámbito público ou privado, con equipos homoxéneos ou |
| | multidisciplinares etc.) para identificar problemas e necesidades |
| C3 | C5 Entender a importancia da cultura emprendedora e coñecer os medios ao alcance das persoas emprendedoras. |
| C4 | C6 Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse. |
| C6 | C8 Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da |
| | sociedade. |

| | Methodologies |
|----------------------|--|
| Methodologies | Description |
| Supervised projects | It is an option based on the resolution by the students of the responsibility for their own learning. |
| | This teaching system is based on two basic elements: the independent learning of the students and the monitoring of this |
| | learning by the teacher-tutor |
| Field trip | Activities developed in a context external to the university academic environment (companies, |
| | Institutions, agencies, monuments, etc.) related to the field of study of the subject. |
| Laboratory practice | Methodology that allows students to learn effectively through practical activities, such as demonstrations, exercises, |
| | experiments and research |
| Mixed | Exam that integrates standard questions and objective type questions. As for the former, it includes open-ended questions of |
| objective/subjective | development, the latter can combine multiple-choice, ranking, short-answer, discrimination, completion and association |
| test | questions. |
| Problem solving | Technique through which a specific problem situation has to be solved, based on the knowledge that has been worked on, |
| | which may have more than one possible solution |
| Guest lecture / | |
| keynote speech | Oral presentation complemented by the use of audiovisual media in order to transmit knowledge and facilitate learning. |

| | Personalized attention |
|---------------------|---|
| Methodologies | Description |
| Guest lecture / | Tutored works: assistance to personalized tutorials is recommended. The student will receive guidance on how to start and |
| keynote speech | carry out the work according to the criteria specified below. |
| Supervised projects | |
| Field trip | Oral presentation: made with the support of slides and each group of students will have a set time for it. |
| Laboratory practice | |
| | Laboratory Practices: The student will be cited in advance on the Moodle platform or on the bulletin board of the School. The |
| | practices will be carried out in the Laboratory of Chemical Technology and Environment of the Building of Workshops and |
| | must be provided with the manual of practices of the subject (Copy-shop) |
| | In case of academic dispensation the student will contact the teachers of the subject to agree on the planning of teaching activities, meeting the needs that the student may have within the existing possibilities. |
| | |

| | | Assessment | |
|----------------------|-------------------|---|---------------|
| Methodologies | Competencies / | Description | Qualification |
| | Results | | |
| Mixed | A28 B6 B7 | Exam | 65 |
| objective/subjective | | | |
| test | | | |
| Supervised projects | B6 B7 B8 C3 C4 C6 | Protected works will be carried out by the students with the help of teachers of the | 30 |
| | | subject. These works must provide to teachers both in paper format by email or | |
| | | platform designated by the faculty. | |
| Laboratory practice | A28 B4 | It consists of carrying out the laboratory practices and the final report of the same | 5 |

Assessment comments

It is necessary to take a minimum of 3.5 in the partial exams (if any) and an average of 4 to count the other methodologies. In case there are no partial exams, the necessary grade to be able to do average with the other activities will be 4.In case of not being able to perform any of the above mentioned methodologies the evaluation of the same Will pass to the objective test. Attendance at more than 90% of scheduled sessions will be mandatory. In case the field exits are made, they will be obligatory to surpass the subject. The laboratory practices will be necessary to overcome the matter

Other comments

1. The delivery of the documentary works carried out in this matter:1.1. It will be requested in virtual format and / or computer support.1.2. It will be done through Moodle, in digital format without the need to print them1.3. If done on paper:-No plastics will be used.- Double-sided prints will be made.-Recycled paper will be used.- Draft printing will be avoided.2.- A sustainable use of resources and the prevention of negative impacts on the natural environment must be made.3.- The importance of ethical principles related to the values of sustainability in personal and professional behavior must be taken into account.4.- As stated in the different regulations of application for university teaching, the gender perspective must be incorporated in this matter (non-sexist language will be used, bibliography of authors of both sexes will be used, intervention in class of students will be encouraged and students ...).5.- Work will be done to identify and modify prejudices and sexist attitudes, and the environment will be influenced to modify them and promote values ??of respect and equality.6. Situations of discrimination based on gender must be detected and actions and measures will be proposed to correct them.7. The full integration of students who for physical, sensorial, psychic or sociocultural reasons, experience difficulties to adequate, equal and beneficial access to university life will be facilitated.
