	Study programme competences / results
Code	Study programme competences / results
A2	Identify and evaluate the different types of complex materials
A5	Understanding the relationships between structure and properties of materials
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or
	multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non
	specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B13	Analysis-oriented attitude
B14	Ability to find and manage the information
B17	Analyze and decompose processes
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies		
Methodologies	Description		
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in each theme and consolidate their		
	acquired knowledge and capabilities. These activities should aslo help the students learn and improve their capabilities in		
	literature survey.		
Objective test	Final exam, at the end of the course, that will help evaluation of the knowledge, competencies and global vision about		
	materials acquired by the students.		
Guest lecture /	Presentation made by the teacher, on a schematic basis, focusing on the main topics of each theme and covering both		
keynote speech	theoretical and practical issues.		

Personalized attention		
Methodologies	Description	
Supervised projects	The personalized attention to students, also those with academic dispensation, understood as a support in the	
Objective test	teaching-learning process, will take place in the hours of tutoring of the teacher and/or at the most convenient times for the	
Guest lecture /	students, by prior agreement with the teacher.	
keynote speech		

Assessment			
Methodologies	Competencies /	Description	Qualification
	Results		
Supervised projects	A2 A5 B2 B4 B8 B13	Presentation (oral and written) of the tutored work.	60
	B14 B17 C2 C7 C8		
Objective test	A2 A5 B2 B4 B8 B13	Examination or objective test.	40
	B17 C2		

Assessment comments

The so-called "second chance" is understood as a new opportunity to take the mixed test. However, if necessary, the teaching staff may include a second part on aspects related to the supervised work. The percentages of the different contributions will be the same as in the "first opportunity". The teaching-learning process, including assessment, refers to one academic year (this implies that each year a new process begins, including all assessment activities and procedures).

In the case of students with academic dispensation, in order to pass the subject they must, like their classmates, take both the objective test and the corresponding tutored work, which the teacher may adapt to better suit their particular circumstances, maintaining the percentages.

It is reminded that the fraudulent completion of any activity or test required for the evaluation of the subject will be sanctioned with a failure as stated in the Student Statute of the UDC (article 35, point 3, https://www.udc.es/es/normativa/estudantes/estatuto_estudantado/index.html)

Other comments

1. The delivery of thedocumentary works that are made in this matter:1.1. It will be requested in virtual format and/or computer support.1.2. It will be done through Moodle, in digital format without the need to print them.1.3. If it is done on paper- No plastic shall be used.- Double-sided printing will be used.- Recycled paper shall be used.- The printing of draftsshall be avoided.
