Assessment comments

Students?

progress will be assessed during the course, including attendance and active participation in the classroom sessions, and also individual work outside the classroom. Active participation will be assessed taking into account the carrying out of all kinds of oral and written tasks related to the course, both in the classroom and outside (e.g. exercises, problems, commentaries, written tasks, oral presentations, exams).

Given that this

degree programme is part distance learning, part actual attendance, students are required to attend the compulsory sessions, unless they have applied for exemption within the time period specified by the Academic Commission of the degree, and this exemption has been granted. This exemption will be valid provided students comply with the rules on attendance in force in the three universities participating in the programme, and provided they comply with the assessment systems which are specified in the teaching guides for each module. Students should be aware, however, that not attending certain classroom sessions may affect their final grades.

Students who

have been granted exemption, as specified in the university regulations, will be assessed according to the criteria applied to the July opportunity.

Students who do

not submit a supervised project, or who fail to submit at least 50% of the other tasks for assessment, will be graded as absent from assessment (NP: no presentado).

Students who do

not pass in the first opportunity will be able to re-sit in July, when they will be required to demonstrate that they have acquired the skills for each module via two types of assessment: a supervised project with the same percentage value and characteristics as in the first opportunity, plus the exercises agreed upon with the lecturer(s) as a substitute for the other activities of the module.

Important: Any

instance of PLAGIARISM will derive in the student failing this module. Turnitin is a tool for staff to use

in order to check sections of written work originating in other texts and locating the sources. It is a useful way of detecting plagiarism. Its use is optional, but students are to be warned in the teaching guide that it is able to detect pieces of work previously presented in this or any other university, including work by the same student (for any subjectmatter). If coincidences are found, this will be understood as academic fraud, and the regulations concerning academic assessment, grading and complaints on testing will be applied. With this warning, students are

hereby informed of the academic consequences.@font-face
