Asignatura (*)	Tecnoloxías Facilitadoras da Industria 4.0	Código	730542010	
Titulación				
Descriptor				
Ciclo	Período	Curso	Tipo	Créditos
Mestrado Oficial	2º cuatrimestre	Primeiro	Obrigatoria	6
Idioma	Inglés			
Modalidade docente	Presencial			
Prerrequisitos				
Departamento	Enxeñaría de Computadores			
Coordinación	Fernández Caramés, Tiago Manuel	Correo electrónico	tiago.fernandez@udc.es	
Profesorado	Fernández Caramés, Tiago Manuel Fraga Lamas, Paula	Correo electrónico	tiago.fernandez@udc.es paula.fraga@udc.es	
Web	www.master-seas40.unina.it/programme/courses/syllabi/			
Descrición xeral	The main objective of this course is to provide the students with the essential concepts behind the latest and most popular Industry 4.0 enabling technologies, together with knowledge regarding the threats which could affect industrial connected systems.			

Plan de contingencia	<p>1. Modifications to the contents</p> <ul style="list-style-type: none"> - No changes will be performed. <p>2. Methodologies</p> <ul style="list-style-type: none"> - *Teaching methodologies that are maintained - None. - *Teaching methodologies that are modified - Guest lectures and Mixed test: due to the exceptional situation, given the impossibility of being able to teach in a completely face-to-face way, virtual tools provided by the university will be used, which can be complemented with other tools. - ICT practicals: the labs that require specific equipment will be replaced with simulated or virtualized ones. Eventually, alternative practices will be proposed that do not require such equipment. These practicals may be oriented towards autonomous work to address conciliation and/or connectivity problems. <p>3. Mechanisms for personalized attention to students</p> <ul style="list-style-type: none"> - Tutoring sessions (student attention) will be conducted electronically (e.g., through email, Teams, Moodle), which can be complemented with each other tools. In some of such tools, prior appointments will be agreed. <p>4. Modifications in the evaluation</p> <ul style="list-style-type: none"> - There will be no modifications. <p>5. Modifications to the bibliography or webgraphy</p> <ul style="list-style-type: none"> - There will be no modifications.

Resultados da aprendizaxe			
Resultados de aprendizaxe		Competencias / Resultados do título	
To acquire, understand and put in practice knowledge regarding the most important Industry 4.0 enabling technologies. To be able to understand the key concepts related to the most popular Industry 4.0 information management systems. To be able to understand the implications at a security level of the diverse Industry 4.0 technologies and the basics of potential cyberthreats and the essential protection techniques.	AM3	BM1	CM2

Contidos	
Temas	Subtemas
Introduction to Industry 4.0	<ul style="list-style-type: none">-Basics- Similar concepts- Industry 4.0 technologies-Industry 5.0 and Society 5.0- Practical cases- The Shipyard 4.0 Project
Sensing and Actuation Networks	<ul style="list-style-type: none">-Essential concepts- Common sensors and actuators- Communication networks and standards- Cybersecurity- Practical shipbuilding applications
Cloud and Edge Computing	<ul style="list-style-type: none">- Cloud Computing: essential concepts and traditional architecture- Edge Computing: definition, types and advanced architectures- Cybersecurity- Practical shipbuilding applications
Cyber-Physical Systems	<ul style="list-style-type: none">- Essential concepts- Hardware and software- Communications networks and protocols- Cybersecurity- Practical industrial cases
Augmented, Mixed and Virtual Reality	<ul style="list-style-type: none">- Basics- Hardware and Software- Cybersecurity- Practical shipbuilding applications

Blockchain	<ul style="list-style-type: none"> - Basics - Types of blockchains - Communications architecture - Cybersecurity - Practical industrial and shipbuilding applications
Unmanned Vehicles	<ul style="list-style-type: none"> - Essential concepts - Types of vehicles - Cybersecurity - Practical applications for the shipbuilding industry
Additive Manufacturing	<ul style="list-style-type: none"> - Essential concepts - Types of additive manufacturing technologies - Cybersecurity - Applications for the shipbuilding industry
Information Management Systems	<ul style="list-style-type: none"> - Basics - Architectures - Popular information management software (e.g., ERP, PLM, MES) - Cybersecurity

Planificación				
Metodoloxías / probas	Competencias / Resultados	Horas lectivas (presenciais e virtuais)	Horas traballo autónomo	Horas totais
Sesión maxistral	B2 C8	19	19	38
Prácticas a través de TIC	A3 B3 B6 C3	9	9	18
Traballos tutelados	B2 B3 B5 B7 B8 B10 B13 C4 C6 C7	9	45	54
Presentación oral	B5 C2	1	10	11
Proba mixta	B4 C2	1	25	26
Atención personalizada		3	0	3

*Os datos que aparecen na táboa de planificación son de carácter orientativo, considerando a heteroxeneidade do alumnado

Metodoloxías	
Metodoloxías	Descrición
Sesión maxistral	Lectures on the content of the subject
Prácticas a través de TIC	ICT practicals to put in practice the concepts learned on the lectures
Traballos tutelados	Project to put in practice the concepts learned in the theory lectures and the ICT practicals

Presentación oral	Oral presentation on the results of the supervised project
Proba mixta	Test to assess the learned practical and theoretical concepts

Atención personalizada

Metodoloxías	Descrición
Traballos tutelados Prácticas a través de TIC	The professors will tutor the students and will guide them during the practical lessons and the supervised project.

Avaliación

Metodoloxías	Competencias / Resultados	Descrición	Cualificación
Traballos tutelados	B2 B3 B5 B7 B8 B10 B13 C4 C6 C7	Evaluation of a deliverable whose development fuses theory and practice, and which is guided by the professors	30
Presentación oral	B5 C2	Evaluation of a oral presentation on the results of the supervised project	10
Prácticas a través de TIC	A3 B3 B6 C3	Evaluation of the results and knowledge acquired during the ICT practicals	20
Proba mixta	B4 C2	Evaluation of the competences acquired in the subject	40

Observacións avaliación

FIRST CALL

The practical part of the subject will consist in developing practical examples about the content of the theory lessons. Its evaluation will be performed progressively, with clear deadlines. Such a practical part could be replaced with the development of a mobile application or a individual assignment. The objective test will be divided into two parts: one oriented towards evaluating the practical developments and a second one about the theoretical content.

SECOND CALL

The students will have the opportunity to maintain the marks obtained during the ICT practicals and the supervised project. Such students will carry out a mixed test, establishing the final mark according to the same percentages applied for the first call. The rest of the students will take a single mixed test (60% of the total mark) and will carry out a supervised project (40% of the total mark).

OTHER COMMENTS

In case of detecting plagiarism, the student will be evaluated as failed (0) and the situation will be communicated to the master direction and to the corresponding authorities to take the appropriate measures.

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:

- Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree.
- No part time or lecture attendance exemption are allowed in this degree.

Observacións

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmental and socially sustainable research and teaching): The assignments to be done in this course:- Will be required in digital format.- Will be delivered using Moodle, with no need to print them. In case it is necessary to print them:- Plastics won't be used.- Two side printing will be used.- Recycled paper will be used.- Printing drafts will be avoided. A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment.
