<tr><td align="center">General description</td><td colspan="5">This course is devoted to the study of the basic results and applications of classical subjects in mathematics: Linear Algebra, Euclidean Geometry, Functional Analysis and Complex Variable. The studenst will learn to use these specific mathematical tools, but also they will improve their skills in developing new methods and adquiring new technlolgies, to consult bibliographic references and online resources, to elaborate a memory in a rigourous and sistematic manner, to give lectures to others and collaborate with other colleagues, etc. In general they will develop a sense of scientific and rational thinking, capable to adapt to unexpected situations which may arise in their future practice as an engineer.</td></tr>
</table>

| Contingency plan | In this section, we collect the adaptations that will be carried out in teaching and evaluation, were we faced with a scenario of non-presence due to a new clash of the pandemic. |

1. Modifications to the contents
No changes will be made.

2. Methodologies

*Teaching methodologies that are maintained
Collaborative learning, Seminaries, Supervised projects, Document analysis.

*Teaching methodologies that are modified
Guest lecture/ keynote speech. they will be replaced by virtual videos and videoconferences with students through the Teams platform. They will be recorded in Stream. They will always be held at the official time set by the calendar's classroom.
? Solving problems. They will become virtual sessions about doubts in solving problems. They will always be held at the official time set by the School Board.
? Objective test. If it cannot be done in person, the objective test will be carried out with the online assessment tools that the University makes available to the community.

3. Mechanisms for personalized attention to students
- E-mail: During working hours. To make brief questions and request virtual meetings to solve doubts during supervising hours.
- Moodle: Daily. According to the needs of the students. They have ?thematic forums associated with the modules ?of the subject, to formulate the necessary queries.
- Teams: Weekly single group sessions and interactive teaching groups for the advancement of theoretical and practical content in the time slot assigned to the subject in the faculty classroom calendar.

This dynamic allows a standardized follow-up and adjusted to the learning needs of the students to develop the works of the subject.

4. Modifications in the evaluation

Two possible itineraries are established:
1) Students who have carried out continuous assessment during the course:
a) Methodology: supervised project and problem solving
Qualification weight: 50%
Description: Students who take the continuous assessment tests during the course (face-to-face and / or virtual) will be qualified with the weighted average mark they obtained

b)Methodology: objective test
Qualification weight: 50%
Description: Individual test of assimilation of theoretical-practical knowledge and problem solving, with the possibility of oral defense of any of the proposed problems.

2) Students who did not carry out continuous assessment during the course or renounce to it.
2a) Methodology: objective test
Qualification weight: 50%
Description: Individual test of assimilation of theoretical-practical knowledge.
2b) Methodology: Solving exercises.

Qualification weight: 50%

Description: Resolution of practical problems.

*Evaluation observations: IF any online material was requested, oral defense might be necessary to prove authorship.

5. Modifications to the bibliography or webgraphy No changes will be made. They already have all the materials for the subject Digitized in Moodle as well as various links to electronic books available through the UDC Library to facilitate access to the bibliography for students.

	Study programme competences / results
Code	**Study programme competences / results**
A2	Interpretar e representar correctamente o espazo tridimensional, coñecendo os obxectivos e o emprego de representación gráfica.
A8	Modelizar situacións e resolver problemas con técnicas ou ferramentas físico-matemáticas.
A9	Avaliación cualitativa e cuantitativa de datos e resultados, así como representación e interpretación matemática de resultados obtidos experimentalmente.
B1	Aprender a aprender.
B2	Resolver problemas de xeito efectivo.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B4	Comunicarse de xeito efectivo nun ámbito de traballo.
B5	Traballar de forma autónoma con iniciativa.
B6	Traballar de forma colaboradora.
B7	Comportarse con ética e responsabilidade social como cidadán e como profesional.
B8	Aprender en ámbitos de teleformación.
B9	Capacidade para interpretar, seleccionar e valorar conceptos adquiridos noutras disciplinas do ámbito marítimo, mediante fundamentos físico-matemáticos.
B10	Versatilidade.
B11	Capacidade de adaptación a novas situacións.
B12	Uso das novas tecnoloxías TIC, e de Internet como medio de comunicación e como fonte de información.
B13	Comunicar por escrito e oralmente os coñecementos procedentes da linguaxe científica.
B14	Capacidade de análise e síntese.
B15	Capacidade para adquirir e aplicar coñecementos.
B16	Organizar, planificar e resolver problemas.
B17	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma
B19	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
B22	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
B23	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
B24	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.
C10	Que os estudantes saiban aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos máis amplas (ou multidisciplinares) relacionados coa súa área de estudo

Contents	
Topic	**Sub-topic**
Lesson 1.- Espazos Vectoriais	1.1.- Vector space. Definition. Examples and Properties
	1.2.- Vector subspace.
	1.3.- System of Generators of a Subspace
	1.4.- Linear Independence
	1.5.- Basis of a Vector Space. Finite Dimensional Spaces.
	1.6.- Change of Basis in a Vector Space
	1.7.- Union and Intersection of Subspaces
	1.8.- Sum of Subspaces. Direct sum. Supplementary Subspaces.
	1.9.- Product of Vectorial Spaces
Lesson 2.- Linear Functions. Matrices.	2.1.- Linear Function: Definition, Examples, Properties and Types of Linear Functions.
	2.2.- Kernel and Image of a Linear Function.
	2.3.- Existence and obtention of an Associated Matrix to a Linear Function.
	2.4.- Addition of Linear Functions. Product by a Scalar. Associated Matrices.
	2.5.- Vector Spaces of Matrices
	2.6.- Composition of Linear Functions. Associated Matrix.
	2.7.- Product of Matrices. Ring of Square Matrices
	2.8.- Some Particular Types of Matrices
	2.9.- Transpose Matrix. Symmetric, Antisymmetric and Orthogonal Matrices.
	2.10.- Matrices of Complex Elements.

Lesson 3.- Determinants.	3.0.- Permutations. Class of a Permutation.
	3.1.- Determinant of a Square Matrix. Sarrus Rule.
	3.2.- Properties of Determinants.
	3.3.- Methods for Calculation of Determinants. Cofactor Matrix.
	3.4.- Product of Determinants.
	3.5.- Some Particular Examples of Determinants.
	3.6.- Reverse Matrix.
	3.7.- Rank of a Matrix.
	3.8.- Rank of a System of Vectors
	3.9.- Expression of the Change of Base of a Vectorial Space in shape Matrix
Lesson 4.- Systems of Linear Equations.	4.1.- Definitions. Classification. Matrix notation.
	4.2.- Equivalent systems.
	4.3.- System of Cramer. Rule of Cramer
	4.4.- General System of Linear Equations. Theorem of Rouché-Frobenius
	4.5.- Homogeneous Systems.
	4.6.- Methods of Resolution by Reduction. Gauss' Method.
Lesson 5.- Matrix Diagonalization.	5.1.- Eigenvectors and Eigenvalues. Properties.
	5.2.- Characteristic polynomial. Properties.
	5.3.- Diagonalizable Matrices. Diagonalization.
	5.4.- Diagonalization Of Symmetric Matrices.
Lesson 6.- Affine Space E3. Problems of Incidence and Parallelism.	6.1.- Affine Space Associated to a Vector Space. System of Reference. Coordinates.
	6.2.- Equations of Straight Lines.
	6.3.- Relative positions of Straight Lines.
	6.4.- Equations of a Plane.
	6.5.- Relative positions of Planes. Bundles of Planes.
	6.6.- Relative positions of Straight Lines and Planes.
Lesson 7.- Euclidean Vector Spaces. Scalar product, Vector product. Mixed Product.	7.1.- Scalar product
	7.2.- Determination of a Scalar Product. Gram Matrix.
	7.3.- Euclidean Vector Space. Definition.
	7.4.- Norm of a Vector. Relevant Equalities and Inequalities.
	7.5.- Angle of two Vectors. Orthogonality.
	7.6.- Orthonormal Basis. Expression of the Scalar Product in an Orthonormal Basis.
	7.7.- Euclidean Space E3.
	7.8.- Orientation in E3.
	7.9.- Vector product in R3 . Properties. Analytical expression.
	7.10.- Mixed product. Analytical expression. Geometrical interpretation.
	7.11.- Combined Products.
Lesson 8.- Metric Problems in Euclidean Spaces.	8.1.- Normal equation of a Plane.
	8.2.- Angles between Linear Manifolds in R3: Angle of Two Planes, Angle of Two Straight Lines, Angle of Straight Line and Plane.
	8.3.- Distance between Linear Manifolds in R3: Distance of a Point to a Plane, Distance of a Point to a Straight Line. Distance between two Planes, Distance between Straight Line and Plane. Distance between two Straight Lines. Common Perpendicular to two Straight Lines.
	8.4.- Cylindrical coordinates and Spherical coordinates in R3.

Lesson 9.-Real valued functions of a Real Variable. Continuity.	9.1.- Basic definitions. 9.2.- Functional limits. 9.3.- Continuity. Types of Discontinuity. 9.4.- Properties and Theorems on Continuous Functions.
Lesson 10.- Differentiability and Applications of the Derivatives.	10.1.- Derivative and Differential of a Function in a Point. Geometrical meaning. 10.2.- Properties and Calculation of Derivatives. 10.3.- Derivative function. Successive derivatives. 10.4.- Applications of the Derivatives to the Local Study of a Function: Growth and Decreasing. Maxima and Minima. Concavity and Convexity. Inflection points. 10.5.- Theorems of Rolle and Mean Value Theorem. 10.6.- Rules of L´Hôpital
Lesson 11.- Theorem of Taylor. Applications.	11.1.- Expression of a Polynomial by means of his Derivatives in a Point. 11.2.- Polynomial and Theorem of Taylor. Formulae of Taylor and Mac Laurin. 11.3.- Expression of Lagrange for the Residual. Bounds for the residual. 11.4.- Applications to the Local Study of a Function: Monotonicity. Extremal values. Concavity and Convexity. Inflection points.
Lesson 12.- Graphic representation of Real Valued Functions.	12.1.- Domain and Continuity 12.2.- Symmetries 12.3.- Periodicity. 12.4.- Intersection with the coordinates axis. 12.5.- Use of successive derivatives and applications: Monotonicity. Extremal values. Concavity and Convexity. Inflection points. 12.6.- Asymptotes and Parabolic Branches
Lesson 13.- Sequences and Series.	13.1.- General definitions. Types of Sequences. 13.2.- Practical calculation of Limits 13.3.- General definitions. Main Types of Numerical Series. 13.4.- Properties of the Numerical Series. Criteria of Convergence for Series of Positive Terms. 13.5.- Series of Positive and Negative Terms. Alternated Series.
Lesson 14.- Functional Sequences and Series. Series of powers.	14.1.- General definitions. 14.2.- Series of Powers. Convergence. 14.3.- Series expansions. 14.4.- Series of Taylor and Mac Laurin. 14.5.- Binomial Series. 14.6.- Method of the Undetermined Coefficients.
Lesson 15.- Indefinite integration of Functions of a Real Variable	15.1.- General definitions. Table of Primitives. 15.2.- Immediate integration 15.3.- Integration by Parts 15.4.- Integration of Rational Functions 15.5.- Integration by Replacement or Change of Variable

Lesson 16.- Definite Integration. Applications.	16.1.- General definitions
	16.2.- Properties
	16.3.- Mean Value Theorem. Barrow's Rule.
	16.4.- Evaluation of Definite Integrals.
	16.5.- Improper Integral.
	16.6.- Applications of the Definite Integral
Lesson 17.- Complex Numbers	17.1.- General definitions
	17.2.- Fundamental operations
	17.3.- Powers and Roots
	17.4.- Exponential form of a Complex
	17.5.- Logarithms And Complex Powers.
The development and overcoming of these contents, together with those corresponding to other subjects that include the acquisition of specific competencies of the degree, guarantees the knowledge, comprehension and sufficiency of the competencies contained in Table AII / 2, of the STCW Convention, related to the level of management of chief mates of the Merchant Navy, on ships without gross tonnage limitation and Master up to a maximum of 500 GT.	Table A-II / 2 of the STCW Convention. Mandatory minimum requirements for certification of masters and chief mates on chief on ships of 500 gross tonnage or more.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A2 A8 B1 B2 B3 B4 B15 B22 C10	28	28	56

Objective test	A2 A8 A9 B2 B4 B5 B11 B12 B13 B14 B16 B17 B19 B22 B23 C10	2	0	2
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	**Description**
Guest lecture / keynote speech	Exposition in the classroom of the fundamental concepts.
Collaborative learning	Group work with presentation of the results when appropriate.
Problem solving	In each topic, exercises will be proposed to solve.
Supervised projects	Proposed individual and group projects.
Seminar	Individual and / or very small group tutorships.
Document analysis	Select books and web pages to use
Objective test	Knowledge assessment.

Personalized attention	
Methodologies	**Description**
Problem solving Supervised projects	The students are encouraged to attend in small groups or individually to the professors' office, or by TEAMS, to solve questions that may arise, thus obtaining a more specific guidance, acoording to their specific difficulties. Due to the health situation caused by COVID-19, and following the recommendations of the Center, the attention to students will preferably be held through computer hardware and the Internet (email and meetings by MS Teams), in order to avoid face-to-face interaction in office.

Assessment			
Methodologies	**Competencies / Results**	**Description**	**Qualification**
Problem solving	A2 A8 A9 B2 B5 B6 B10 B11 B12 B13 B15 B16 B17 B19 C10	Resolver problemas.	20
Objective test	A2 A8 A9 B2 B4 B5 B11 B12 B13 B14 B16 B17 B19 B22 B23 C10	Proba para amosar os coñecementos teóricos e prácticos adquiridos.	60
Collaborative learning	A9 B1 B3 B4 B6 B7 B8 B9 B10 B11 B12 B13 B17 B23 B24 C10	Participación en traballos grupais.	5
Supervised projects	A2 A8 A9 B24 B23 B22 B19 B17 B16 B15 B14 B13 B12 B9 B8 B6 B5 B4 B3 B2 B1 C10	Traballos propostos.	15

Assessment comments	

The students participants in the EHEA should attend a minimum of 80% of the lessons, being the continuous assessment of 40% of the final score. The other 60% of the score will be obtained from the partial tests that will take place throughout the term.

The students who have followed the continuous assessment but have not reached the 50% of the score through the partial tests will have a chance to reach it through a final test. This final test will include all topics of the term (the partial tests do not exclude topics)

The students who decide to not take part in the EHEA will be evaluated with an objective test that includes an individual test of assimilation of practical-theoretical knowledge and problem solving.

Those students with recognition of part-time dedication and academic exemption of attendance, as established by the norm that regulates the regime of dedication to the study of undergraduate students in the UDC (Arts 2.3, 3.b, 4.3 e 7.5) (04/05/2017), and want to stay on the path of the EHEA and benefit from continuous assessment, must INDICATE SUCH CONDITION AT THE BEGINNING OF THE COURSE and attend at least 50% of the interactive lectures. In case of not being able to attend these sessions, they should attend tutorials at the proffesor office or by TEAMS, where they will perform equivalent tests.
