| Department | Física e Ciencias da Terra | | | | | |
| Coordinador | Grandal D`Anglade, Aurora | E-mail | aurora.grandal@udc.es | | | |
| Lecturers | Grandal D`Anglade, Aurora Nogueira Lopez, Pedro Fernando | E-mail | aurora.grandal@udc.es pedro.nogueira@udc.es | | | |
| Web | | | | | | |
| General description | Subject based on the review or acquisition of fundamental concepts in the natural sciences, their recent developments and their application to current problems, as an educational resource in Secondary Education and Bachillerato. | | | | | |
| Contingency plan | <p>EPIDEMIC OUTBREAK SCENARIO</p> <p>1. Modifications to the content: The contents will not be modified, but will be adjusted to the limitations imposed by online teaching.</p> <p>Teaching methodologies to be maintained: All. The methodologies will be adapted to a face-to-face style model. This means that interactive and practical teaching sessions will be adapted to online delivery.</p> <p>3. Mechanisms for personalised attention to students: Personalised online attention will be provided, preferably through Microsoft Teams. Moodle and e-mail will also be used.</p> <p>4. Modifications in assessment: none</p> <p>5. Modifications to the bibliography or webgraphy: None</p> | | | | | |

| Study programme competences | |

| Learning outcomes | Study programme competences | Study programme competences |
| | | |

| | | | |
|---|------|-----|--|
| To know the educational and cultural value of the subjects corresponding to the specialisation. | AJ16 | | |
| To be familiar with the contents of the respective courses. | AJ16 | | |
| To Know the contexts and situations in which the different curricular contents are used or applied. | AJ18 | | |
| To Express themselves correctly, both orally and in writing, in the official languages of the Autonomous Community. | | CC1 | |
| Develop for the exercise of an open, educated, critical, committed, democratic and supportive citizenship, capable of analysing reality, diagnosing problems, formulating and implementing solutions based on knowledge and oriented towards the common good. | | CC4 | |
| Critically assess the knowledge, technology and information available to solve the problems they have to face. | | CC6 | |
| Assume as a professional and citizen the importance of lifelong learning. | | CC7 | |
| Value the importance of research, innovation and technological development in the socio-economic and cultural progress of society. | | CC8 | |

| Contents | |
|---|--|
| Topic | Sub-topic |
| Analysis of the thematic blocks of the natural sciences curriculum | Interrelationships |
| The contents of experimental sciences in secondary education and bachillerato | The BOE: the different levels of education |
| Acquisition and/or revision of fundamental and experimental concepts in the area of natural sciences. | Biology: Biomolecules and metabolism. The cell. Levels of organisation. Evolution Physics: mechanics, thermodynamics, electricity and magnetism. Geology: plate tectonics, internal processes, external processes and geological hazards. Chemistry: matter, chemical bonding and intermolecular forces, acid-base and redox reactions. |
| Context and current scientific situations as an educational resource | Clean and renewable energies. Climate change. Viruses and vaccines, health and pseudosciences |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | |
|--------------------------------|--|
| Methodologies | Description |
| Guest lecture / keynote speech | Exposición oral complementada co uso de medios audiovisuais e a introducción de algunas preguntas dirixidas aos estudiantes coa finalidade de transmitir coñecementos e facilitar a sua aprendizaxe |
| Document analysis | Técnica metodolóxica que supón a utilización de documentos audiovisuais e/ou bibliográficos (fragmentos de reportaxes documentais ou películas, noticias de actualidade, paneis gráficos, fotografías, biografías, artigos, textos lexislativos, etc.) relevantes para a temática da materia con actividades específicamente deseñadas para a análise dos mesmos. Pódese empregar como introdución xeral a un tema, como instrumento de aplicación do estudo de casos, para a explicación de procesos que non se poden observar directamente, para a presentación de situacións complexas ou como síntese de contidos de carácter teórico ou práctico. |

| | |
|------------------------|---|
| Objective test | Proba escrita utilizada para a avaliación da aprendizaxe, cuxo trazo distintivo é a posibilidade de determinar se as respuestas dadas son ou non correctas. Constitúe un instrumento de medida, elaborado rigorosamente, que permite avaliar coñecementos, capacidades, destrezas, rendemento, aptitudes, actitudes, intelixencia, etc. É de aplicación tanto para a avaliación diagnóstica, formativa como sumativa. |
| Collaborative learning | Conxunto de procedementos de ensino-aprendizaxe guiados de forma presencial e/ou apoiados con tecnoloxías da información e as comunicacóns, que se basean na organización da clase en pequenos grupos nos que o alumnado traballa convxuntamente na resolución de tarefas asignadas polo profesorado para optimizar a súa propia aprendizaxe e a dos outros membros do grupo. |

| Personalized attention | |
|---|--|
| Methodologies | Description |
| Collaborative learning Document analysis | The student's work in each of the proposed methodologies will be attended by the teacher on an individual and personalised basis. Tutorials (personal, via Teams or e-mail) are conceived as an activity of the utmost importance in this subject. |

Assessment comments

Attendance at the face-to-face sessions is compulsory, even in the event that these sessions have to be carried out telematically (Teams).

At the first opportunity

- The activities and work carried out during the course and a written test will be assessed. The grade will be the weighted average of the marks obtained in each part, and a pass mark (5 out of 10) must be obtained in each part.
- A minimum attendance of 80% of the face-to-face sessions is an essential requirement. If this percentage is not reached, the activities/assignments will not be evaluated and the grade will be a failing grade.

In the second opportunity

- Students who attended at least 80% of the sessions will have to repeat the parts not passed (activities/works and/or written test).
- Students who had not reached the required percentage of attendance to the face-to-face sessions will have to present, individually, all the activities/assignments proposed throughout the course.
- In any case, the grade will be the weighted average of the marks obtained in each part, and a pass mark (5 out of 10) must be obtained in each of them.

Students with recognition of part-time dedication and academic dispensation of exemption from attendance:

- They must inform the professor during the first week of class.
- At the first opportunity, in addition to the written test, they will have to carry out, individually, all the activities/assignments proposed throughout the course and hand them in on the dates established by the teaching staff.

The final mark will be the weighted average of the marks for the activities and work carried out during the course and the mark for the written test, each part of which must be passed (5 out of 10).

- At the second opportunity, they must repeat the parts not passed (activities/works and/or written test).

Recommendations

Subjects that it is recommended to have taken before

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

Other comments

It is recommended that assignments in this subject be sent electronically, and if this is not possible, not to use plastic, to choose double-sided printing, to use recycled paper and to avoid printing drafts. The sustainable use of resources and the prevention of negative impacts on the natural environment should be taken into account. The importance of ethical principles related to sustainability values should be taken into account in personal and professional behaviour. The gender perspective will be taken into account in this subject (non-sexist language will be used, bibliography of authors of both sexes will be used, the intervention of male and female students in class will be encouraged...). Work will be done to identify and modify sexist prejudices and attitudes, and the environment will be influenced in order to modify them and promote values of respect and equality. The full integration of students who, for physical, sensory, mental or socio-cultural reasons, experience difficulties in gaining suitable, equal and beneficial access to university life will be facilitated.
