Study programme competences / results		
Code	Code Study programme competences / results	

A1	Análise e aplicación de metodoloxías e normativa para unha xestión eficiente da enerxía.	
В3	Poseer y comprender conocimientos que aporten una base u oportunidad de ser originales en el desarrollo y/o aplicación de ideas, a	
	menudo en un contexto de investigación.	
В6	Buscar y seleccionar alternativas considerando las mejores soluciones posibles.	
B7	Desarrollar las capacidades de análisis y síntesis; fomentar la discusión crítica, la defensa de argumentos y la toma de conclusiones.	
B11	Adquirir nuevos conocimientos y capacidades relacionados con el ámbito profesional del máster.	
B15	Conocer la legislación vigente y reglamentación aplicable al sector de las energías renovables y de la eficiencia energética.	
C3	Aplicar una metodología que fomente el aprendizaje y el trabajo autónomo.	

Learning outcomes				
Learning outcomes	Study programme			
	competence		es/	
		results		
The student will know to identify the diverse phenomena (reactive, disequilibriums, harmonic), that can find in an electrical	AJ1	BC3		
installation, that diminish his efficiency.		BC11		
		BC15		
The student will know to quantify the importance of the ineficiencias of the system and proceed to pose the best solution for	AJ1	BC6	CC3	
the same, so that the system was from the electrical point of view more efficient, all this attending to the norms and		BC7		
reglamentación valid.				

Contents			
Topic Sub-topic			
Introduction to the ineficiencias in the electrical systems.	Introduction.		
	The Unified Theory of Electrical Power.		
Compensation of the reactive power.	Introduction.		
	Characterisation and measure of the reactive energy.		
	Devices of compensation of the cos fi.		
Balanced three- and four-wire electrical systems.	Introducción. Theorem of Stokvis-Fortescue.		
	Characterization and measurement of power imbalances		
	Equivalent circuits of receptors and installations.		
	Elimination of imbalances. Filters of sequence.		
Non linear loads.	Introduction.		
	Origin of non-sinusoidal periodic waves.		
	Factors periodic signals.		
	Limits of harmonics.		
	Distortion power.		
Correction disturbances.	Introduction.		
	UNE-EN-61642. Filters of harmonic.		
	Filters of Rejection.		
	Filters of Absorption.		

Planning  Methodologies / tests Competencies / Teaching hours Student?s personal Total hours				
				Total hours
	Results	(in-person & virtual)	work hours	
Objective test	A1	3	12	15
Laboratory practice	B6 B15	12	6	18
Supervised projects	B3 C3	0	12	12
Guest lecture / keynote speech	B7 B11	9	18	27
Personalized attention		3	0	3
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies			
Methodologies	odologies Description		
Objective test	Proof of evaluation where the student will have to show his degree of learning of an objective way.		
Laboratory practice	You practise them of laboratory are a fundamental activity for the learning of this matter. They consist in practical supposition		
	where the student will have to show the theoretical knowledges purchased		
Supervised projects	They develop tasks, that allow to settle the theoretical and practical knowledges, that can go from formulating problems and		
	brief works the simple until others with some complexity.		
Guest lecture /	Face-to-face activity in the classroom, where will establish the fundamental concepts of the matter. It will realise by means of		
keynote speech	note speech an oral exhibition, complemented with audiovisual and multimedia means, is whose end transmit the knowledges and facilit		
	the learning.		

Personalized attention			
Methodologies	Description		
Supervised projects	They realise in the corresponding tutorías, where to initiative of the student resolve, or clear the possible doubts.		
Guest lecture /			
keynote speech			
Laboratory practice			

Assessment			
Methodologies	Competencies /	Description	Qualification
	Results		
Supervised projects	B3 C3	Will be able to realise to varied cape works tutelados along the course, being his	30
		compulsory delivery and that treated on problems or practical suppositions related	
		with the matter.	
		The works tutelados, are 30% of the final note of the matter, that will be added to the	
		note obtained in the objective proof, whenever this was described with at least 3.0	
		points on 10.0 points.	
Objective test	A1	In the dates fixed officially by the centre, realised this final proof.	40
		The proof can alternate ask type problem or theoretical questions, and represents	
		40% of the final note of the matter.	
Laboratory practice	B6 B15	The practical are compulsory, and is necessary to have them realised to be able to	30
		surpass the asignatura.	
		The practices represent 30% of the final note of the matter, and added to the note	
		obtained in the theoretical proof whenever this was upper to 3.0 points on 10.0 points.	

Assessment comments
All the activities that contribute to the final note of the student, will be qualified on 10.0 points.
