

Teaching Guide

Identifying Data				2022/23	
Subject (*)	Differential Equations	Code	610G04016		
Study programme	Grao en Nanociencia e Nanotecnoloxía				
Descriptors					
Cycle	Period	Year	Type	Credits	
Graduate	2nd four-month period	Second	Obligatory	6	
Language	Spanish				
Teaching method	Face-to-face				
Prerequisites					
Department	Matemáticas				
Coordinador	Ferreiro Ferreiro, Ana María	E-mail	ana.ferreiro@udc.es		
Lecturers	Ferreiro Ferreiro, Ana María	E-mail	ana.ferreiro@udc.es		
Web	https://campusvirtual.udc.gal/login/index.php				
General description	This course aims to develop skills that allow students to develop knowledge of ordinary differential equations and partial differential equations				

Study programme competences / results

Code	Study programme competences / results
A3	CE3 - Reconocer y analizar problemas físicos, químicos, matemáticos, biológicos en el ámbito de la Nanociencia y Nanotecnología, así como plantear respuestas o trabajos adecuados para su resolución, incluyendo el uso de fuentes bibliográficas.
A7	CE7 - Interpretar los datos obtenidos mediante medidas experimentales y simulaciones, incluyendo el uso de herramientas informáticas, identificar su significado y relacionarlos con las teorías químicas, físicas o biológicas apropiadas.
B2	CB2 - Que los estudiantes sepan aplicar sus conocimientos a su trabajo o vocación de una forma profesional y posean las competencias que suelen demostrarse por medio de la elaboración y defensa de argumentos y la resolución de problemas dentro de su área de estudio
B4	CB4 - Que los estudiantes puedan transmitir información, ideas, problemas y soluciones a un público tanto especializado como no especializado
B5	CB5 - Que los estudiantes hayan desarrollado aquellas habilidades de aprendizaje necesarias para emprender estudios posteriores con un alto grado de autonomía
B6	CG1 - Aprender a aprender
B7	CG2 - Resolver problemas de forma efectiva.
B8	CG3 - Aplicar un pensamiento crítico, lógico y creativo.
B9	CG4 - Trabajar de forma autónoma con iniciativa.
B10	CG5 - Trabajar de forma colaborativa.
B11	CG6 - Comportarse con ética y responsabilidad social como ciudadano/a y como profesional.
B12	CG7 - Comunicarse de manera efectiva en un entorno de trabajo.
C3	CT3 - Utilizar las herramientas básicas de las tecnologías de la información y las comunicaciones (TIC) necesarias para el ejercicio de su profesión y para el aprendizaje a lo largo de su vida
C7	CT7 - Desarrollar la capacidad de trabajar en equipos interdisciplinarios o transdisciplinarios, para ofrecer propuestas que contribuyan a un desarrollo sostenible ambiental, económico, político y social.
C8	CT8 - Valorar la importancia que tiene la investigación, la innovación y el desarrollo tecnológico en el avance socioeconómico y cultural de la sociedad
C9	CT9 - Tener la capacidad de gestionar tiempos y recursos: desarrollar planes, priorizar actividades, identificar las críticas, establecer plazos y cumplirlos

Learning outcomes

Learning outcomes	Study programme competences / results

Identify the different types of differential equations and problems associated with them. Especially those originating in nanoscience and nanotechnology	A3 A7	B2 B4 B6 B7 B8 B9	C3 C9
Know and acquire fluency in the techniques to obtain analytical and numerical solutions of models based on ordinary differential equations	A3 A7	B2 B4 B6 B7 B8 B9 B12	C7 C8 C9
Know and acquire fluency in the techniques to obtain analytical and numerical solutions of models based on partial differential equations	A3	B2 B5 B10 B11	C3 C7 C8 C9
Have criteria to choose the most efficient analytical and numerical techniques for models of real problems, especially those related to nanoscience and nanotechnology.	A3	B2 B4 B5 B6 B7 B8 B9 B10 B11 B12	C3 C7 C8 C9
Manage software tools that implement the methodologies studied and know how to analyze the results	A3 A7	B2 B4 B5 B6 B7 B9 B10 B12	C3 C9

Contents	
Topic	Sub-topic
Unit 1: First order ordinary differential equations	<ul style="list-style-type: none"> - Initial value problem - Analytic resolution - Mathematical models - Numerical resolution: Explicit Euler, Implicit Euler, Heun, Runge-Kutta. - Applications
Unit 2: Systems of differential equations	<ul style="list-style-type: none"> - Systems of differential equations - Analytic resolution - Estability - Mathematical models - Numerical schemes: Explicit Euler, Implicit Euler, Heun, Runge-Kutta. - Applications

Unit 3: Second order ordinary differential equations	<ul style="list-style-type: none"> - Initial value problem. - Analytic resolution. Laplace transform, Fourier transform. - Mathematical models. - Numerical resolution - Applications - Contour problems - Analytic resolution. - Numerical resolution. Finite difference method. - Sturm-Liouville problems. Numerical approximation of eigenvalues and eigenfunctions - Applications
Tema 4: Ecuacións en derivadas parciais.	<ul style="list-style-type: none"> - Ecuación de transporte. Resolución analítica mediante o método de características. Resolución numérica mediante el esquema de Godunov. - Ecuación do calor 1D. Resolución analítica mediante separación de variables. Resolución numérica por diferencias finitas. - Ecuación de ondas 1D. Resolución analítica mediante separación de variables. Resolución numérica por diferencias finitas. - Ecuación de Laplace e Poisson. Resolución analítica mediante separación de variables. Resolución numérica por diferencias finitas - Ecuación de calor 2D. Resolución analítica mediante separación de variables. Resolución numérica por diferencias finitas. - Ecuación de Schrödinger. Resolución analítica mediante separación de variables.. Resolución numérica por diferencias finitas. - Aplicacións

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Guest lecture / keynote speech	A3 B2 B4 B5 B6 B7 B11 C8	28	56	84
ICT practicals	A3 A7 B2 B4 B10 C3 C7 C9	12	25	37
Problem solving	A7 B8 B12	8	16	24
Mixed objective/subjective test	B7 B9 C9	3	0	3
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Exhibition of the contents specified in the program of the subject, for which audiovisual media (tablet) will be used.
ICT practicals	Interactive practices in which relevant problems in the field of Science and Engineering will be solved, using Python programming language.
Problem solving	Sessions where relevant problems in the field of Science and Engineering will be presented, which will be solved both analytically and numerically. The student must be able to reach the solution of any problem using pencil and paper or alternatively using computer tools (using Python), and compare the results.

Mixed objective/subjective test	Development of issues and problems of the subject.
---------------------------------	--

Personalized attention

Methodologies	Description
Problem solving ICT practicals	<p>a) The diversity of the students and their training make it advisable to have personalized guidance, which could be carried out through tutorials.</p> <p>b) Practices with ITC tools in problem solving, or teachers will help students to develop two stated problems, as well as applications to problems in the field of Science and Engineering.</p> <p>c) The specific personalized attention measures for "Students with recognition of part-time dedication and academic waiver of attendance exemption" for the study of the subject, the continuous evaluation of the practices through ITC and the resolution of problems carried out through tests online partials.</p>

Assessment

Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	B7 B9 C9	Test that includes the resolution of questions and problems of the subject (by hand and/or Python)	50
Problem solving	A7 B8 B12	Rosolution of practical problems	25
ICT practicals	A3 A7 B2 B4 B10 C3 C7 C9	Resolution of practical problems using the Python programming language	25

Assessment comments

The final qualification of the subject consists of three parts:

Qualification of internships through ICT (CP): between 0 and 2.5 points Problem Solving Qualification (CR): between 0 and 2.5 points Mixed test qualification (CE): between 0 and 5 points. The final qualification will be the sum of three parts: $Final_Note = CP + CR + CE$, if the qualification of the mixed test (CE) is greater than 1.3 (over 5 points). In other case, the final qualification will be the mark obtained on the mixed test, CE. The qualifications of practices through ICT (CR) and problem solving (CP) will be retained in the second opportunity of the evaluation.

Students who do not show up for the final mixed test will be considered as "Not presented".

Observations on o ?Students with recognition of part-time dedication and academic exemption from attendance exemption?: As specific personalized attention measures for o ?Students with recognition of part-time dedication and academic exemption from attendance exemption? for or study da matter, the continuous assessment of the practices through ICT and the resolution of problems will be carried out through online partial tests.
