	Methodologies	
Methodologies Description		
Guest lecture /	Oral presentation complemented with the use of audiovisual media and the introduction of some questions addressed to	
keynote speech	students, in order to transmit knowledge and facilitate learning.	
Objective test	Written test used for the evaluation of learning that can combine different types of questions: multiple choice with error penalty	
	(ask a question in the form of a direct question or incomplete statement with several options or answer alternatives of which	
	only one is valid), essay (questions of a certain length in writing in which it is valued that the expected answer is given,	
	combined with the ability to reason (argue, relate, etc.). It can also be constructed with a single type of any of these questions	
Problem solving	Solving practical questions in application of the theoretical knowledge developed.	

 Personalized attention

 Methodologies
 Description

Problem solving	Aimed at reinforcing certain aspects of students' autonomous learning by monitoring and supervising different programmed
Objective test	activities.
Guest lecture /	
keynote speech	The tutorials are individual, so prior contact with the teacher is necessary to reserve the corresponding time slot.

Assessment comments

1st Opportunity Evaluation. In the development of the practical part (teamworks / projects) (mark of 40%), the following will be evaluated: application of the theoretical bases, quality of presentation, precision and clarity of presentation and quality of the answers, primary and secondary sources used and bibliographic review. For the evaluation of the theoretical part, a multiple choice test (multiple object test) (mark of 50%) with several answer alternatives will be used, where errors will reduce the score to avoid the "lottery effect". The formula is NOTE = (correct answers x 1) - (errors / k-1), with k = number of answer options. Net points earned are transferred to a rating on a scale of 0 to 10.Part-time dedication and academic exemption (attendance exemption): in the case of students with part-time dedication and academic exemption of attendance exemption, the Moodle and MS Teams platforms will be used, as well as email as the main communication vehicle . content management, tutorials and homework delivery. At the beginning of the course, a specific calendar of dates compatible with their dedication will be agreed, but they will have the same obligation to carry out activities and attend any type of evaluation test as full-time students. Except for the dates approved by the Faculty Council in which the objective test corresponds, for the rest of the tests a specific calendar of dates compatible with their dedication will be agreed at the beginning of the course. The evaluation process for the 2nd opportunity is exactly the same as for the 1st opportunity: the practical grade (obtained in the works / projects) is saved and @alumn @ will take a new multiple choice exam, with identical characteristics to those described above. In the event of an extraordinary call, the evaluation will only be with multiple choice tests (multiple choice test) (mark 100%) with several answer alternatives, where errors will subtract score based on the formula NET POINTS = (correct answers x 1) - (errors / k-1) with k = number of answer options. Net points earned are transferred to qualification on a scale of 0 to 10. The student who, being enrolled, has not participated in the different evaluation activities (continuous/practical and/or exam/test) established for the academic year will be considered as ?Not presented? (NP).PLAGIARISM/COPY. The fraudulent performance of the tests or evaluation

activities will directly imply the qualification of failure (0) in the matter

in the corresponding call, thus invalidating any qualification obtained in all

the evaluation activities for the extraordinary call.

To help achieve an immediate sustained environment and meet the objective of & nbsp; "Healthy and sustainable environmental and social teaching
and research", the delivery of documentary work in this area will be requested in virtual format and / or computer support (delivery will be made via
moodle or email, in digital format without the need to print them). If it is necessary to make them on paper: plastics will not be used, double-sided prints
will be used, recycled paper will be used, the printing of drafts will be avoided and the importance of ethical principles related to the values ??of
sustainability in personal and professional behaviors should be taken into account. The gender perspective in the subject, in the language, in the

sustainability in personal and professional behaviors should be taken into account. The gender perspective in the subject, in the language, in the interventions, in the identification, in modification and correction of sexist prejudices and / or gender discrimination will be applied. The full integration of students / teachers with functional diversity will be facilitated.
