	Study programme competences / results
Code	Study programme competences / results
A1	Ability to use chemistry terminology, nomenclature, conventions and units
A12	Ability to relate macroscopic properties of matter to its microscopic structure
A13	Understanding of chemistry of main biological processes
A15	Ability to recognise and analyse new problems and develop solution strategies
A16	Ability to source, assess and apply technical bibliographical information and data relating to chemistry
A20	Ability to interpret data resulting from laboratory observation and measurement
A22	Ability to plan, design and develop projects and experiments
A23	Critical standards of excellence in experimental technique and analysis
A24	Ability to explain chemical processes and phenomena clearly and simply
A25	Ability to recognise and analyse link between chemistry and other disciplines, and presence of chemical processes in everyday life
A27	Ability to teach chemistry and related subjects at different academic levels
B1	Learning to learn
В3	Application of logical, critical, creative thinking
B4	Working independently on own initiative
B5	Teamwork and collaboration
B6	Ethical, responsible, civic-minded professionalism
В7	Effective workplace communication
C1	Ability to express oneself accurately in the official languages of Galicia (oral and in written)
C6	Ability to assess critically the knowledge, technology and information available for problem solving

Learning outcomes			
Learning outcomes	Stud	Study programme	
	con	npetend	es/
		results	
- Comprender os fundamentos e a importancia da biotecnoloxía no contexto social e científico actual.	A1		
	A24		
	A25		
- Coñecer e comprender os procesos biolóxicos e as relacións entre o medio e os seres vivos.	A12	В6	
	A15		
	A27		
- Coñecemento das técnicas empleadas nun laboratorio de bioloxís.	A20	В3	
- Elección das técnicas más apropiadas para abordar o estudo dun determinado problema práctico.	A22	B4	
	A23	B5	
		B7	
- Coñecer os mecanismos asociados á dinámica dos procesos celulares.	A13	B1	C6
	A16		
- Coñecer e estudar a composición e estrutura celular e a súa relación e implicación no metabolismo.			C1

	Contents
Topic	Sub-topic

Lesson 1. Introduction to Biology's history
Lesson 2. Carbohydrates. Lípids. Nucleic Acids. Proteins
Lesson 3: Structure of membranes. Functional diversity of membranes proteins.
Transport in membranes. Extracellular surface.
Lesson 4. Structure and metabolic functions of cytosol.
Lesson 5. Cellular genomic organization. Cromatin and cromosomes. DNA Replication
. Transcription. genic expression regulation.
Lesson 6. Cellular cycle. mytosis. Meiosis. Cellular death. Cellular differentiation.
Lesson 7. The gen.
Lesson 8. Evolution theory.
Lesson 9. Genetic enginnering.
Tema 10. Biotecnology process.
Tema 11. Enviroment and distribution.
- Use of microscopy.
- Observation and study of bacteria.
- Observation and stydy of animal and vegetables cells.
- Observation and study of plast (cloroplasts, cromoplasts y amiloplasts).
- Osmotic process study.
- Mitosis study.
- Dna extraction.
- Carbohydrates, lipids and proteins study.

	Methodologies
Methodologies	Description
Mixed	During the course, two controls will be carried out on the theoretical contents of the subject, with questions of test type and
objective/subjective	short questions, as well as exercises.
test	The final exam will consist of a written test on the contents taught in the practical part of the subject with short questions about
	processes and reactions made in the practices, as well as identification of structures in images. Also, the final theoretical exam
	will consist of test questions, short questions, definitions as well as exercises.
Directed discussion	In very small groups (10 students) will discuss content related to the subject. Likewise, test exercises and problems will be
	performed that will serve as a review of the concepts explained in the lectures. Questions will be presented, object of
	discussions directed by the teacher, to conduct debates among students on methodological and theoretical aspects related to
	the subject.
Laboratory practice	Some theoretical aspects related to the apparatus and the experimental methodologies will be approached and the manual
	skills of the simple chemical-biological techniques are acquired

Guest lecture /	50-minute face-to-face sessions on some of the contents of the program. For a total use of these, it is recommended that the
keynote speech	student has read, previously and on his own, the fundamental aspects of these subjects.

small groups) or practices . It also will have
Is in the schedule of this (see schedule
edical exemption , it can use the same
carry out the practical part of the subject in

Assessment

	Results		
Mixed	A1 A13 A16 A20 A22	Haberá dous controis teóricos escritos e obrigatorios ao longo do curso, e un exame	80
objective/subjective	A24 C1 C6	final (o termo) dos contidos teóricos da materia con cuestións de tipo test, preguntas	
test		curtas e exercicios. Tales controis representarán o 30% da nota de teoría.	
		O exame final constará de cuestións de tipo test, preguntas curtas e exercicios. Este	
		exame final representará o 70% da nota de teoría.	
Laboratory practice	A12 A15 A23 B3 B5	Realizarase un exame escrito (obrigatorio) sobre os contidos prácticos da materia,	20
		constando de preguntas curtas e imaxes para identificar. Esta proba representa o	
		20% restante da cualificación global.	

Assessment comments	
---------------------	--

Attendance at practical classes is a necessary condition to be evaluated. To pass the subject it is necessary to obtain a score of 5 out of 10 in the theoretical part as well as in the practical part. First opportunity (January): The calculation of the qualification of the theoretical part (January) is constituted by the sum of the controls carried out during the course calculating 30%, plus the final exam that calculates 70%, and it will be an essential requirement to obtain a minimum grade of 5 out of 10 so that you can average with the general grade of the practical part. The qualification of the practical part will be obtained directly from the final practical exam, and it will be an essential requirement to obtain a minimum grade of 5 out of 10 so that you can make an average with the general qualification of the theoretical part. Likewise, the honors registration, if applicable, will be granted preferably in the first of the opportunities granted (end of the first semester.) The student who has not carried out any of the activities proposed for the subject, such as the Mixed tests carried out during the semester, as well as the evaluable tests of the first opportunity. The final calculation of the global qualification will consist of the sum of the general theoretical qualification (80%), plus the practical qualification (20%) and a minimum mark of 5 points out of 10 must be obtained in each of the parts (theory and practical) so that the global computation can be performed. Second opportunity (July): Students will be evaluated only by the theoretical or practical grade obtained in this second opportunity, constituting 80% the theoretical part and 20% the practical part. In this last opportunity (final call in July) it will be possible to recover the part (s) (theoretical or practical) not passed, in the first opportunity (January). The grade of Not presented will be obtained by not showing up for this opportunity even having carried out activities proposed for the subject during the semester. Failure of the subject (in the previous academic year) entails the completion and overcoming of each and every one of the activities included in this teaching guide, both the theoretical part and the practical part. In the case of those students whose average mark (theory-practical) exceeds 5, but in any of the aforementioned sections they do not reach the minimum score of 5 points, they will be qualified with a 4.9.

Students who request to be evaluated in the extraordinary opportunity of December, both the theoretical contents as well as the evaluation criteria will correspond to the 2020-2021 academic year.

The fraudulent performance of tests or evaluation activities, once verified, will directly involve a grade of "0" in the matter at the corresponding opportunity.

Other comments

El aprendizaje comprenderá: la incorporación de conceptos fundamentales sobre la materia, la familiarización con el trabajo en el laboratorio, la elaboración de memorias sencillas de prácticas y la búsqueda de información.

Se recomienda: leer o trabajar sobre el tema de las lecciones magistrales con anterioridad, tomar las notas pertinentes durante las clases teóricas y prácticas.
