	Study programme competences / results
Code	Study programme competences / results

A1	Set up and conduct tests using the techniques of thermal analysis and rheology most appropriate in each case, within the scope of
	complex materials
A6	Understanding the importance of the environment and of the research focused on the elimination/minimization of final or process wastes
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research
	context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or
	multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non
	specialized audience in a clear and unambiguous way
B7	Solving problems effectively
B8	Applying a critical, logical and creative way of thinking
B11	Behave with ethics and social responsibility as a citizen and as a professional
B14	Ability to find and manage the information
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
B22	Understand the importance of protecting the environment
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C4	Developing for the exercise of an open, educated, critical, committed, democratic and solidary citicenship, able to analyze reality, diagnose
	problems, formulate and implement solutions based on knowledge and oriented to the common good.
C7	To assume as a professional and citizen the importance of learning throughout life.
C9	Appreciate the importance of research in environmental protection

	Contents
Topic	Sub-topic
Analysis of the combustion gases by TG-FTIR	Degradation in oxidizing and inert atmosphere
	Products of combustion
	Component Identification by FTIR
Evaluation of the absorption of harmful gases by TG	Characteristics of absorbent substrates
	Influence of absortion temperature
	Influence of concentration and gas flow
	Setting up an experiment to evaluate the absorption of gases
Rheology of fuel marine waste	General characteristics of fuel marine waste
	Rheological properties of interest
	Thermal and rheological characterization
Substitution of synthetic polymers by biopolymers	Methods for obtaining biopolymers
	Main biopolymers
	Compared to synthetic polymers
	Possibilities and prospects of replacing synthetic polymers for biopolymers

	Methodologies
Methodologies	Description
Guest lecture /	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical
keynote speech	issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics pesented in the program and consolidate their
	acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in
	literature survey.
Objective test	Exam that will help to evaluate the knowledge and competencies acquired by the students.

## Personalized attention

Methodologies	Description
Objective test	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours
Guest lecture /	of tutoring of the professor.
keynote speech	
Laboratory practice	No academic dispensation is accepted.
Supervised projects	

Assessment			
Methodologies	Competencies /	Description	Qualification
	Results		
Objective test	A6 B4 B8 C2 C9	Examination or objective test.	20
Guest lecture /	A6 B1 B11 B21 B22	Continuous assessment through monitoring of student work in the classroom,	10
keynote speech	C4 C9	laboratory and / or tutorials.	
Laboratory practice	A1 B2 B7 C7	Continuous assessment through monitoring of student work in the classroom,	10
		laboratory and / or tutorials.	
Supervised projects	A1 B2 B4 B7 B8 B11	Presentation (oral and written) of the supervised work.	60
	B14 B21 C2		

Assessment comments
No academic dispensation is accepted.
The evaluation criteria for the second opportunity and the extraordinary opportunity are the same as for the first opportunity.
