General description	The aim of this course is to introduce	e the field of co	orpus linguistic	s and corpus-based met	hodology for the linguistic study of		
	English. General issues about the de	esign, collection	n and analysis	of corpus material will b	e discussed. In practical sessions		
	students will learn how to search and	d analyse text	corpora using	software tools. Students	will develop the ability to describe		
	and discuss the extent to which language usage varies and can be tracked with reference to genuine examples attested in						
	corpora.						
	With this course students will acquire skills in:						
	? the principles and methodology of English corpus linguistics;						
	? the practical use of linguistic corpo	ora and related	software;				
	? the discussion of specialized litera	ture on corpus	linguistics;				
	? the presentation of research result	is.					
Contingency plan	1. Modifications to the contents						
	2. Methodologies						
	*Teaching methodologies that are maintained						
	*Teaching methodologies that are modified						
	3. Mechanisms for personalized attention to students						
	4. Modifications in the evaluation						
	*Evaluation observations:						
	5. Modifications to the bibliography or webgraphy						

	Study programme competences / results
Code	Study programme competences / results
A1	E01 ? Familiarity with the main research models in linguistic research.
A2	E02 ? Familiarity with the main resources, tools and methodologies in linguistic research.
A14	E14 ? Familiarity with and application of techniques and methods of quantitative linguistic analysis
B1	CB6 ? Students should have the knowledge and understanding necessary to provide a basis or opportunity for originality in the
	development and/or application of ideas, often in a research context.
В3	CB8 - Students must be able to integrate knowledge and to deal with the complexity of judgement formulation starting with information,
	which might be incomplete or limited, and which includes reflections on social and ethical responsibilities linked to the application of their
	knowledge and judgement.

В6	G01 ?The capacity to delve into those concepts, principles, theories or models related with the different fields of English Studies is a
	necessary skill, as is the ability to solve specific problems in a particular field of study via appropriate methodology.
В8	G03 ? An efficient use of new information technology and communication in English Studies is a necessary skill.
B10	G05 ? Skills related to research and the handling of new knowledge and information in the context of English Studies are to be acquired by
	students
B11	G06 ? Students should be able to develop a critical sense in order to assess the relevance of both existing research in the fields of English
	Studies, and their own research.
B12	G07 ?Linguistic competence (C2 level) in oral and written English must be developed and consolidated.
B14	G09 ? Students are expected to be able to carry out research projects of an academic nature in the different fields of English Studies
B15	G10 ? The ability to present and defend a research project using adequate terminology and resources appropriate to the field of study is a
	skill which should be acquired.

	Contents
Topic	Sub-topic
1.Introduction (description vs. theory; corpus vs.	
computational linguistics; brief history of corpus linguistics).	
2. What is a corpus? (defining a corpus, types of corpora,	
corpus resources).	
3. Corpus design and compilation (size, representativeness,	
etc.).	
4. Corpus annotation (tagging, parsing, other types of	
annotation).	
5. Data retrieval (software tools, concordances, wildcards,	
keywords, word lists, etc.).	
6. Data analysis (quantitative and qualitative analyses,	
normalized frequencies, frequency distribution, statistical	
significance).	
7. Applications of corpora for the linguistic analysis of English.	
Practical demonstrations with a selection of different corpora.	

Planning

	Results		
ICT practicals	B8 B10 B11	Hands-on sessions with software tools and corpora for text analysis.	30
Oral presentation	B6 B8 B10 B12	Oral presentation of a case study. Students will have to provide a hand-out and a	30
		PowerPoint presentation.	
Practical test:	A2 B12 B14 B15	A test on the role of corpus linguistics as a framework/methodology for linguistic	40
		investigation.	

Second opportunity:

Students will have to repeat only those parts (exercises and case study) in which they did not reach a pass in the first opportunity. In the second opportunity the case study will be submitted as a written essay (between 2,000-3,000 words, excluding references).

Students officially exempt from class attendance:

Students will have

to hand in all course exercises (60%) and submit an essay on a case study (between 2,000-3,000 words, excluding references) (40%).

All exercises and tests will be done in English. Overall correctness in language and in the use of formal conventions is indispensable. Therefore, grammatical and orthographic mistakes will be penalised.

Those who are officially registered as part-time students, and have been granted permission not to attend classes, as stipulated in the regulations of this University, will be assessed in either of the opportunities according to the same criteria specified for the second opportunity.

Part-time students who have been granted a "dispensa académica" must contact the teacher at the beginning of the semester in order to design the necessary changes and adjustments relating to the different activities to be carried out along the academic year.

LINGUISTIC ACCURACY

Both the theoretical and practical examination must meet the minimum requirements of linguistic correctness (spelling and grammar, punctuation, syntax concordance, lexical precision, or formal register). The level in English language expected of students is equivalent to a C1 level. Deficiencies in this area will be penalized in qualifying.

Essays and written work may be tested through Turnitin in order to detect wrong citations, plagiarism or any other type of fraud. Should this occur, the rules for plagiarism will be applied. (Normasde avaliación, revisión e reclamación das cualificacións dos estudos de grao emestrado universitario). Turnitin recognises papers previously turned in by other people (or the student him/herself) at this university or other universities, as well as other material found on Internet.
