General description	This subject shows a vision of the functioning of markets within the framework of Economic Theory. The economic methodology, basically macroeconomic, will be studied. The analysis will be developed using simple mathematical models and graphic support.			
Contingency plan	<p>1. Modifications to the contents</p> <p>No changes will be made</p> <p>2. Methodologies</p> <p>*Teaching methodologies that are maintained</p> <p>*Teaching methodologies that are modified</p> <p>The lectures are replaced by videoconferences, recordings on Teams, YouTube or similar. The class activities will be done remotely with the support and monitoring of the teachers. The objective test will be maintained, adapting it to the online assessment.</p> <p>3. Mechanisms for personalized attention to students</p> <p>The personalized attention to the student will be carried out by any means that allows to connect with the teacher, either through Moodle, Teams or email, respecting, as far as possible, the personalized attention (tutoring) schedules. In any case, the attention to the student will be flexibly adapted to their needs at times compatible with the availability of the teacher.</p> <p>4. Modifications in the evaluation</p> <p>No changes will be made</p> <p>*Evaluation observations: The minimum marks to add the continuous evaluation to the final exam are suppressed</p> <p>5. Modifications to the bibliography or webgraphy</p> <p>No changes will be made</p>			

Study programme competences

Code	Study programme competences
A4	Elaborate advisory reports on specific situations of companies and markets
A6	Identify the relevant sources of economic information and to interpret the content.
A7	Understand economic institutions as a result and application of theoretical or formal representations which explain the evolution of the economy.

A8	Derive, based on from basic information, relevant data unrecognizable by non-professionals.
A10	Read and communicate in a professional environment at a basic level in more than one language, particularly in English
A11	To analyze the problems of the firm based on management technical tools and professional criteria
A12	Communicate fluently in their environment and work by teams
B1	CB1-The students must demonstrate knowledge and understanding in a field of study that part of the basis of general secondary education, although it is supported by advanced textbooks, and also includes some aspects that imply knowledge of the forefront of their field of study
B2	CB2 - The students can apply their knowledge to their work or vocation in a professional way and have competences typically demonstrated by means of the elaboration and defense of arguments and solving problems within their area of work
B3	CB3- The students have the ability to gather and interpret relevant data (usually within their field of study) to issue evaluations that include reflection on relevant social, scientific or ethical
B4	CB4-Communicate information, ideas, problems and solutions to an audience both skilled and unskilled
B5	CB5-Develop skills needed to undertake further studies learning with a high degree of autonomy
B9	CG4-Learn to identify and anticipate opportunities, allocate resources, organize information, select and motivate people, make decisions under conditions of - uncertainty, achieve the proposed objectives and evaluate results
B10	CG5-Respect the fundamental and equal rights for men and women, promoting respect of human rights and the principles of equal opportunities, non-discrimination and universal accessibility for people with disabilities.
C1	Express correctly, both orally and in writing, in the official languages of the autonomous region
C4	To be trained for the exercise of citizenship open, educated, critical, committed, democratic, capable of analyzing reality and diagnose problems, formulate and implement knowledge-based solutions oriented to the common good
C5	Understand the importance of entrepreneurial culture and know the means and resources available to entrepreneurs
C6	Assess critically the knowledge, technology and information available to solve the problems and take valuable decisions
C7	Assume as professionals and citizens the importance of learning throughout life.
C8	Assess the importance of research, innovation and technological development in the economic and cultural progress of society.

Learning outcomes			
Learning outcomes	Study programme competences		
To understand economic institutions as a result of applying theoretical or formal representations about the functioning of the economy	A4 A6 A7 A8	B1 B2	C5
To apply professional criteria based on the handling of technical instruments to the analysis of problems. To be able to communicate fluently in the environment and to teamwork.	A10 A11 A12	B3 B4	C7
To value the importance of research, innovation and technological development in the socio-economic and cultural development of the society. To value in a critical way the knowledge, technology and information available to solve the main problems of society.		B5 B9 B10	C1 C4 C6 C8

Contents

Objective test	A7 A8 A10 A11	5	29	34
Problem solving	A4 A6 A7 B3 B4 B5 B9 B10 C1 C4	25	25	50
Personalized attention		15	0	15

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	The activities of the course may include master classes, in addition to practical classes. Verbal, mathematical and graphic language will be used to explain the different subjects of the program. All the contents will be evaluated by means of objective tests on the dates established by the Faculty, in the first and the second opportunity, as in the advanced opportunity.
Objective test	The exams will be carried out in the official dates established by the Faculty, in the first and second opportunity, and in the advanced opportunity. The exam worths between 0 and 4 points of the final grade. Its necessary to obtain at least 2 points to pass the test. The exam may consist of a multiple choice test, with only one answer being correct. The incorrect questions will have penalization. Some of the tests may consist of problems, being the evaluation system of these tests the same as that of the other tests. The exam may also contain program development topics and/or problems proposals.
Problem solving	Problems and activities will be proposed to the students. They will be closely related to the topics explained in the master classes. Evaluations of explained topics may be proposed. These evaluations will not be liberating in any case. The scores reached by the students will be included on the 60% assigned to the continuous evaluation.

Personalized attention	
Methodologies	Description
Problem solving Guest lecture / keynote speech Objective test	<p>The Small Group Office hours as well as the individual ones will be preferably virtual.</p> <p>Personalized attention should be understood as continuous work. In this activity the tutorial action in small groups is included, at the rate of 4 hours for each group of 15 students. This activity is included in the 15 hours of personalized attention to the student that is included in section 4: Planning.</p> <p>Students with part-time dedication and academic exemption from attendance: the Moodle platform, Teams and e-mail will be used as the main communication tool for content management, tutoring and the delivery of works. A specific calendar of dates compatible with their dedication will be agreed at the beginning of the course. They will have the same obligation to carry out activities as full-time students.</p>

Assessment			
Methodologies	Competencies	Description	Qualification

Problem solving	A4 A6 A7 B3 B4 B5 B9 B10 C1 C4	The teacher will propose to the students activities that must be developed throughout the course. The teacher will use those activities, such as problem solving and presentation of results, exercises and works, appropriate for following the course. The solution and the exposition of the problems or works in the class, individually or together, and the solutions given to the proposed exercises will be evaluated. The score for these activities is 6 points. These activities can also be evaluated through questionnaires that will be periodically presented to the students. This exam may consist of a multiple choice test with only a correct answer. Some of the tests may consist of obtaining results of problems. Incorrect questions will have penalization. The number of questionnaires or test in the four-month period will be three. The qualifications obtained in these questionnaires are included in the 60% reserved for class activities. For students who have an academic exemption from class attendance, these questionnaires may be taken on dates and times different from those established for the rest of the students. The scores that they will reach (maximum 6 points) will not under any circumstances be releasing the contents of the program.	60
Objective test	A7 A8 A10 A11	The test will be held on the dates established by the Faculty, corresponding to the final exams, both on the first opportunity and on the second, as well as on the opportunity in December. The maximum grade for this test will be 4 points. To pass the objective test, the student must achieve at least 2 points on the exam. The student will be considered approved in the subject as long as his total grade, sum of the objective test (at least 2 points) and the continuous evaluation, is 5 or more points. This exam may consist of a multiple choice test with only a correct answer. Some of the tests may consist of obtaining results of problems. Incorrect questions will have penalization.	40

Assessment comments

A) EVALUATION REGULATIONS:

1. Evaluation conditions: It is forbidden to access the exam room with any device that allows communication with the outside and / or storage of information.
2. Identification of the student: The student must bring and show his/her ID card or passport the day of the exam in accordance with current regulations.

B) TYPES OF GRADINGS:

1. "No presentado" grading (students that did not show up): Corresponds to the student, when he only participates in evaluation activities that have a weighting of less than 20% on the final grading, regardless of the grading achieved.
2. Students with recognition of part-time dedication and academic exemption of waiver attendance: Except for the dates approved in the "Junta de Facultad" for the "mixed tests", for the remaining tests a specific timetable compatible with their dedication will be agreed at the beginning of the course.

C) GRADING OPPORTUNITIES:

1. First opportunity: The evaluation criteria will be applied in accordance with those established in the ?Assessment? section.
2. Second opportunity: In accordance with Article 18, section 5, of the standards for the evaluation, review and claims of grades for bachelor?s and master?s degrees, the second opportunity must guarantee the possibility of passing the subject by the students, so it is advisable to modify the grading percentages with respect to the first opportunity. On the second opportunity, the grades achieved in the midterm activities, that is, ?problem solving? (in Spanish, evaluación continua) will be kept by the students (with a weight of 30%) but not the grade achieved in the objective test.
3. Advance call: The evaluation conditions of the advanced call will be specific for this opportunity (Article 9 of the standards for the evaluation, review and claims of grades for bachelor?s and master?s degrees). This will be evaluated through a mixed test that will represent 100% of the final grade.

C) OTHER EVALUATION OBSERVATIONS:

1. Regarding ?minimums? in the evaluation criteria
A minimum grade is not required in the part of the midterm activities (evaluación continua). In the objective test (final exam) it is necessary to obtain at least 50% of the grade to be able to pass the subject. This requirement will apply to both the first and second opportunities. In the set of the two parts (midterm activities + objective

test) the student must obtain a minimum grade of 5 points to pass the subject but provided that in the objective test a minimum of 50% of the test grade is reached.

2. Possibility of passing the subject before the objective test of the first opportunity

At the beginning of the course, it will be specified

if there is a possibility of passing the subject before the final exam at the first opportunity. In this case, it will be necessary to obtain an average grade equal to or greater than 5 in the three midterm activities carried out during the course.

Recommendations

Subjects that it is recommended to have taken before

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

Other comments

Students are recommended

to follow the subject continuously. Attendance at keynote sessions and problem-solving activities is encouraged. Students are advised to resolve any doubts that arise, either in the classroom or in tutoring.1. The delivery of the documentary works carried out in this subject:a) It will be requested in virtual format (email, etc) and /or any kind of computer compatible devise b). It will be done through Moodle, in digital format without the need to print them 2. The importance of ethical principles related to sustainability values ??in personal and professional behavior must be taken into account. 3. Work will be done to identify and modify sexist prejudices and attitudes and the environment will be influenced to modify them and promote values ??of respect and equality. 4. The full integration of students who, for physical, sensory, psychological or sociocultural reasons, experience difficulties to an adequate, equal and profitable access to university life will be facilitated.

(*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
