General description	<p>The study of the world economy is based on the identification of the main elements that both define and identify the socioeconomic reality that we aim to analyze. The international economy is thought as an interdependent system in which the main dynamism arises from the capitalistic center although its effects are quickly spread today all over the world. Therefore, we must begin identifying the structural features of capitalism and defining their international economic relations and conceptualizing the development of these relations.</p> <p>Once this step is taken and since the economic reality under study is composed of innumerable facts, objects and relationships, some prior selection criteria is required. Hence, the analysis begins with the developed capitalist economies, then focus on the periphery of the system and subsequently extended itself to the field of international economic relations</p>				

Study programme competences / results

Code	Study programme competences / results
A1	CE1- Contribuír á boa xestión da asignación de recursos tanto no ámbito privado como no público.
A2	CE2-Identificar e anticipar problemas económicos relevantes en relación coa asignación de recursos en xeral, tanto no ámbito privado como no público.

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Introductory activities	Presentation of the course where it is explained to the students the syllabus (main content of the course), the basic tools for the measurement of the economy, the bibliography (sources that will be used during the course), and the requirements for the continuous assessment and the grading policy
Document analysis	Introduction of the main databases, national and international ones, with relevant economic information for the analysis of the world economy to study the world economy
Collaborative learning	Learning in work groups following a specific work strategy to achieve the previously established objectives
Oral presentation	Oral presentation of the tutored projects that will be orally presented and defended to the class
Mixed objective/subjective test	Written test on the acquired knowledge of the subject
Guest lecture / keynote speech	This teaching method will be used in order to provide the students with organized information on the fundamental knowledge related to the different topics
Workshop	Interpretar textos económicos e noticias de actualidade, debates dirixidos, tratamento de información socio-económica internacional, participación de conferencias, seminarios relacionados coa materia, probas de autoevaluación e outros traballos que estime o profesor.
Supervised projects	There will be tutored group projects related to a topic of the syllabus that will be selected by the teacher. The steps to follow are: topic selection, documentation, index, periodical sessions with the teacher to follow-up, search and processing data and preparation of the oral presentation

Personalized attention	
Methodologies	Description
Supervised projects Oral presentation	Intended to reinforce the personal learning process of the student through the monitoring and supervision of the different activities (search of economic data, bibliographical sources, problem solving, oral presentation). The Small Group Office hours (TGR), which can be taught in person or online, will be divided into 2 sessions of 2 hours, and it is expected that their programming period will take place around weeks 7 and 13 of the semester.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Supervised projects	A2 A3 B7	Continuous assessments: The projects will include different topics, quantitative analysis and explanation of the methodology used. The projects will be supervised by the teacher before the oral presentation	20
Mixed objective/subjective test	A9 A12 C1 C3	The mixed test corresponds to the final written exam to evaluate the level of knowledge that the student has acquired at the end of the course. This will take place on the date established in the academic calendar	40
Oral presentation	A12 C1	Continuous assessment: part of the course work related to oral presentations.	20
Workshop	A3 A9 A12 B6 B8 C3 C4 C6 C7	Continuous assessment: Includes readings, problem solving and class participation	20

Assessment comments

This course is organized to help the student to be up to date with the work. The final exam represents 40% of the final grade, the course projects 40%, and the workshop 20 %.

A) ASSESSMENT RULES

1. Conditions during the exams: It is forbidden to access the classroom with any device which allows communication with external and/or storage of information. It could be denied to enter to the exam room with these types of devices. Unless, prior notice, the use of calculators in the exam room is also not allowed.

2. Student identification: the student have to accredit their identity in accordance with current regulations.

3. Fraudulent performance of the tests or assessment activities will directly imply a failing grade of '0' in the subject in the corresponding call, what invalidating any qualification obtained.

B) TYPES OF QUALIFICATION

Qualification of "No presentado" . For students whose participation in the assessment activities is less than 20 % of the total assessment, regardless of the qualification achieved.

Students with recognition of part-time dedication or academic exemption of attendance exemption: they will be evaluated by the same activities as the full-part students. They might be allowed to substitute the group project for an individual project. Personalized tutoring will be mutually agreed between teacher and the student.

C) ASSESSMENT OPPORTUNITIES First opportunity: at the first opportunity it will be essential to obtain a minimum grade of 4/10 in the mixed test/exam to add to the continuous evaluation grade.

Second opportunity: the students will retake the final exam (40 per cent of the final grade) and they will be allowed to realize exercise on the same date and exam in order to retake the course projects and the workshop (60 per cent of the final grade).

Advance opportunity: being a first semester course, the conditions will be the same as for the rest of the courses (60% continuous evaluation + 40% written exam).

D) OTHER ASSESSMENT RULES

It will be used the virtual platform of the UDC, Virtual Campus (moodle) in order to obtain basic materials and in order to following the subject. Also, if teaching staff considers it, it could be used the department platform, Moebius (<http://moebius.udc.es>). For it, teachers wil give to each student a username and password, as well as precise information to access this virtual platform.
