Study programme competences / results	
Code	Study programme competences / results

A1	Manage an enterprise or small organization, understanding their competitive and institutional position and identifying their strengths and weaknesses
A2	Integrate in any functional area of micro-firms or SMEs and perform fluently any management task commissioned
А3	Evaluate and foreseeing, from relevant data, the development of a company.
A4	Elaborate advisory reports on specific situations of companies and markets
A5	Write projects about specific functional areas (e.g. management, marketing, financial) of the company
A6	Identify the relevant sources of economic information and to interpret the content.
A8	Derive, based on from basic information, relevant data unrecognizable by non-professionals.
A9	Use frequently the information and communication technology (ICT) throughout their professional activity.
A11	To analyze the problems of the firm based on management technical tools and professional criteria
A12	Communicate fluently in their environment and work by teams
B1	CB1-The students must demonstrate knowledge and understanding in a field of study that part of the basis of general secondary
	education, although it is supported by advanced textbooks, and also includes some aspects that imply knowledge of the forefront of their
	field of study
B2	CB2 - The students can apply their knowledge to their work or vocation in a professional way and have competences typically demostrated
	by means of the elaboration and defense of arguments and solving problems within their area of work
В3	CB3- The students have the ability to gather and interpret relevant data (usually within their field of study) to issue evaluations that include
	reflection on relevant social, scientific or ethical
B4	CB4-Communicate information, ideas, problems and solutions to an audience both skilled and unskilled
B5	CB5-Develop skills needed to undertake further studies learning with a high degree of autonomy
В6	CG1-Perform duties of management, advice and evaluation in business organizations
В7	CG2-Know how to use the concepts and techniques used in the various functional areas of the company and understand the relationships
	between them and with the overall objectives of the organization
B8	CG3- Know how to make decisions, and, in general, assume leadership roles.
В9	CG4-Learn to identify and anticipate opportunities, allocate resources, organize information, select and motivate people, make decisions
	under conditions of - uncertainty, achieve the proposed objectives and evaluate results
B10	CG5-Respect the fundamental and equal rights for men and women, promoting respect of human rights and the principles of equal
	opportunities, non-discrimination and universal accessibility for people with disabilities.
C1	Express correctly, both orally and in writing, in the official languages of the autonomous region
C2	To be fluent in the oral expression and written comprehension of a foreign language.
C4	To be trained for the exercise of citizenship open, educated, critical, committed, democratic, capable of analyzing reality and diagnose
	problems, formulate and implement knowledge-based solutions oriented to the common good
C5	Understand the importance of entrepreneurial culture and know the means and resources available to entrepreneurs
C6	Assess critically the knowledge, technology and information available to solve the problems and take valuable decisions
C7	Assume as professionals and citizens the importance of learning throughout life.
C8	Assess the importance of research, innovation and technological development in the economic and cultural progress of society.

Learning outcomes	
Learning outcomes	Study programme
	competences /
	results

- To value the importante of commercial distribution within the economy and to value placement in general and retailing in	A1	B1	C1	
particular for its strategic nature within marketing strategies, as a source of competitive advantage for all types of	A2	B2	C2	
organizations, including the services sector.	А3	В3	C4	
- To understand the current situation and future trends of retailing, with a special focus on concentration and	A4	B4	C5	
internationalization processes, on the impact of new information and communication technologies (digital transformation), and	A5	B5	C6	
on sustainable supply chain management (CSR).	A6	B6	C7	
- To understand the implications of the choices for different types of channel strategies and the different types of retail	A8	B7	C8	
channels and commercial intermediaries, both offline and online. To understand the implications of omnichannel strategies.	A9	B8		
- To understand the implications for both customers and retailers of the different types of commercial formats, both offline and	A11	В9		
online.	A12	B10		
- To acquire knowledge of the commercial tools, including personal sales, available for building a successful retailing strategy.				
- To analyse assortment decisions, distributor or private label strategies, retail pricing strategies, logistics decisions and				
merchandising decisions in a retailing context.				
- To acquire knowledge about the legal environment surrounding retail at a European, national and regional level and to				
understand the ethical implications of retailing strategies, with special emphasis on sustainability, circular economy and CSR				
of retailers.				

	Contents
Topic	Sub-topic
TEMA 1: THEORETICAL AND CONCEPTUAL FRAMEWORK	Basic bibliography and information sources
OF RETAIL	Key concepts
	Retailing functions in the context of marketing strategies
	Introduction to the history of contemporary retailing
	The role of commercial distribution in the economy and society
	Global trends in retailing
TEMA 2: DESIGNING AND SELECTING DISTRIBUTION	Distribution channels: definition, functions, types
CHANNELS	Advantages and disadvantages of intermediaries
	Designing and choosing a channel: goals, stages and off-line and online alternatives
	Multichannel and omnichannel strategies
TEMA 3: CHANNEL DYNAMICS	Distribution channel flows
	A typology of distribution channels according to the degree of integration
	Advantages and disadvantages of global sourcing and vertical integration
	Alternative manufacturer and vendor strategies, conflict and collaboration,
	manufacturer brands and private labels
TEMA 4: COMMERCIAL INTERMEDIARIES AND FORMATS	Assortment decisions
	Definition of commercial formats
	Formats associated with ownership forms (and degree of channel integration)
	Retailing strategies
	Formats Associated with the retailer strategy mix
	Evolution and trends in retailing formats
	Retail life cycle and format reinvention
TEMA 5: MERCHANDISING	Introduction, concept and types
	Placement and store layout
	Establishing retail image: visual merchandising
	Elaborating a merchandise plan: merchandise selection and management,
	performance evaluation
	Promotional strategies

TEMA 6. SUPPLY CHAIN MANAGEMENT AND LOGISTICS	Supply chain management areas and key performance indicators
IN RETAIL	Managing retailing logistics: collaboration between retailers and vendors; inventory,
	warehouse and transportation management
	Strategic relevance of SCM: global examples and reverse logistics
	Information and merchandise flows: commercial coding systems and traceability
TEMA 7. SUSTAINABLE DISTRIBUTION, CORPORATE	Sustainability
SOCIAL RESPONSIBILITY AND LEGAL FRAMEWORK OF	Corporate social responsibility of retailers
RETAILING	Sustainable supply chain management and ethical sourcing
	Circular economy and responsible consumption
	Basic legal framework: European norms for reverse logistics, food security and
	product traceability

	Methodologies
Methodologies	Description
Case study	Different learning materials will be used (cases, audiovisuals, readings); both in the classroom in order to complement
	theoretical and theoretical-practical teaching (individual practical assignments), and outside the classroom in order for students
	to prepare the group practical assignments that are subject to continuos evaluation.
	The professor responsible for coordinating the course will ellaborate a weekly planning for students to prepare the practical
	assignments in advance, and to follow up on them. Participation in all sessions of the course, group practical assignments and
	guest lectures included, is strongly recommended given that their contents can be subject to evaluation.
Seminar	Questions about the course in general and about the group practical assignments in particular will be solved in small tutoring groups (max. 15 students)
Multiple-choice questions	A test examination will be held, a multiple choice type where only one option is correct and incorrect answers entail a penalty.
Guest lecture /	The fundamentals of the course will be explained in the classroom in theory-based sessions and utilizing audiovisual aids,
keynote speech	guided discussions, cases and other interactive methodologies.
	The professor responsible for coordinating the course will ellaborate a weekly planning for students to prepare the lectures in advance, and to follow up on them. Participation in all sessions of the course, individual practical assignments and guest
	lectures included, is strongly recommended given that their contents can be subject to evaluation.

	Personalized attention
Methodologies	Description

Case study Seminar

Personalized attention (individual and small group tutoring) will be delivered via Teams, following an email/Moodle request.

Personalized attention will be provided in order to solve for specific questions about course contents, to recommend additional sources of information in order to enhance case preparation, and to follow up on the group practical assignments with small student groups. Furthermore, the seminars may be used to discuss relevant questions individually, beyond collaborative learning.

The cases and other learning materials required to facilitate students' follow up of interactive sessions and the course calendar will be detailed/uploaded in the virtual platform of the UDC. Materials will be discussed in the classroom in an interactive way. Cases will be assigned to student groups so that they are firstly presented in the classroom by the responsible group, and then discussed with all students attending the course. It is strongly recommended that all students prepare the materials in advance and participate in the session. Furthermore it is strongly recommended that students utilize tutoring hours in order to solve their questions about the assignments that are subject to continuous evaluation in a personalized way.

The goal of the personalized attention will consist in solving questions about preparation of team projects and case studies, both for students registered as full-time and as part-time.

		Assessment	
Methodologies	Competencies / Description		Qualification
	Results		
Case study	A12 B8 C2 C8	The grade corresponding to continuos evaluation comes from adding up the following:	40
		- 10% of final grade comes from individual and physical attendance of students to	
		each and every session of the course, be it theoretical or interactive, including team	
		project presentations and guest lectures.	
		- 30% of final grade comes from the grade obtained by each student participating in	
		the group practical assignment (practical project), prepared in teams outside the	
		classroom according the the guidelines provided by the coordinating professor, and	
		presented in the classroom in a plenary session. This practical assignment deals with	
		cases or recommended readings, complemented with other relevant sources of	
		information. Specific tutoring will be provided for this assignment if necessary. All	
		students participating in the same team will obtain the same project grade.	

Multiple-choice	A4 A5 B4 B6 B9 B10	A multiple-choice type of test exam administered via Moodle, where only one option is	60
questions	C1	correct, will be taken. Wrong answers entail a penalty. It is strictly necessary to pass	
		the exam (with a grade equal or superior to 5, in a 0-10 grading system) in order to	
		pass the course.	
		All materials and contents addressed in the classroom, both face-to-face and vitually,	
		either in the lectures or in the theretical and/or practical sessions, in the discussion of	
		individual assignments or in the presentation of group assignments, are subject to be	
		asked about in the exam. Thus knowledge about contents of all team practical projects	
		may be assessed in the exam.	
		It is important that students prepare individually for the exam utilizing all materials	
		available in the virtual platform (visual aids, individual assignments, suggested	
		readings, legislation), and the notes they took in the classroom in order to better	
		understand the real examples used to illustrate course contents.	
		It is key that students complement these materials with the individual revision of	
		suggested textbooks, in order to clarify any remaining question.	
		Students taking the English exam (bilingual section) are exempt from memorizing	
		Spanish and Galician commercial distribution legislation. However, those questions	
		will be substituted by additional questions relative to international and European	
		legislation and norms, including CSR and sustainability norms and standards; so that	
		their test exam is fully comparable to the one taken by the rest of sections in the	
		course	
		COUISC	

Assessment comments

The aforementioned evaluation criteria will apply to both the first and the second opportunity, including Erasmus and exchange students. Those students who fail the multiple-choice exam will receive the exam grade as course grade. The grade of "Not present" will only be given to students who only participated in course activities worth under 20% of the final grade. The grade obtained by students for their continuous evaluation will be valid only for the ongoing academic year. If a student in such situation fails to pass the complete course in either 1st opportunity or 2nd opportunity, his/her final grade will be "Fail", implying that he/she will have to re-take the whole course during incoming academic years. Students taking the anticipated December opportunity will be subject to the same criteria as those applying to second opportunity (i.e. exam is worth 60% and continuous evaluation is worth 40%). It is forbidden to access the classroom with any device allowing for data transmission and/or warehousing when any of the evaluations is taking place (e.g. mobile phones, smart watches, etc.). In the case of students registered as part-time and "dispensa académica" the weight of the exam grade will be 100%.
