General description	<p>The study of world economy must be based on the identification of the essential elements that both define and identify the socioeconomic reality that we aim to analyse. The international economy is conceived as an interdependent system in which the main dynamism arises from the capitalistic center although its effects are quickly spread today all over the world. Therefore, we must begin identifying the structural features of capitalism and defining their international economic relations and conceptualizing the development of these relations.</p> <p>Once this step is taken and since the economic reality under study is composed of innumerable facts, objects and relationships, some prior selection criteria is required. Hence, the analysis begins with the developed capitalist economies, then focus on the periphery of the system and subsequently extended itself to the field of international economic relations.</p>			

Study programme competences / results	
Code	Study programme competences / results
A1	Manage an enterprise or small organization, understanding their competitive and institutional position and identifying their strengths and weaknesses
A2	Integrate in any functional area of micro-firms or SMEs and perform fluently any management task commissioned
A3	Evaluate and foreseeing, from relevant data, the development of a company.
A4	Elaborate advisory reports on specific situations of companies and markets
A5	Write projects about specific functional areas (e.g. management, marketing, financial) of the company
A6	Identify the relevant sources of economic information and to interpret the content.
A7	Understand economic institutions as a result and application of theoretical or formal representations which explain the evolution of the economy.
A8	Derive, based on from basic information, relevant data unrecognizable by non-professionals.
A9	Use frequently the information and communication technology (ICT) throughout their professional activity.
A10	Read and communicate in a professional environment at a basic level in more than one language, particularly in English
A11	To analyze the problems of the firm based on management technical tools and professional criteria
A12	Communicate fluently in their environment and work by teams
B1	CB1-The students must demonstrate knowledge and understanding in a field of study that part of the basis of general secondary education, although it is supported by advanced textbooks, and also includes some aspects that imply knowledge of the forefront of their field of study
B2	CB2 - The students can apply their knowledge to their work or vocation in a professional way and have competences typically demonstrated by means of the elaboration and defense of arguments and solving problems within their area of work

B3	CB3- The students have the ability to gather and interpret relevant data (usually within their field of study) to issue evaluations that include reflection on relevant social, scientific or ethical

B5	CB5-Develop skills needed to undertake further studies learning with a high degree of autonomy
B6	CG1-Perform duties of management, advice and evaluation in business organizations
B7	CG2-Know how to use the concepts and techniques used in the various functional areas of the company and understand the relationships between them and with the overall objectives of the organization
B8	CG3- Know how to make decisions, and, in general, assume leadership roles.
B9	CG4-Learn to identify and anticipate opportunities, allocate resources, organize information, select and motivate people, make decisions under conditions of - uncertainty, achieve the proposed objectives and evaluate results
B10	CG5-Respect the fundamental and equal rights for men and women, promoting respect of human rights and the principles of equal opportunities, non-discrimination and universal accessibility for people with disabilities.
C1	Express correctly, both orally and in writing, in the official languages of the autonomous region
C4	To be trained for the exercise of citizenship open, educated, critical, committed, democratic, capable of analyzing reality and diagnose problems, formulate and implement knowledge-based solutions oriented to the common good
C5	Understand the importance of entrepreneurial culture and know the means and resources available to entrepreneurs
C6	Assess critically the knowledge, technology and information available to solve the problems and take valuable decisions
C7	Assume as professionals and citizens the importance of learning throughout life.
C8	Assess the importance of research, innovation and technological development in the economic and cultural progress of society.

Learning outcomes			
Learning outcomes	Study programme competences / results		
1. Know the basic features of the world and Spanish economies.	A1	B1	C1
2. Know the interrelationships between the flows of production, income and expenditure, familiarizing the students with the main macro magnitudes of an economy.	A2	B2	C8
	A3	B8	
	A4	B9	
	A10	B10	
3. Know the main economic models that explain the functioning of economies, at a basic level.			
4. Know and understand the importance of the long term growth rate as well as the differences in income between countries.			
5. Setting some basic knowledge of the main macromagnitudes and their systematization through quantitative analysis instruments such as National Accounts (ESA) and the Balance of Payments.			
6. Know the phenomenon of globalization as well as its potential and risks for economic development.			
7. Know and value the role of international institutions in charge of regulating international economic relations, especially trade and finances and its future challenges.			
8. Know the formulations regarding sustainable development and the strategies designed in recent years for this purpose.			

11. Identify the strengths and weaknesses of both the world and Spanish economies and express one's point of view in the main current debates about the situation and trends of world economy.	A5 A6 A7	B2 B5	
2. Understand and analyze the influence of population growth, natural resources, accumulation of physical and human capital, technology, institutions and inequalities in the economic development of countries.	A8 A9 A11		
3. Know and show some skill with the statistical sources and papers related to the world and Spanish economies.	A12		
4. Apply the tools of economic analysis to the study of the global economy.			
5. Show ability to properly interpret economic news concernign the world and Spanish economies.			
6. Use correctly the vocabulary linked to economic matters.			
1. Ethical commitment to work and society.		B3 B4 B6 B7	C4 C5 C6 C7
2. Teamwork skills.			
3. Interested in economic problems and their solution.			
4. Capacity to reflect on the most important economic problems.			
5. Ability to search, filter, process and interpret diverse information sources (books and statistics), both in Galician and Spanish or English, with different tools, including telematic means.			
6. Capacity for critical thinking.			
7. An active attitude before the current events affecting the economic environment of the Spanish economy within the process of economic globalization.			

Contents	
Topic	Sub-topic
1. Measuring the Economy	1. Structural analysis techniques
2. The world economy	2. Evolution of the world economy. Factors of economic growth 3. Growth, development and poverty. Income distribution 4. International economic relations. Globalization
3. The Spanish economy.	5. Evolution of the Spanish economy. Factors of economic growth 6. Productive and functional sectors. Income distribution in Spain 7. The international integration of the Spanish economy

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Introductory activities	Introduction to the subject where the lecturer explains to the students the development of the program, the basic tools for measuring the economic activities, statistics sources to be used during the course and recommended readings and requirements for continuous assessment.
Guest lecture / keynote speech	An expository method will be used in order to facilitate the students suitable information on the fundamental knowledge related to different topics
Mixed objective/subjective test	Written test about theoretical and practical knowledge and skills acquired on the world and Spanish economies.
Workshop	Different activities that require the active participation of students will be carried out. The students' analysis and reasoning capacity will be valued, deepening in the contents characteristic of the subject. As for the student's specific work, questions of short answer will be posed to value both the learning grade and the synthesis capacity; furthermore, there will be questions of wide answer related with aspects of the subject usually with reference to a text, a graph, a piece of news, etc. and where appropriate, there could also be multiple-choice questions.

Personalized attention	
Methodologies	Description
Workshop	Tutorials in small groups (provided if they are planned in the Center's teaching) will be used for enhancing student's self-learning. Continuous assessment activities will be supervised  Students will receive personalized attention (email, Moodle, scheduled meetings in Teams)

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	A7 A8 C6 C8	Written exam to test the knowledge and skills acquired in the course. It will be held during the exam period. In order to pass the course it is required to obtain a minimum of 4 points out of 10 in the final exam.	60
Workshop	A1 A2 A10 A11 B2 B3 B4 B5 B8 B9 B10 C1 C4 C7	Activities carried out throughout the course. Within this section, participation in classes and practical activities developed and presented by the student during the course are considered.	40

Assessment comments

Given that this course is taught in two degrees and also in different years, the teacher will adapt the following assessment criteria to their groups, always offering proper information to the students.

Qualification of "Nopresentado". For students whose participation in the assessment activities is below 20 % of the total assessment, regardless of the qualification achieved.

In order to pass the course, it is necessary to obtain a minimum of 5 points out of 10 (final grade) at any opportunity.

At first opportunity, a minimum of 4 points out of 10 in the final exam is required. For the students whose final exam grade is below 4 points, the final grade will be the continuous assessment grade.

Second opportunity: the best score of the following options will be taken: a. The exam will account for 100% of the final grade without taking into account the continuous assessment. b. The exam will account for 60% of the grade and the remaining 40% will be what has been obtained during the course in the continuous assessment. It is necessary to obtain a minimum of 4 out of 10. or the students whose final exam grade is below 4 points, the final grade will be the continuous assessment grade. In the advanced call, an exam will be held that will account for 100% of the grade.

Conditions of conducting the final written exam. It is forbidden to access the classroom with any device which allows communication with external and/or storage of information.

Part-time

students. Same grading criteria as full-time students will be applied

(including students with class attendance exemption approved)
