

Teaching Guide						
Identifying Data				2022/23		
Subject (*)	Information Systems Architecture		Code	614G01075		
Study programme	Grao en Enxeñaría Informática					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	1st four-month period	Fourth	Optional	6		
Language	Spanish/Galician					
Teaching method	Hybrid					
Prerequisites						
Department	Ciencias da Computación e Tecnoloxías da Información/Computación					
Coordinador	Cortiñas Álvarez, Alejandro	E-mail	alejandro.cortinas@udc.es			
Lecturers	Bernardo Roca, Guillermo de Cortiñas Álvarez, Alejandro	E-mail	guillermo.debernardo@udc.es alejandro.cortinas@udc.es			
Web						
General description	<p>The objectives of this subject are:</p> <ul style="list-style-type: none"><li>- To know the basic concepts of the architecture of information systems, the conceptual models to define these architectures, and the languages to represent them</li><li>- To know how to model the architecture of an information system using design patterns</li><li>- To know how to integrate information systems by means of different software techniques</li><li>- To know modern technological solutions to develop information systems</li></ul>					

Study programme competences	
Code	Study programme competences
A47	Capacidade para determinar os requisitos dos sistemas de información e comunicación dunha organización de acordo cos aspectos de seguridade e cumprimento da normativa e a lexislación vixente.
A48	Capacidade para participar activamente na especificación, deseño, implementación e mantemento dos sistemas de información e comunicación.
A49	Capacidade para comprender e aplicar os principios e as prácticas das organizacións, de forma que poidan exercer como enlace entre as comunidades técnica e de xestión dunha organización, e participar activamente na formación dos usuarios.
B1	Capacidade de resolución de problemas
B2	Traballo en equipo
B3	Capacidade de análise e síntese
B4	Capacidade para organizar e planificar
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.

Learning outcomes			
Learning outcomes			Study programme competences
To know the basic concepts of the architecture of information systems			A47 B1 C3 A48 B2 C6 A49 B3 B4

To know the conceptual models to define the architecture of information systems	A47 A48 A49	B1 B2 B3 B4	C3 C6
To know the languages to represent the architecture of information systems	A47 A48 A49	B1 B2 B3 B4	C3 C6
To know how to model the architecture of an information system using design patterns	A47 A48 A49	B1 B2 B3 B4	C3 C6
To know how to integrate information systems by means of different software techniques	A47 A48 A49	B1 B2 B3 B4	C3 C6
To know how to create an information system using a service-oriented architecture	A47 A48 A49	B1 B2 B3 B4	C3 C6
To know modern technological solutions to develop information systems	A47 A48 A49	B1 B2 B3 B4	C3 C6

Contents	
Topic	Sub-topic
Conceptos básicos	Definición de arquitectura de sistemas de información Modelos conceptuais para arquitecturas de sistemas de información Linguaxes para arquitecturas de sistemas de información
Modelado de arquitecturas de sistemas de información	Patróns de deseño Integración de sistemas Arquitecturas orientadas a servizos
Solucións tecnolóxicas	Xestión da infraestrutura Librerías de desenvolvemento

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A47 A48 A49 B1	8	0	8
Collaborative learning	A47 A48 A49 B1 B2 B3 B4 C3 C6	3	0	3
Case study	A47 A48 A49 B1 B2 B3 B4 C3 C6	10	20	30
Supervised projects	A47 A48 A49 B1 B2 B3 B4 C3 C6	18	72	90
Oral presentation	B2 B3 B4 C3 C6	3	6	9
Practical test:	B1 B3 B4 C3 C6	0	6	6
Personalized attention		4	0	4

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Lectures that will present theoretical contents in combination with practical exercises.
Collaborative learning	Resolution by teams of students of problems of reduced size related to the contents of the subject.
Case study	Presentation to the students of real cases that have to be resolved using the knowledge acquired in the subject.
Supervised projects	Development by each student of projects in which they put in practice what was learnt in the subject.
Oral presentation	Intervención inherente aos procesos de ensino-aprendizaxe baseada na exposición verbal a través da que o alumnado e profesorado interactúan dun modo ordenado, propoñendo cuestións, facendo aclaracións e expoñendo temas, traballos, conceptos, feitos ou principios de forma dinámica.
Practical test:	Proba na que se busca que o alumno desenvolva total ou parcialmente alguma práctica que previamente tivese feito durante as clases prácticas. A proba práctica pode incluir previamente a resolución dunha pregunta/problema que teña como resultado a aplicación práctica dunha determinada técnica ou práctica aprendida.

Personalized attention	
Methodologies	Description
Supervised projects	After proposing a problem, the professor will debate with the students the possible solutions and typical errors until a satisfactory solution is reached.
Case study	In the laboratory practices, there will be a personalized attention to each student because there will be less than 20 people working in small groups, directly on a concrete application, in each computer and the professor will be able to attend punctual doubts to each student or group.

Assessment			
Methodologies	Competencies	Description	Qualification
Supervised projects	A47 A48 A49 B1 B2 B3 B4 C3 C6	The quality of the supervised projects will be assesed	60
Case study	A47 A48 A49 B1 B2 B3 B4 C3 C6	O alumnado, por grupos, realizará unha análise detallada dun caso real. Durante as clases farase un seguimento do traballo realizado por cada grupo, podendo orientar así o seu desenvolvemento. Ao remate do traballo entregarase un informe. Avaliarase tanto a calidade da memoria como o traballo realizado nas reunións de seguimento.	40
Oral presentation	B2 B3 B4 C3 C6	Ó finalizar o estudo do caso real, cada grupo realizará unha exposición oral apoiada en transparencias. Esta presentación ponderará a cualificación do estudio de casos.	0
Practical test:	B1 B3 B4 C3 C6	Os traballos tutelados rematarán cunha defensa individual na que o alumno terá que responder preguntas sobre o mesmo, ou implementar pequenos cambios ou funcionalidades sobre o mesmo código base. As defensas individuais ponderarán a cualificación do traballo.	0

Assessment comments	
To pass you must obtain the following minimum qualifications:	
Mixed test: 3 points out of 6 Supervised projects: 2 points out of 4	
To be qualified as "did not attend" is to not submit the mixed test. The criteria for the second opportunity are the same as for the first opportunity.
