General description	Ethology covers the study of the	mechanisms aı	nd evolution of a	nimal behaviour. We will e	xamine behaviour within the	
	framework of Tinbergen?s four a	reas of inquiry:	causation (mech	anisms), development, fu	nction and evolution (phylogeny)	
	with an emphasis on behavioral ecology. Topics include methods for the observation and quantification of behavioral				quantification of behaviour,	
	natural selection and evolution of behaviour, habitat selection, migration, territoriality, feeding behaviour, sexual			ng behaviour, sexual		
	reproduction, mating systems, parental investment, communication and social behaviour.					
	Service-Learning activities will pr	omote the integ	gration of Sustain	able Development Goals	into the teaching of this subject.	
Contingency plan 1. In case of NON PRESENTIALITY because of COVID19 outbreaks: 1.1 Modifications to the contents- None 1			the contents- None 1.2.			
	Methodologies *Teaching method	dologies that ar	e maintained - A	II. If needed, methodologie	es will be adapted by the use of	
	online platforms. *Teaching meth	odologies that	are modified - No	one		
1.3. Mechanisms for personalized attention to students: Students may get in contact with teachers in office hour			eachers in office hours through			
	available methods: email, Moodle and Teams. Appointments may be individual or collective. 1.4. Modifications in the					
	evaluation - All assessment methods are maintained. *Evaluation observations: Even if all assessment methods are					
	maintained, their relative weigh in the grading system will vary. Thus, their new relative weigh will be: Research project					
	(practical report): 25%; Supervised project or Service-Learning: 25%; Short answer questionnaire (exam): 40%; Seminars					
	(10%). 1.5. Modifications to the bibliography or webgraphy -None					
	2. In case of CAPACITY EXCESS of the assigned classroom for the subject: extra rooms will be available so the students					
	can follow the class through the TEAMS platform. As for practical activities the groups will be divided to adjust to the					
	capacity of the room.

Code	Code Study programme competences / results			
A1	71 0 1			
	Recoñecer distintos niveis de organización nos sistemas vivos.			
A7	Reconstruír as relacións filogenéticas entre unidades operacionales e pór a proba hipóteses evolutivas.			
A19	Analizar e interpretar o comportamento dous seres vivos.			
A20	Muestrear, caracterizar e manexar poboacións e comunidades.			
A23	Avaliar o impacto ambiental. Diagnosticar e solucionar problemas ambientais.			
A26	Deseñar experimentos, obter información e interpretar os resultados.			
A27	Dirixir, redactar e executar proxectos en Bioloxía.			
A28	Desenvolver e implantar sistemas de xestión relacionados coa Bioloxía.			
A30	Manexar adecuadamente instrumentación científica.			
A32	Desenvolverse con seguridade no traballo de campo.			
B1	Aprender a aprender.			
B2	Resolver problemas de forma efectiva.			
В3	Aplicar un pensamento crítico, lóxico e creativo.			
B4	Traballar de forma autónoma con iniciativa.			

B5	Traballar en colaboración.	
В6	Organizar e planificar o traballo.	
B7	Comunicarse de maneira efectiva nunha contorna de traballo.	
B8	Sintetizar a información.	
В9	Formarse unha opinión propia.	
B10	Exercer a crítica científica.	
B11	Debater en público.	
B12	Adaptarse a novas situacións.	
B13	Comportarse con ética e responsabilidade social como cidadán e como profesional.

Proper expression, both oral and written, in a foreign language.	A27	B8

Contents		
Topic Sub-topic		
Part 1. Fundamental concepts of Ethology	1.1 Introduction and history of Ethology.	
	1.2 Proximate causes and ontogeny of behaviour	
	1.3 Evolution and adaptative value of behaviour	
	1.4 Group selection and kin selection	
Part 2. Taking decissions	2.1 Optimality models in animal behaviour	
	2.2 Predation and anti-predator behaviour	
	2.3 Habitat selection. Dispersal, philopatry and territoriality	
	2.4 Orientation and migration	

Part 3. Sex and behaviour	3.1 Sexual reproduction: costs and benefits
	3.2 Ecology of mating systems
	3.3 Sexual selection
	3.4 Parental care
Part 4. Group living	4.1 Communication. Ecology and evolution of signals
	4.2 Some aspects of social organization
	4.3 Altruism and cooperation

	Methodologies
Methodologies	Description
Introductory activities	PRESENTATION: The course will be briefly presented during the first class. Contents, activities, schedules and grading will be
	explained in this session.
Guest lecture /	LECTURES (21) will consist mainly in oral sessions, where experiments, graphs and videos will be analysed. The slides used
keynote speech	by the professor will be available through the Moodle platform.
Supervised projects	ASSIGNMENTS: Students will be asked to prepare and defend a short presentation in groups. Drafts of the presentation will
	be discussed and improved together with the professor, in person or via online tools. Those students participating in
	Service-Learning activities are exempt from this task.
Seminar	SEMINARS: An important part of the seminars will involve reading and discussion of primary scientific literature related to
	class contents. We will work also on subjects and methods related to class assignments. Students will be graded depending
	on their active participation and/or through short exams.
Research (Research	PRACTICAL WORK: Practical work will involve the analysis of audiovisual pieces and material for introducing students to the
project)	methods for the observation and quantification of behaviour. Students will produce a final research report. Those students
	involved in Service-Learning activities may be exempt from doing some activities of the practical work.
Short answer	SHORT ANSWER EXAM: One final exam will be given. It will consist of objective, short answer questions that will require
questions	detailed and precise responses.
Aprendizaxe servizo	SERVICE-LEARNING (SL): If possible, students may have the option to voluntarily participate in a Service-Learning activity.
	There may be two options with different aims: 1) to reduce pet abandonment due to behavioural problems of the animals, and
	2) to inform on problems associated to the invasion of the yellow-legged hornet (Vespa velutina). Participation in this activity
	will exempt students form the elaboration of the class short presentation. Depending on the time required for the SL activity,
	students may be exempt also from doing some activities of the practical work.

Personalized attention		
	Methodologies	Description

Research (Research	The professor will solve doubts and provide support for class assignments, seminars and practical work during the office hours
project)	or by appointment, in person or via online tools. Students will be assisted by the professor in the preparation of class
Supervised projects	expositions, so they attain a minimum quality. Only class expositions already reviewed by the professor will be allowed to be
Short answer	presented and graded. Students may ask for clarifications in any activity, including exams.

Assessment			
Methodologies Competencies /		Description	Qualification
	Results		
Research (Research	A20 A23 A26 A27	PRACTICAL WORK: MANDATORY. Students will prepare a report in a scientific	20
project)	A28 A30 A32 B13	format that will include: the objectives of the work, material and methods used, the	
		results obtained and a short discussion. Those students unable to attend the practical	
		lessons will be required to prepare a report on a field work, under the supervision of	
		the professor.	
Supervised projects	A19 B1 B3 B4 B5 B8	CLASS ASSIGNMENTS: MANDATORY. They will be graded depending on their	15
	B10	originality, the clear connection with the class contents, the quality of the sources and	
		the quality of the exposition. The assignment will be optional for those students	
		involved in a Service-Learning activity.	
Short answer	A7 A19 B2	SHORT ANSWER EXAM: MANDATORY. The final exam will consist of objective,	60
questions		short answer questions that will require precise and well-reasoned responses. Literally	
		reproduction of class slides will lower the grade. For passing the exam students are	
		REQUIRED TO OBTAIN AT LEAST 4 POINTS OUT OF 10.	
Aprendizaxe servizo	A7 A19 B2 B7 B8 B13	SERVICE-LEARNING: OPTIONAL. Students will be graded through individual and	0
		group interviews. Grading will depend on the quality of the materials prepared, the	
		contents learnt, and the active and responsible participation in all the activities.	
Seminar	A19 B1 B3 B7 B9 B10	SEMINARS: Students will be graded depending on attendance and active	5
	B11	participation. Assessment might include also short exams. ABSENT STUDENTS WILL	
		EARN NO POINTS FOR THE SEMINARS unless absence is clearly justified.	
Others			

Assessment comments

Most of the lectures contents will be assessed in a final exam. This exam will count 6 points, and students are required to obtain at least 2.4 points out of 6 to pass it (the exam will have 10 questions, so students are required to obtain at least 4 points). IMPORTANT: Students have the right to be assessed in the official languages of the UDC (Galician and Spanish) in an appointment process.

Seminars, practical work reports and class assignments will count 4 points. Active participation in these activities is expected, and group working is strongly recommended.

Students who do not complete all the required tasks and activities will not be able to attain the maximum grade (10 points) in any of the grading opportunities. Points earned in seminars, practical work and class assignments (or Service-Learning activities) will be kept for the two grading opportunities.

Students are required to obtain at least 5 points out of 10 to pass the course.

For being classified as ?Absent?, students can not take the final exam (the short answer exam).

Subjects that continue the syllabus

Other comments

Class slides will be available to students through the Moodle platform. However, slides are only a guiding tool, and students are expected to do extra reading and work to pass the course. Attendance to classes and reading of texts and extra materials is strongly recommended. If academic fraud is detected in the activities of the subject, the current regulations will be applied. Green Campus Faculty of Sciences Program: To help achieve an immediate sustainable environment and comply with point 6 of the "Environmental Declaration of the Faculty of Sciences (2020)", the documentary works carried out in this matter:a. They will be requested mostly in virtual format and computer support.b. If done on paper: 1) Plastics will not be used. 2) Double-sided printing will be done. 3) Recycled paper will be used. 4) Drafts will be avoided. In addition, due to the characteristics of the subject, the contents and activities are designed to favor the greening of the curriculum.
