	Study programme competences / results
Code	Study programme competences / results
A1	Recoñecer distintos niveis de organización nos sistemas vivos.
A17	Realizar bioensaios e diagnósticos biolóxicos.
A20	Muestrear, caracterizar e manexar poboacións e comunidades.
A21	Deseñar modelos de procesos biolóxicos.
A24	Xestionar, conservar e restaurar poboacións e ecosistemas.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A30	Manexar adecuadamente instrumentación científica.
B4	Traballar de forma autónoma con iniciativa.
B6	Organizar e planificar o traballo.
B7	Comunicarse de maneira efectiva nunha contorna de traballo.
B8	Sintetizar a información.
B12	Adaptarse a novas situacións.

	Methodologies	
Methodologies	Description	
Guest lecture /	Oral presentations to transfer knowledge and ease learning. Most of the graphical support of presentations is available in th	
keynote speech	virtual campus (Moodle).	
Laboratory practice	For the students to learn effectively through the completion of practical activities in the field and/or in the laboratory.	
Seminar	Demonstration and study of numerical models for a better understanding and resolution of ecological problems. Most models	
	will be worked with Faculty PCs if students have no portables.	
Multiple-choice	Partial examination of the subject (mid-term) will take place during the course. They will not be eliminatory	
questions		
Case study	Deliverable elements of the activities carried out in Seminars and Practicals	
Objective test	Written exam on all aspects of the matter: theory, practicals and seminars.	

	Personalized attention
Methodologies	Description
Case study	Elucidation of possible doubts emerging as the matter is developed.
Laboratory practice	
Seminar	Orientation and tuition to make the most of practicals.
Guest lecture /	
keynote speech	Orientation and tuition to make the most of seminars.
Objective test	
Multiple-choice	Preparation, explanation and revision of deliverables and exams.
questions

Multiple-choice	A1 A17 A20 A21 A24	Partial examination of the subject (mid-term tests) will take place during the course.	30
questions	A26 A30	They will not be eliminatory (see evaluation comments)	

## Assessment comments

The final grade will result from the student performance in all the activities under evaluation, which will include the three parts of the subject: Theory, Seminars and Labs, with a contribution to the final grade proportional to its contribution in time planning: 60% Theory, 20% Seminars and 20% Labs. All students will have two opportunities to pass the course:

In the first opportunity, a continuous evaluation will be carried out, including assignments, mid-term tests and a final exam (on a date set by the Faculty Board), with the following relative weighting:

60% Theory (30% mid-term tests + 30% final exam)

20% Seminars (10% assignments + 10% final exam)

20% Labs (10% assignments + 10% final exam)

In the case of the second opportunity, there will be a single final exam (on a date set by the Faculty Board) that will include questions on the three parts of the subject with the following weighting:

60% Theory

20% Seminars

20% Practicals

Both in the first and in the second opportunities it will be necessary to pass each and every one of the three parts simultaneously (Theory, Seminars and Labs) to pass the subject. A failed part may be offset with others if its grade is at least 4/10. The average grade to pass the course must be a 5.0 out of 10. Those students who submit and/or attend any of the continuous evaluation activities will be considered as presented (attended), receiving the corresponding grade for the work submitted and/or tests carried out according to their weighting, and a grade of zero in those works and/or tests in which they have not presented or not attended. In case of not submitting assignments or not taking any of the tests, they will be considered as not presented.

Attendance to Seminars and Labs is not mandatory, but will be recorded.

The assignments to be handed in linked to Seminars and Labs will consist on exercises of the activities carried out in Seminars and Labs. Those reports will be prepared and handed in following the indications given by the professor (format, content, deadlines, etc.) and their qualification will be subject to individual oral examination, if necessary. These exercises must collect the work and interpretation of each student.

The achievement of the Honours mark (maximum qualification) will require, at least, a final grade of 9.0 or higher, and the execution of all the assignments of the course.

The fraudulent execution of the exam or activities will directly imply the grade of '0' in the subject in the corresponding opportunity.

For students who can use the early December opportunity, the evaluation will consist of a final global exam with a value of 100%, similar to that described for the second opportunity.

Students with officially recognized academic exemption are able to participate in the proposed or equivalent activities and have support by tutoring (onsite or online).
