<b>Contingency plan</b>	<p>In case of online tuition, the methodologies used and the tests performed will be the same as in the case of in-person tuition. The only expected modification is that they will be carried out via Remote Campus and Moovi, instead of the School classrooms and laboratories.</p> <p>In case of online assessment, the weight of the different evaluation proofs would be the following:</p> <ul style="list-style-type: none"> <li>- Objective questions exam: 30 %</li> <li>- Problem and/or exercise solving: 30 %</li> <li>- Report of practices: 40 %</li> </ul> <p>COMPLEMENTARY REFERENCES</p> <ul style="list-style-type: none"> <li>- Platform Architecture - Android Developers: <a href="https://developer.android.com/guide/platform/">https://developer.android.com/guide/platform/</a> - Android Secure: <a href="https://source.android.com/security">https://source.android.com/security</a></li> <li>- Android Enterprise: <a href="https://www.android.com/enterprise/">https://www.android.com/enterprise/</a></li> <li>- Mobile Threat Catalogue - NIST: <a href="https://pages.nist.gov/mobile-threat-catalogue/">https://pages.nist.gov/mobile-threat-catalogue/</a></li> <li>- OWASP Mobile Security Project: <a href="https://www.owasp.org/index.php/OWASP_Mobile_Security_Project">https://www.owasp.org/index.php/OWASP_Mobile_Security_Project</a></li> <li>- ENISA: Smartphone Secure Development Guidelines: <a href="https://www.enisa.europa.eu/publications/smartphone-secure-development-guidelines-2016">https://www.enisa.europa.eu/publications/smartphone-secure-development-guidelines-2016</a></li> <li>- Guía de Seguridad de las TIC CCN-STIC 453E.
