

Teaching Guide						
Identifying Data				2021/22		
Subject (*)	Website Design and Management		Code	710G04028		
Study programme	Grao en Xestión Dixital de Información e Documentación					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	2nd four-month period	Third	Optional	6		
Language	Spanish					
Teaching method	Hybrid					
Prerequisites						
Department	Ciencias da Computación e Tecnoloxías da Información					
Coordinador	Rodriguez Luaces, Miguel	E-mail	miguel.luaces@udc.es			
Lecturers	Cortiñas Álvarez, Alejandro Rodriguez Luaces, Miguel	E-mail	alejandro.cortinas@udc.es miguel.luaces@udc.es			
Web						
General description	The aim of this subject is to know how to build websites for different types of organizations					
Contingency plan	<ol style="list-style-type: none">1. Modifications to the contents2. Methodologies *Teaching methodologies that are maintained*Teaching methodologies that are modified3. Mechanisms for personalized attention to students4. Modifications in the evaluation *Evaluation observations:5. Modifications to the bibliography or webgraphy					

Study programme competences	
Code	Study programme competences
A1	CE1 - Know and understand the theoretical and methodological principles of information and documentation management to apply them in their professional activity
A8	CE8 - Master the different methods of representation of data, information and knowledge that ensure efficient recovery
A10	CE10 - Design computer tools for representation and retrieval of information from the user's perspective
A13	CE13 - Know and master the techniques and regulations for the creation and authentication, meeting, selection, organization, representation, preservation, recovery, access, dissemination and exchange, and evaluation of resources and information services
A19	CE19 - Determine and apply methods, measures and techniques designed to order, protect, preserve and restore data, information and documents of different nature
A20	CE20 - Master the bases to develop research activities using multidisciplinary methods and principles
A22	CE22 - Acquire computational skills and management of new ICT
B1	CB1 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context
B2	CB2 - Apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study
B3	CB3 - Be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments

B4	CB4 - Know how to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized audiences in a clear and unambiguous way
B5	CB5 - Possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous
B6	CG1 - Capacity for cooperation, teamwork and collaborative learning
B7	CG2 - Capacity for reflection and critical reasoning
B8	CG3 - Capacity for planning, organization and management of resources, information and operations
B9	CG4 - Capacity for analysis, diagnosis and decision making
B10	CG5 - Ability to work in an international and global context
B11	CG6 - Ability to understand the importance, value and function of the Digital Information and Documentation Management in the current ICT society
C1	CT1 - Express correctly, both orally and in writing, in the official languages ??of the autonomous community
C2	CT2 - Use the basic tools of information and communication technologies (ICT) necessary for the exercise of their profession and for learning throughout their lives
C3	CT3 - Develop oneself for the exercise of a citizenship that respects democratic culture, human rights and the gender perspective
C4	CT4 - Understand the importance of the entrepreneurial culture and know the means available to entrepreneurs
C5	CT5 - Acquire skills for life and habits, routines and healthy lifestyles
C6	CT6 - Develop the ability to work in interdisciplinary or transdisciplinary teams, to offer proposals that contribute to a sustainable environmental, economic, political and social development
C7	CT7 - Assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society
C8	CT8 - Have the ability to manage time and resources: develop plans, prioritize activities, identify criticisms, establish deadlines and comply with them

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Exposición oral complementada co uso de medios audiovisuais e a introdución de algunas preguntas dirixidas aos estudiantes, coa finalidade de transmitir coñecementos e facilitar a aprendizaxe. A clase maxistral é tamén coñecida como ?conferencia?, ?método expositivo? ou ?lección maxistral?. Esta última modalidade adóitase reservar a un tipo especial de lección impartida por un profesor en ocasións especiais, cun contido que supón unha elaboración orixinal e baseada no uso case exclusivo da palabra como vía de transmisión da información á audiencia.
Supervised projects	Metodoloxía deseñada para promover a aprendizaxe autónoma dos estudiantes, baixo a tutela do profesor e en escenarios variados (académicos e profesionais). Está referida prioritariamente á aprendizaxe do ?como facer as cousas?. Constitúe unha opción baseada na asunción polos estudiantes da responsabilidade pola súa propia aprendizaxe. Este sistema de ensino baséase en dous elementos básicos: a aprendizaxe independente do estudiantado e o seguimento desa aprendizaxe polo profesor-titor.
ICT practicals	Metodoloxía que permite ao alumnado aprender de forma efectiva, a través de actividades de carácter práctico (demostracións, simulacións, etc.) a teoría dun ámbito de coñecemento, mediante a utilización das tecnoloxías da información e as comunicacións. As TIC supoñen un excelente soporte e canle para o tratamiento da información e aplicación práctica de coñecementos, facilitando a aprendizaxe e o desenvolvemento de habilidades por parte do alumnado.
Objective test	Proba escrita utilizada para a avaliação da aprendizaxe, cuxo trazo distintivo é a posibilidade de determinar se as respuestas dadas son ou non correctas. Constitúe un instrumento de medida, elaborado rigorosamente, que permite avaliar coñecementos, capacidades, destrezas, rendemento, aptitudes, actitudes, intelixencia, etc. É de aplicación tanto para a avaliação diagnóstica, formativa como sumativa. A Proba obxectiva pode combinar distintos tipos de preguntas: preguntas de resposta múltiple, de ordenación, de respuesta breve, de discriminación, de completar e/ou de asociación. Tamén se pode construír con un só tipo dalgúnha destas preguntas.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	Se estima que entre o alumnado haberá diferencias notables tanto en canto á sua familiarización con conceptos e termos informáticos, como en canta ás habilidades para o manexo de ferramentas informáticas. Por iso, prevese desenvolver unha atención personalizada para as prácticas a través de TIC e para os traballos tutelados. A atención personalizada desenvolverase de forma individual preferentemente mediante a realización de tutorías mediante ferramentas informáticas e Internet (correo electrónico, Moodle o Teams).
Supervised projects	
ICT practicals	

Assessment			
Methodologies	Competencies	Description	Qualification
Supervised projects	A1 A8 A10 A13 A19 A20 A22 B1 B2 B3 B4 B5 B6 B7 B8 B9 B10 B11 C1 C2 C3 C4 C5 C6 C7 C8	Avaliarase a calidade dos traballos realizados.	40
ICT practicals	A1 A8 A10 A13 A19 A20 A22 B1 B2 B3 B4 B5 B6 B7 B8 B9 B10 B11 C1 C2 C3 C4 C5 C6 C7 C8	Avaliarase a solución aplicada polos estudiantes ao problema proposto e a interacción entre os membros do grupo.	20
