| General description | O obxectivo desta materia é proporcionar ao alumnado o coñecemento básico necesario para a administración de sistemas informáticos. Isto inclúe a administración e despregamento de infraestruturas servidor e clúster facendo uso de tecnoloxías de virtualización e almacenamento en rede. A orientación da materia é eminentemente práctica, traballando con tecnoloxías, ferramentas e servizos habituais nestas contornas. |        |   |         |         |

Mechanisms for personalized attention to students<br><br>4. Modifications in the evaluation<br><br>*Evaluation observations:<br><br>5. Modifications to the bibliography or webgraphy  |        |   |         |         |

## Study programme competences / results

| Code | Study programme competences / results   |
|------|---|
| A52  | Capacidade para comprender o contorno dunha organización e as súas necesidades no ámbito das tecnoloxías da información e as comunicacións.   |
| A53  | Capacidade para seleccionar, deseñar, despregar, integrar, avaliar, construír, xestionar, explotar e manter as tecnoloxías de hardware, software e redes dentro dos parámetros de custo e calidade adecuados. |
| A55  | Capacidade para seleccionar, deseñar, despregar, integrar e xestionar redes e infraestruturas de comunicacións nunha organización.  |
| B1   | Capacidade de resolución de problemas   |
| B3   | Capacidade de análise e síntese   |
| C6   | Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.   |
| C8   | Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.   |

## Learning outcomes

| Learning outcomes  | Study programme competences / results |          |          |
|--|---------------------------------------|----------|----------|
| Capacity to select, design, deploy, integrate, evaluate, build, manage, exploit and maintain the hardware, software and network technologies within appropriate cost and quality parameters. | A52<br>A53                            | B1<br>B3 | C6<br>C8 |
| Capacity for selecting, designing, deploying, integrating and managing infrastructure and network communication infrastructures in an organization.  | A52<br>A55                            | B1<br>B3 | C6<br>C8 |

| Laboratory practice             | A53 A55 B1 B3 C6       | 21                                   | 63                            | 84          |
| Mixed objective/subjective test | A52 A53 A55 B1 B3      | 3                                    | 6                             | 9           |
| Guest lecture / keynote speech  | A52 A53 A55 C6 C8      | 21                                   | 31.5                          | 52.5        |
| Personalized attention          |                        | 4.5                                  | 0                             | 4.5         |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies                   |   |
|---------------------------------|---|
| Methodologies                   | Description   |
| Laboratory practice             | Practical exercises on selection, design, deployment, evaluation and management of storage infrastructure, both on premises and on the cloud, to work on the concepts discussed in the classroom. |
| Mixed objective/subjective test | Test made up of evaluation questions to validate that the students have understood the theoretical concepts and they know how to put it into practice.  |
| Guest lecture / keynote speech  | Classroom presentation on the topics of the subject to transmit knowledge and ease the learning and assimilation process of the discussed concepts.   |

| Personalized attention |             |
|------------------------|-------------|
| Methodologies          | Description |
|                        |             |

|                                |  |
|--------------------------------|--|
| Guest lecture / keynote speech | Solving doubts of the students on the lab exercises.   |
| Laboratory practice            | Personalized attention to those students with part-time enrollment or with difficulties to attend lectures due to special circumstances. |

| Assessment                      |                        |  |               |
|---------------------------------|------------------------|--|---------------|
| Methodologies                   | Competencies / Results | Description  | Qualification |
| Laboratory practice             | A53 A55 B1 B3 C6       | A avaliación das prácticas de laboratorio realizarase ao longo do curso có obxectivo de valorar os coñecementos adquiridos e o traballo do alumnado durante as sesións prácticas.            | 50            |
| Mixed objective/subjective test | A52 A53 A55 B1 B3      | Ao final do cuadrimestre realizarase un exame individual sobre os contidos do temario desenvolvido durante as sesións maxistras onde o alumnado deberá demostrar os coñecementos adquiridos. | 50            |

| Assessment comments  |
|--|
| <p>It is required at least 40% of lab exercises and 40% of the written exam. If these conditions are not met but the final mark (applying the formula) is above 5 then the final mark will be 4 (Fail) out of 10. Thus, an 8 in labs and 3 in exam then the pondered mark is 5.5, but in the academic record of the student it will be specified a 4 (Fail).</p> <p>Failing in June means that there is an opportunity of retake the exam in July, maintaining the lab qualification. In this case it will be required only a 40% in the written exam and a final note over 5.</p> <p>Part time students will be specially considered in order to support his/her work. There will be some additional flexibility and personalized treatment for them.</p> |
