General description	The general goal of this course or	n Retail Manag	gement is to introd	luce students to the prac	tical aspects of the retailing	
	sector, with a focus on the strateg	gic manageme	nt of this marketin	g area, and on the oppor	rtunities it entails for the	
	competitive advantage of organizations and for the satisfaction of their clients. In order to fulfill it, the theoretical and					
	institutional framework, the trends coming from internationalization and the introduction of new information and					
	communication technologies, and the expectations of stakeholders for a more sustainable supply chain management, will					
	be first introduced. In such context, the operations and dynamics of different types of commercial channels, intermediaries					
	and formats; the relevance of merchandising and retail logistics; and the ethical implications and legal framework of retail,					
	will be discussed.

	Methodologies
Methodologies	Description

Case study	Different learning materials will be used (cases, audiovisuals, readings); both in the classroom in order to complement
	theoretical and theoretical-practical teaching (individual practical assignments), and outside the classroom in order for students
	to prepare the group practical assignments that are subject to continuos evaluation.
	The professor responsible for coordinating the course will ellaborate a weekly planning for students to prepare the practical
	assignments in advance, and to follow up on them. Participation in all sessions of the course, group practical assignments and
	guest lectures included, is strongly recommended given that their contents can be subject to evaluation.
Seminar	Questions about the course in general and about the group practical assignments in particular will be solved in small tutoring groups (max. 15 students)
Multiple-choice questions	A test examination will be held, a multiple choice type where only one option is correct and incorrect answers entail a penalty.
Guest lecture /	The fundamentals of the course will be explained in the classroom in theory-based sessions and utilizing audiovisual aids,
keynote speech	guided discussions, cases and other interactive methodologies.
	The professor responsible for coordinating the course will ellaborate a weekly planning for students to prepare the lectures in
	advance, and to follow up on them. Participation in all sessions of the course, individual practical assignments and guest
	lectures included, is strongly recommended given that their contents can be subject to evaluation.

	Personalized attention
Methodologies	Description
Case study	Personalized attention (individual and small group tutoring) will be delivered via Teams, following an email/Moodle request.
Seminar	
	Personalized attention will be provided in order to solve for specific questions about course contents, to recommend additional
	sources of information in order to enhance case preparation, and to follow up on the group practical assignments with small
	student groups. Furthermore, the seminars may be used to discuss relevant questions individually, beyond collaborative
	learning.
	The cases and other learning materials required to facilitate students' follow up of interactive sessions and the course calendary
	will be detailed/uploaded in the virtual platform of the UDC. Materials will be discussed in the classroom in an interactive way.
	Cases will be assigned to student groups so that they are firstly presented in the classroom by the responsible group, and the
	discussed with all students attending the course. It is strongly recommended that all students prepare the materials in advance
	and participate in the session. Furthermore it is strongly recommended that students utilize tutoring hours in order to solve
	their questions about the assignments that are subject to continuous evaluation in a personalized way.
	The goal of the personalized attention will consist in solving questions about preparation of team projects and case studies,
	both for students registered as full-time and as part-time.

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		

Case study	A12 B8 C2 C8	The grade corresponding to continuos evaluation comes from adding up the following:	40
		- 10% of final grade comes from individual attendance and/or participation of students	
		to each and every session of the course, be it theoretical or interactive, including team	
		project presentations and seminars/guest lectures. Participation may be randomly	
		checked.	
		- 30% of final grade comes from the grade obtained by each student participating in	
		the group practical assignment (practical project), prepared in teams outside the	
		classroom according the the guidelines provided by the coordinating professor, and	
		presented in the classroom in a plenary session. This practical assignment deals with	
		cases or recommended readings, complemented with other relevant sources of	
		information. Specific tutoring will be provided for this assignment if necessary. All	
		students participating in the same team will obtain the same project grade.

Multiple-choice	A4 A5 B4 B6 B9 B10	A multiple-choice type of test exam, that may be administered via Campus Virtual in	60
questions	C1	the classroom, where only one option is correct, will be taken. Wrong answers entail a	
		penalty of one third of the value of correct ones. It is strictly necessary to pass the	
		exam (with a grade equal or superior to 5,00 in a 0-10 grading system) in order to	
		pass the course.	
		All materials and contents addressed in the classroom, both face-to-face and vitually,	
		either in the lectures or in the theretical and/or practical sessions, in the discussion of	
		individual assignments or in the presentation of group assignments, are subject to be	
		asked about in the exam. Thus knowledge about contents of all team practical projects	
		may be assessed in the exam.	
		It is important that students prepare individually for the exam utilizing all materials	
		available in the virtual platform (visual aids, individual assignments, suggested	
		readings, legislation), and the notes they took in the classroom in order to better	
		understand the real examples used to illustrate course contents.	
		and state and road state production and state sources	
		It is key that students complement these materials with the individual revision of	
		suggested textbooks, in order to clarify any remaining question.	
		Students taking the English exam (bilingual section) are exempt from memorizing	
		Spanish and Galician commercial distribution legislation. However, those questions	
		will be substituted by additional questions relative to international and European	
		legislation and norms, including CSR and sustainability norms and standards; so that	
		their test exam is fully comparable to the one taken by the rest of sections in the	
		course

2.ANTICIPATED CALL

@font-face

Assessment conditions for the anticipated opportunity (Art. 19 of the "Normas de Avaliación, Revisión e Reclamacións das Cualificacións dos Estudos de Grao e Mestrado Universitario") will be specific for that opportunity. It will be assessed through a multiple-choice questions type of exam that will be worth 100% of the final grade.

{font-family:"Cambria Math"; panose-1:2 4 5 3 5 4 6 3 2 4; mso-font-charset:0; mso-generic-font-family:roman; mso-font-pitch:variable; mso-font-signature:3 0 0 0 1 0;}p.MsoNormal, li.MsoNormal, div.MsoNormal {mso-style-unhide:no; mso-style-qformat:yes; mso-style-parent:""; margin:0cm; mso-pagination:widow-orphan; font-size:12.0pt; font-family: "Times New Roman", serif; mso-fareast-font-family: "Times New Roman"; }. D. OTHER ASSESSMENT COMMENTS

Those students who fail the multiple-choice exam will receive the exam grade as final course grade in any of the opportunities.

The grade obtained by students from continuous evaluation, coming from their team projects (up to 30%) and attendance checks (up to 10%), will be valid only for the ongoing academic year.

Fraud or cheating in any of
the exams or assignments will directly result in a grade of failed
"0" in the corresponding opportunity of the course, therefore
invalidating any grade already obtained in any of the assessment activities
towards the extraordinary opportunity.
