

Teaching Guide

Teaching Guide				
Identifying Data				2020/21
Subject (*)	Internet of Things (IoT)		Code	770G01055
Study programme	Grao en Enxeñaría Electrónica Industrial e Automática			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Fourth	Optional	4.5
Language	SpanishGalician			
Teaching method	Face-to-face			
Prerequisites				
Department	Enxeñaría Industrial			
Coordinador	Rivas Rodriguez, Juan Manuel	E-mail	m.rivas@udc.es	
Lecturers	Rivas Rodriguez, Juan Manuel	E-mail	m.rivas@udc.es	
Web				
General description	This subject allows the student to be able to: -Understand the basic concepts of the IoT -Know the fundamentals of communication technologies defined for IoT -To acquire knowledge about some IoT development tools, software platforms and hardware			
Contingency plan	1. Changes in content No modification will be made to the content 2. Methodologies * Teaching methodologies that are maintained Master Session, Practices, Tutored Works, Mixed Test * Teaching methodologies that are modified 3. Mechanisms for personalized attention to students Both the master session and the practices will be carried out through the Microsoft Teams platform. Tutoring schedules are maintained through the Microsoft Teams platform and email. 4. Modifications in the evaluation The mixed test and practical tests will be carried out through the Moodle platform. * Evaluation observations: The minimum necessary to pass the subject are maintained in those methodologies that have not been modified. 5. Modifications of the bibliography or webgraphy No modifications will be made			

Study programme competences / results

Code	Study programme competences / results
A33	Coñecemento aplicado de informática industrial e comunicacións.
B5	Capacidade para empregar as técnicas, habilidades e ferramentas da enxeñaría necesarias para a práctica desta.
B6	Capacidade de usar adecuadamente os recursos de información e aplicar as tecnoloxías da información e as comunicacións na enxeñaría.
B8	CB1 - Que los estudiantes hayan demostrado poseer y comprender conocimientos en un área de estudio que parte de la base de la educación secundaria general, y se suele encontrar a un nivel que, si bien se apoya en libros de texto avanzados, incluye también algunos aspectos que implican conocimientos procedentes de la vanguardia de su campo de estudio.
C2	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.

Learning outcomes			
Learning outcomes		Study programme competences / results	
-Understand the basic concepts of the IoT		A33	B6
-Know the fundamentals of communication technologies defined for IoT		A33	C2
-To acquire knowledge about some IoT development tools, software platforms and hardware.		A33	B5 B8

Contents	
Topic	Sub-topic
Introduction to IoT	- Basic concepts.
IoT communication technologies	- LPWANS - Based on cellular technology. - WiFi, Bluetooth. - Others.
Software platforms for IoT	- Open source. - Commercial software.
Systems-on-a-chip for IoT	- Manufacturers. - Characteristics.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A33	12	30	42
Laboratory practice	B5 B6 B8 C2	19.5	47.5	67
Objective test	B8	3.5	0	3.5
Personalized attention		0		0
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral exposition complemented with the use of audiovisual media and the execution of questions directed to the students, with the purpose of transmitting knowledge, facilitating learning and promoting debate.
Laboratory practice	Methodology that allows students to learn effectively through practical activities, such as demonstrations, exercises, experiments and research.
Objective test	Duration 3.5 hours. It will be done individually and in person.

Personalized attention	
Methodologies	Description
Laboratory practice	It will be carried out in the laboratory practices and through the tutorials in the supervised projects.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Objective test	B8	Made individually.	40
Guest lecture / keynote speech	A33	Class participation will be taken into account, representing 10% of the grade.	10

Laboratory practice	B5 B6 B8 C2	Device programming that will be done in person. Students who have the necessary hardware can do them electronically.	50
---------------------	-------------	--	----

Assessment comments

In laboratory practices and in the objective test must be obtained at least 40% of the maximum points in each part in order to pass the subject.
