General description	Supply chain management refers multiple organizations that effectiv quality and cost requested by the	vely produce, transform, a			
	This course introduces the basic theoretical concepts and practical methodologies that allow solving problems in the fashion supply chain management.				

Contingency plan	1. Modifications to the contents
	- No modifications are made.
	2. Methodologies
	*Teaching methodologies that are maintained
	- All those indicated in the teaching guide, that will be carried out in a non presential way through the tools available at the
	UDC.
	*Teaching methodologies that are modified
	- No modifications are made.
	3. Mechanisms for personalized attention to students:
	- Email: channel that students can use to pose questions, request virtual tutoring aimed at solving doubts, and monitor
	supervised projects.
	- Virtual campus: this channel will be used to make the materials (i.e. presentations, case studies, exercises) available to
	students on a weekly basis and to request the delivery of activities -according to the scheduled delivery schedule There
	will be a more general forum, which will be used as the main channel of communication between the instructors and the
	students. Besides, the students will have a more specific forum for posing their questions and doubts regarding the
	contents of the course. Students can use this personalized attention mechanism daily, according to their needs.
	- Microsoft Teams: keynote speeches and interactive sessions will be take place through this platfrom every week aimed at
	developing the theoretical content and the planned activities; sessions that will be take place in the time slot assigned to
	the course in the intial calendar set by the Faculty. Follow-up and support will also be carried out through this channel,
	carrying out the "supervised work", as well as establishing tutoring on demand of the students.
	4. Modifications in the evaluation
	- The evaluation system established in the teaching guide will not be modifed, since the methodologies that will be
	assessded would be carried out in a non-face-to-face way.
	*Evaluation choosystiana
	*Evaluation observations:
	- Those indicated in the teaching guide.
	5. Modifications to the bibliography or webgraphy
	- No changes are made. The students will have the class materials (i.e. presentations, case studies and exercises) in digital
	form in the virtual campus. Likewise, the sources of information in the teaching guide already contain some resources that
	students can access for free from the internet.

	Study programme competences / results
Code	Study programme competences / results
A3	To develop competencies for interpersonal relations and interaction with external and internal stakeholders (customers, suppliers, media,
	partners?)
A9	To master the logistics process of a fashion firm from a global perspective, from procurement to manufacturing and transportation, with a
	special focus on the typical textile industry processes: selection of materials and fabrics, patternmaking, manufacturing, etc, ?
A13	To know the impact of technology on the different processes of the textile industry
B1	That students demonstrate that they acquired and understood knowledge in a study area that originates from general secondary education
	and that can be found at a level that, though usually supported by advanced textbooks, also includes aspects implying knowledge from the
	avantgarde of its field of study

B2	That students know how to apply their knowledge to their job or vocation in a professional form, and have the competencies that are
	usually demonstrated through elaboration and advocacy of arguments and problem resolution within their field of study
B3	That students have the capacity to collect and interpret relevant data (normally within their field of study) in order to issue judgements that
	include a reflection upon relevant topics in the social, scientific or ethical realm
B4	That students may convey information, ideas, problems and solution to the public, both specialized and not
B5	That students develop those learning skills that are needed to undertake ulterior studies with a high degree of autonomy
B8	Capacity to plan, organize and manage resources and operations
B9	Capacity to analyse, diagnose and take decisions
C2	Mastering oral and written expression in a foreign language.
C3	Using ICT in working contexts and lifelong learning.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable
	environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.
C9	Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and
	accomplishing them.

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies
Methodologies	Description
Problem solving	Resolution of problems of a theoretical and practical nature.
ICT practicals	Solving practical problems with a computer.
Supervised projects	Conducting a group project and doing a final presentation of it. The content and characteristics of this project will be detailed a
	the end of the first semester.
Mixed	Mid-term exam and final exam, which will combine different kind of questions (i.e. short or long-answers questions, practical
objective/subjective	exercises, objective test questions).
test	
Seminar	Seminars with experienced professionals, whenever possible.
Case study	Resolution, individually or in group, of the proposed cases. These cases will be detailed along the course, according to the
	workplan.
Directed discussion	Through this dynamic different topics will be addressed, aimed at making the students think about different issues of the
	course and adopt a critical position.
Online forum	There will be two online forums; namely:
	- Online discussion forum: a channel that students can use to propose debates or contribute to them.
	- Online learning forum: a channel that students can use as a space for exchanging and reflecting about their learning and for
	proposing new activities.
Oral presentation	Oral presentation, individually or in groups, of the activities done in the classroom or the case studies that must be submitted.
Workbook	Readings on different topics aimed at addressing or deepening on the issues studied in the classroom.
Guest lecture /	Presentation of the contents that are part of the theoretical framework of the subject through oral presentations, guided by the
keynote speech	use of presentation files, audiovisual media and the introduction of questions addressed to students in order to favor learning
	and the construction of knowledge.

Personalized attention

Methodologies

Description

Supervised projects	The personalized attention described will be developed mainly around the supervised project, and it is conceived as personal
Mixed	work time with the instructors of the course for the attention and follow-up of the project carried out by each of the working
objective/subjective	groups. The attendance of the students to these meetings is recommended. The specific form and times in which they will take
test	place will be communicated throughout the course according to the work plan of the course, considering that the first meeting
Case study	with the working groups will probably take place at the beginning of the second semester. However, during the course the
Problem solving	students can use the tutorial time to clarify doubts and questions about the course.
ICT practicals	
	The students with recognition of part-time dedication, according to the "Norm that regulates the regime of dedication to the
	study of the students of Degree in the UDC" (Arts. 3.b and 4.5) will carry out their activities with the attendance and
	participation in the dynamics that are included in the sections of "Planning" and "Personalized attention", through the work
	groups that will be assigned. The activity will be carried out according to the observations of assessment on the flexibility of
	attendance-participation and the requirements to pass the course.

		Assessment	
Methodologies	Competencies / Description		Qualification
	Results		
Supervised projects	A3 A9 A13 B1 B2 B3	Assessment of the written report and the oral presentation of the proposed group	20
	B4 B5 B8 B9 C2 C3	project.	
	C7 C8 C9		
		This assessment will be carried out according to criteria such as mastery of specific	
		content, written expression and formal presentation, information management,	
		presentation	
Mixed	A3 A9 A13 B1 B2 B3	A mid-term exam (15%) and a final exam (15%) on the contents of the course.	30
objective/subjective	B4 B5 B8 B9 C2 C3		
test	C8 C9	The partial exam is not compulsory, so the students who decide not to attend it, they	
		will have to attend the final exam, that will have a weight of 30% in the final grade of	
		the course. Same criteria is valid for those students who fail the partial exam.	
Case study	A3 A9 A13 B1 B2 B3	Assesment of the case studies proposed by the instructor.	10
	B4 B5 B8 B9 C2 C3		
	C7 C8 C9		
Guest lecture /	A3 A9 A13 B1 B2 B3	Attendance and active participation in the guest lectures and in the activities carried	10
keynote speech	B5 B8 B9 C3 C8 C9	out in the interactive sessions will be considered (e.g. participation in debates or	
		directed discussions in the classroom, resolution of activities, answer to questions	
		formulated). Short questionnaires might also be carried out, without prior notice, on	
		the contents seen at the end of any of some of the guest lectures.	
ICT practicals	A9 A13 B1 B2 B3 B5	At the end of the course the students will need to complete a ICT practical/exam	30
	B8 B9 C3 C8 C9	covering the different issues studied in the ICT practicals done in class.	

Assessment comments

Assessment criteria

Second opportunity

In order to pass this course, both in the first and the second opportunity, it will be necessary to obtain a minimum score of 4 points out of 10 in the mixed objective/subjective test, the ICT practicals, and the supervised project. If this requirement is not met, the final qualification will be "Fail", even when the average of all the activities that are part of the assessment will give a grade equal to or greater than 5 points out of 10.

If a student who has released or passed a part of the course (e.g., mid-term exam) does not manage to pass the course as a whole on the official dates of the exams of the first and second opportunity, his/her final grade will be "Fail". In the following academic year, these students might keep the grade of those tests that they have passed (as long as the grade obtained was equal to or greater than 5 points out of 10), if they wish, and as long as they inform the instructors of the course of their decision in the first two weeks of classes. This condition will only apply in the following academic year; from there onwards, the grades will not be kept.

Early December call

If there are students who want to take the early December call (Art. 19 "Standards for evaluation, review and claim of qualifications for undergraduate and master's degree studies"), given that this course is annual, those students will only have to take the mixed objective/subjective test (40% of the grade), the ICT practicas (40% of the grade) and the supervised project (20% of the grade). The supervised project must be done individually. In order to pass the course, a final grade equal to or greater than 5 points out of 10 must be obtained, as long as the students have obtained a score equal to or greater than 4 points out of 10 in each of the methodologies subjected to assessment. No grade

The students who do not attend the final exam that will take place on the date established in the faculty's official exam calendar will be graded as "No presentado" (i.e., no grade). This criterion will apply both in the first and in the second assessment opportunity, as well as in the early December call. Students with recognition of part-time dedication and academic exemption waiver

The students with recognition of part-time dedication and academic exemption waiver must inform the instructors of the course at the beginning of the academic year, in order to establish a plan and calendar of activities. The assessment system will be the following one: mixed objective/subjective test (30%), ICT practicals (30%), supervised projects (20%), and case study (20%). The supervised project must be done in group. Additional information

Fraudulent behavior in any of the methodologies subject to assessment will result in the grade of "Fail (0)" in the final assessment. It is forbidden to access the examination room with any device allowing for data transmission and/or warehousing (e.g., mobile phones, smart watches...) when any of the assessment test is taking place.

 Other comments

 It is recommended the revision and monitoring of the course through the virtual campus, where the materials used in class will uploaded and the activities to be carried out will be reported.Given the impossibility of using the computer labs during the interactive classes, so as to be able to carry out the planned activities. Students must install the Office 365 package -if they do not have it, the university allows its free installation

because during the interactive sessions the Microsoft Excel spreadsheet software will be used. In order to meet the objective of action number 5: "Healthy and environmentally and socially sustainable teaching and research" of the "Campus Verde Ferrol Action Plan", it will be encouraged, to the extent possible, the virtual delivery of reports through the virtual campus, without the need to print them; and if not possible, it will be recommended to print using recycled paper, double-sided, and avoiding the use of plastic materials.

(*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
