| General description | This subject provides a coherent and comprehensive perspective of the characteristics of the population and its dynamics, | | | of the population and its dynamics, | |
| | and provides an insight into the main demographic challenges - particularly population aging - facing European societies. | | | | aging - facing European societies. |
| | The analysis of the composition of the population by sex and age and its graphical representation will be addressed. | | | | |
| | Students will learn how the different demographic variables (mortality, fertility, migrations) condition the structure of the | | | | |
| | population by sex and age, which will allow them to understand the process of population aging and the changes in the age | | | | |
| | structure at advanced ages. The student will become familiar with the statistical and mathematical techniques necessary | | | | thematical techniques necessary |
| | for the study of the population. Finally, the retirement age will be analyzed from a demographic perspective, and the | | | | graphic perspective, and the |
| | pension system in Spain will be p | oresented. | | | |

Contingency plan

1. Modifications to the contents

No changes will be made

- 2. Methodologies
- * Teaching methodologies to be maintained
- Master session
- Objective test
- * Teaching methodologies that change

The master and practical classes through ICT will be taught virtually through the Microsoft Teams platform. The objective test would be carried out using Moodle. Personalized attention to the resolution of doubts will be provided through Microsoft Teams, Moodle, and by e-mail.

- 3. Mechanisms of personalized attention to the students
- E-mail: daily. It is used to make consultations and request virtual meetings to solve doubts.
- Moodle: daily. According to students' needs. They have "thematic forums associated with the topics" of the subject, to formulate the necessary consultations.
- Teams: 1 weekly group session for the advancement of the theoretical contents in the time slot assigned to the subject in the faculty's classroom calendar.
- In the event that students have problems connecting to the Internet, the telephone line can be used.
- 4. Modifications in the evaluation

The percentages of the evaluation, specified in the didactic guide, are maintained by taking the exam virtually using the Moodle tool.

* Evaluation observations:

They remain the same as in the didactic guide, except that:

- References to the computation of attendance, which will be made with respect to the sessions that there were face-to-face until the time when the face-to-face activity was suspended, and from then on the attendance to the virtual classes will be considered. in the schedule previously established with the students.
- If necessary, the July opportunity will be subject to the same criteria as the first opportunity.
- 5. Modifications to the bibliography or webography

No changes will be made. They already have all the work materials digitized in Moodle.

| | Study programme competences / results |
|------|---|
| Code | Study programme competences / results |
| A1 | To be able to recognize the main pathologies and geriatric syndromes through the application of new and innovative work methodologies |
| | adapted to the field of gerontology |
| A2 | Be able to apply the method of comprehensive geriatric and gerontological assessment in order to establish the bases for implementing |
| | the individualized care plan |
| A7 | Acquire advanced knowledge and demonstrating, in a context of scientific and technological or highly specialized research, a detailed and |
| | informed understanding of the theoretical and practical aspects and the methodology of work in the field of Gerontology |
| A8 | Know how to apply and integrate the knowledge acquired, the understanding of these, its scientific foundation and its problem-solving |
| | capabilities in social and socio-sanitary environments and defined in an imprecise way, including multidisciplinary contexts both |
| | researchers and professionals in the field of gerontology |
| B1 | Possess and understand knowledge that provides a basis or opportunity to be original in the development and/or application of ideas, |
| | often in a research context |
| B2 | That students know how to apply the knowledge acquired and their ability to solving problems in new or little-known environments within |
| | broader (or multidisciplinary) contexts related to gerontology and geriatrics |
| B4 | That students know how to communicate their conclusions ? and the knowledge and ultimate reasons that support them ? to specialized |
| | and non-specialized audiences in a clear and unambiguous way |
| | |

| B5 | That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous |
|----|--|
| C2 | Mastering oral and written expression in a foreign language |
| C4 | Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective |

| | Methodologies |
|-----------------|--|
| Methodologies | Description |
| ICT practicals | Interactive laboratory classes: will take place in the computer classroom or using the students' personal computers. In these |
| | classes the students will have to carry out practical cases in which they will use the tools described in the theoretical classes. |
| | Students will have to analyze and comment on aspects related to demography and aging. |
| Objective test | Multiple-choice test on the contents of the subject matter explained in the lectures. |
| Guest lecture / | Lectures: explanation of the theoretical contents of the subject. These classes will be supported by the use of PowerPoint |
| keynote speech | presentations and the analysis of institutional web pages where statistical information for the analysis of the population can be |
| | found. |

| | Personalized attention |
|----------------|--|
| Methodologies | Description |
| ICT practicals | Since this is a subject with a relevant practical part, in which passing is linked to the correct use of the information received in |
| | the presentation of research work, the student's personal work is a fundamental part of the evaluation of the same, assuming a |
| | number of hours (minimum) similar to the classroom hours. The personalized attention to the student will help to complete in |
| | an individualized way his training, mainly in the search of information referred to demographic data of the population, the |
| | realization of the activities proposed during the course, as well as the examination of the subject. |
| | |
| | |

| | B5 C1 C2 C4 | | |

Assessment comments

4/5

In order to pass the course it is necessary to have passed an objective test.

Other comments

Recommendations for the study of the course:Regular attendance to classes.Completion of the laboratory practices.Daily study of the materials taught and the basic bibliography. Consultation of the recommended complementary bibliography. Participation and active discussion in the activities organized.Performance of the objective tests that will be carried out.Beginning in the use of the Microsoft Excel spreadsheet.In order to contribute to the achievement of an immediate sustainable environment and fulfill the strategic objective 2 of the "IV Action Plan of the FCS Green Campus Program (2020-2022)", the documentary work carried out in this area:(a) Most will be requested in virtual format and computer support.b) If on paper:-No plastics will be used.- Double-sided printing will be used.- Recycled paper shall be used.- Drafts shall be avoided.
