Methodologies	
Methodologies	Description
Guest lecture / keynote speech	The teaching staff will explain each of the topics of the program, insisting on the fundamental concepts and their relationships. The oral presentation made by the teaching staff may be complemented with the support of audiovisual media and with the posing of some questions addressed to the students, to transmit knowledge and facilitate learning and facilitate participation.
Problem solving	Through this methodology, the goal is that the look for a solution to a specific problem or situation, based on the knowledge previously worked on, which may have more than one solution. This situation will be proposed in the form of the issues or practical questions that students have to answer. It is a complement to the theoretical knowledge acquired through lectures and study. The students will come to a solution applying their academic background in working environments, in which the intervention and personal contribution of the students is the central axis.
Workbook	Some readings about academic or current texts, related to the content of the subject so that your students can analyze, interpret and understand on the basis of more economic analysis tools, which are studied in the subject.
Objective test	This methodology consists of a test for learning assessment. It can combine different types of questions: multiple choice, ranking, short answer, discrimination, completion and/or association questions. It can also be made with just a kind of any of these questions. It may include both theoretical and practical questions or problems. Throughout the course, students must solve some objective tests. It can be done online through the Moodle platform or in person.

ICT practicals	Students will try to apply the use of ICT to learn effectively, through practical activities based on written, audiovisual and any kind of documentation related to the subject, through the use of information technologies and the communications. It is about expanding knowledge and obtaining information to facilitate autonomous learning and critical reasoning. The Moodle platform will be an essential vehicle for the application of this methodology.
Mixed objective/subjective test	It may consist of problem-solving, short questions, essay questions or multiple-choice questions. Throughout the course, the students will solve some mixed tests. This is a part of the continuous evaluation. It can be done online through the Moodle platform or in person.

Personalized attention

Methodologies	Description
ICT practicals Problem solving Workbook	The teaching team will be available to provide personalized attention to students, whenever they require it, for those topics they deem appropriate, concerning the subject's content. Particularly for solving problems, readings, etc. This attention may be online through the mechanisms provided by the university.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	A7 A9 A12 B1 B3 B5 C1	The knowledge and abilities shown by the students in the tests proposed by the teaching team will be valued. Some mixed tests will be done throughout the course. All these tests can be done in person or online through the Moodle platform. All these tests are a part of the continuous evaluation.	30
Objective test	B2 B1 B3 B4 B5 B7 B8 C3	Knowledge acquired throughout the course will be valued. The test may consist of theoretical or practical questions. Some objective tests will be carried out throughout the course. All these tests can be done in person or online through the Moodle platform.	70

Assessment comments

The following observations are made:

A) EVALUATION REGULATIONS:

1. Evaluation conditions: It is prohibited to access the exam room with any device that allows communication with the outside and/or storage of information, except in the case of online exams or so indicated by the teaching team.
2. Student identification: The student must prove her personality in accordance with current regulations.

B) TYPES OF RATING:

1. Qualification of not presented: Corresponds to the student, when she only participates in evaluation activities weighted less than 20% on the final qualification, regardless of the achieved qualification.
2. Students with recognition of part-time dedication and academic waiver of attendance exemption: Students with recognition of part-time dedication, even if they are exempt from attendance, will be evaluated with the same criteria as full-time students.

C) EVALUATION OPPORTUNITIES:

1. First opportunity: the evaluation criteria previously indicated in this section will be applied.
2. Second Opportunity: The evaluation criteria are the same for all evaluation opportunities. In the evaluation of the second chance (article 18, section 5, of the Norms of Evaluation, Review and Claims of Qualifications of Bachelor and Master Studies) students will have the opportunity to take a final test, consisting of a quiz. Mixed, equivalent to 100% of the evaluation, in which the students must demonstrate that they have achieved the competences of the subject.
3. In Advance call: the conditions of evaluation of the advanced opportunity (art. 19 of the Norms of Evaluation, Review and Claims of the Qualifications of the Studies of Degree and Master) will be specific for this opportunity. This will be evaluated through a mixed test that will represent 100% of the final grade.

D) OTHER EVALUATION OBSERVATIONS:

To pass the subject it will be necessary to achieve a grade of 5 out of 10.

If the grade of 5 out of 10 is achieved in the continuous assessment (CE) carried out during the course, it will not be necessary to take the final exams.

Students who do not pass the continuous assessment may take the final exam, consisting of a mixed test (100% of the total assessment), in which they must demonstrate that they have acquired the knowledge and skills necessary to accredit the skills related to the subject.

Detection of fraud, whether plagiarism or any other action will result in a final score of 0 points.

OTHER RECOMMENDATIONS:

1. The delivery of the documentary works carried out in this subject:

- a. It will be requested in virtual format and / or computer support
- b. It will be done through Moodle, in digital format without the need to print them

2. The importance of ethical principles related to sustainability values ??in personal and professional behavior must be taken into account.

3. Work will be done to identify and modify prejudices and sexist attitudes and the environment will be influenced to modify them and promote values ??of respect and equality.

4. It will facilitate the full integration of students who, for physical, sensory, psychological or sociocultural reasons, experience difficulties to an adequate, equal and profitable access to university life.

5. The principle of democratic debate will be supported in the class sessions: listening to and respecting all of the diverse opinions concerning the topics addressed, whether they are raised by teachers or students.

Other comments

It is recommended to follow regularly the indications and news of the MOODLE platform, since this platform, together with the face-to-face classes; It constitutes an essential communication system between the teaching team and the students. Additionally, the next general observations and recommendations are made: 1. The delivery of the outstanding works for this subject will never be printed, and instead of, they should be delivered: a. by means of virtual/online procedure b. through the Moodle platform 2. The ethic principles and values of personal and professional sustainable behaviour should be assumed. 3. Everyone should try to identify and modify sexist pre-judgements trying to avoid them and boosting equalitarian behaviours. 4. The full inclusion of disabled students should be facilitated and promoted. Regardless of the physical, psychologic, sensorial or socio-cultural reasons, discrimination must be avoided for all the university community and helping to achieve equalitarian university environments.
