	Methodologies
Methodologies	Description
Objective test	Oral or written test used for learning assessment, whose distinctive feature is the possibility of determining whether or not the
	answers given are correct. It constitutes a measuring instrument, rigorously elaborated, that allows evaluating knowledge,
	capacities, skills, performance, aptitudes, attitudes, intelligence, etc. It is applicable for both diagnostic, formative and
	summative evaluation. The objective test can combine different types of questions: multiple choice, ranking, short answer,
	discrimination, completion and / or association questions. You can also build with just one type of any of these questions
Student portfolio	For the purposes of this subject, the student's portfolio designates the set of works, practices and tasks of any kind carried out
	and delivered by the student during the term according to the criteria indicated by the teacher.
Guest lecture /	Oral presentation in English and Spanish, complemented by the use of audiovisual media and the introduction of some
keynote speech	questions for students, in order to transmit knowledge and facilitate learning. The master class is also known as
	"lecture", "expository method" or "master class". This last modality is usually reserved for a
	special type of lesson given by a teacher on special occasions, with content that involves original elaboration and based on the
	almost exclusive use of the word as a way of transmitting information to the audience.

	Personalized attention
Methodologies	Description
Student portfolio	The academic activity developed by the teachers, individually or in a small group, aims to meet the needs and queries of the
Objective test	students related to the study of the contents of this subject, providing guidance, support and motivation in the learning
Guest lecture /	process.
keynote speech	
	This activity can be carried out face-to-face (directly in the classroom and in office tutorials) or non-face-to-face (via email or
	virtual campus) and is especially useful for students with no attendance or partial enrollment.
	Personalized attention should not be confused with academic tutoring, since this refers to the need to assign a tutor to each
	student from the first course until the end of the undergraduate university studies, with the aim of offering permanent and
	formal support in those moments when you must make decisions.

		Assessment

Student portfolio	A13 A14 A20 A27	The assessment of the set of practices and work carried out by the student allows	50
	A31 A33 A35 B1 B5	evaluating the progress of the knowledge obtained and the work that the student	
	B6 B9 B12 B13 C1	performs without the presence of the person in charge of teaching, especially in order	
	C4 C7	to apply it in practice.	
Objective test	A1 A14 A27 B1 C4	Written test used for the assessment of learning, whose distinctive feature is the ability	50
	C1	to determine whether the answers are correct or not. It is a measuring instrument,	
		carefully prepared, designed to measure knowledge, skills, abilities, performance,	
		skills, attitudes, intelligence, etc It applies to both the diagnostic, formative and	
		summative assessment.	
		The objective test can combine different types of questions: multiple-choice questions,	
		management, short answer, discrimination, complete and / or association. Also prune	
		build with one type of any of these questions	

Assessment comments

I. GENERAL EVALUATION CRITERIA 1. Of the total volume of student work in this area, a large part corresponds to individual or group work that students themselves undertake to do without the presence of the person in charge of teaching. 2. The evaluation of learning must include both the process and the result obtained, always bearing in mind that the way of evaluating conditions the learning method and influences the learning itself. 3. The objective written test evaluates the result obtained, but does not allow to accurately assess the learning process. Precisely for this, performance and learning obtained through the combination of formative assessment and final assessment activities will be valued, so that the grade will be the result of continuous assessment and the completion of a final test. 4. Continuous evaluation implies evaluating the effort and the learning process through the participation of the students. 5. The objective test involves evaluating the learning results.

II. SPECIFIC EVALUATION CRITERIA

- 1°) The total score of the subject comprises two parts: the objective test that represents 50% of the grade, and the set of practices carried out during the course, which will comprise the remaining 50%. The delivery of the practices for their assessment by the teacher can only be done on the Moodle platform and within the period indicated in each case by the teacher.
- 2°) It is essential to achieve 50% of the grade corresponding to each of the sections to be evaluated so that the different methodologies are added in order to obtain a final average mark. Failure to achieve the minimum required in any of the parts, the student would not pass the subject.
- 3°) The students with recognition of part-time dedication and academic exemption from attendance exemption must meet the same requirements as the rest of the students, as they do not have a weight in their evaluation for classroom attendance.
- III. SECOND CALL: In the July call, students must examine the part of the subject that they did not pass in the ordinary call, keeping the note of the passed part. That is to say: if they had passed the objective test, they should deliver the portfolio; if they have passed the portfolio, they should carry out the objective test; if they have not passed either, they must overcome both.

Other comments

It is recommended to attend class, to carry out all the activities planned in it and to participate in academic and non-academic events organized by both the teachers who teach the subject and by the center. Students are expressly warned that in this subject, the Moodle platform and the Teams platform are used as a preferred means of developing the subject, so it is the responsibility of the student to use this tool and periodically consult it.
