| General description | <p>The subject of Metrology and Quality Control deals with the techniques necessary for the planning and implementation of quality control in manufacturing processes. First introduced on the concepts fundamental measurement to characterize the variables that will later be used in quality control.</p> <p>Later, it focuses on the close relationship between the variability of the manufacturing parameters and quality end product, for day after studying such variability from a statistical viewpoint.</p> <p>Finally, describes the technical quality control based on statistics, which is known as statistical process control. Such techniques are aimed at finding a balance between the costs of quality control, cope with the costs of making a potential insufficient control.</p> |        |  |           |  |  |

| Study programme competences |   |
|-----------------------------|---|
| Code                        | Study programme competences   |
| A26                         | TEM8 - Coñecemento aplicado de sistemas e procesos de fabricación, metroloxía e control de calidade.  |
| B1                          | CB01 - Que os estudantes demostren posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral e adoita encontrarse a un nivel que, áinda que se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vanguarda do seu campo de estudo |
| B2                          | CB02 - Que os estudantes saibam aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo   |
| B4                          | CB04 - Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como leigo  |
| B5                          | CB05 - Que os estudantes desenvolvan aquellas habilidades de aprendizaxe necesarias para emprenderen estudos posteriores cun alto grao de autonomía   |
| B7                          | B5 - Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas  |

|    |   |
|----|---|
| B9 | B8 - Adquirir unha formación metodolóxica que garanta o desenvolvemento de proxectos de investigación (de carácter cuantitativo e/ou cualitativo) cunha finalidade estratéxica e que contribúan a situarnos na vanguarda do coñecemento                     |
| C1 | C3 - Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.  |
| C2 | C4 - Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común. |
| C4 | C6 - Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.  |
| C5 | C7 - Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.   |

| Learning outcomes   |  |                             |                                  |

| Methodologies                   |   |
|---------------------------------|---|
| Methodologies                   | Description   |
| Guest lecture / keynote speech  | Lectures which will develop the course content  |
| Problem solving                 | Interactive classes in which they solve exercises representative of content covered in lectures.  |
| ICT practicals                  | Methodology that allows students to learn through practical activities (demonstrations, simulations, etc.) the theory of a field of knowledge, through the use of information and communication technologies. |
| Supervised projects             | Methodology that allows promoting autonomous learning under the tutelage of the teacher.  |
| Mixed objective/subjective test | It is a test that may contain theoretical test-type questions or questions of reduced length, specific practical questions or problems of medium length.  |

| Personalized attention         |   |
|--------------------------------|---|
| Methodologies                  | Description   |
| ICT practicals                 | For any aspect that students consider appropriate, in addition to small group tutoring, six hours per week of tutoring in the time published through the UDC website.               |
| Guest lecture / keynote speech | Students who have an academic exemption will not be required to attend class but must submit the same works and, in general, on the same dates as the other students of the course. |
| Problem solving                |   |

| Assessment                      |                                      |  |               |  |
|---------------------------------|--------------------------------------|--|---------------|--|
| Methodologies                   | Competencies                         | Description  | Qualification |  |
| Supervised projects             | A26 B1 B2 B4 B5 B7<br>B9 C1 C2 C4 C5 | Each group of two students will analyze using the Statistical Process Control a set of measurements made on different replicas of a piece chosen by them.      | 50            |  |
| Mixed objective/subjective test | A26 B1 B2 B4 B5 B7<br>B9 C1 C2 C4 C5 | The student will have to answer a set of theoretical test questions or questions of reduced length, specific practical questions or problems of medium length. | 50            |  |

#### Assessment comments

In order to carry out a continuous assessment, in the part corresponding to Metroloxia, 4 objective tests will be carried out during the course, which will weigh 10%, 20%, 30% and 40%, respectively, in the 1st opportunity qualification. At the second opportunity, there will be an objective test that will have a weight of 100% under the evaluation.

At the beginning of the course, people enrolled part-time must contact a co-teacher or a teacher who coordinates the subject to program the activities they must carry out to overcome it.

Or students with academic dispensation may request to carry out tutorials at a time different from or published on the UDC website.

#### Recommendations

Subjects that it is recommended to have taken before

Physics I /730G03003

Statistics/730G03008

Subjects that are recommended to be taken simultaneously

Manufacturing Processes/730G03022

Subjects that continue the syllabus

#### Other comments

To help achieve a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan":The delivery of the documentary works made in this subject.\* They will be requested in virtual format and / or computer support\* It will be done through Moodle, in digital format without the need to print themIf it is necessary to make them on paper.\* Plastics will not be used\* Double-sided prints will be made.\* Recycled paper will be used.\* The printing of drafts will be avoided.

(\*The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
