| General description | The concept of "scale" in Architecture | e refers, in the words of Ani | sh Kapoor, to a number | of abstract proportions that on t | |
| | one hand are related, at a certain level, the body, the physical, and on the other, more intense, with the imagination . | | | | |
| | Complexity does not lie exclusively in size, function or artifice, but in the multiplicity of relationships that an architectural | | | | |
| | object establishes with its physical, e | nvironmental, social, huma | n and cultural environme | ent. | |

| | Study programme competences / results |
|------|--|
| Code | Study programme competences / results |
| A17 | Ability to apply technical and construction standards and regulations |
| A30 | Knowledge of the organization of professional offices |
| A34 | Ability to design, implement and develop sketches and drafts, concept designs, developed designs and technical designs (T) |
| A35 | Ability to design, implement and develop urban projects (T) |
| A67 | Coñecemento avanzado de aspectos específicos da materia de Proxectos no contemplados expresamente na Orde EDU/2075/2010 |
| B1 | Students have demonstrated knowledge and understanding in a field of study that is based on the general secondary education, and is |
| | usually at a level which, although it is supported by advanced textbooks, includes some aspects that imply knowledge of the forefront of |
| | their field of study |
| B2 | Students can apply their knowledge to their work or vocation in a professional way and have competences that can be displayed by means |
| | of elaborating and sustaining arguments and solving problems in their field of study |
| В3 | Students have the ability to gather and interpret relevant data (usually within their field of study) to inform judgements that include |
| | reflection on relevant social, scientific or ethical issues |
| B4 | Students can communicate information, ideas, problems and solutions to both specialist and non-specialist public |
| B5 | Students have developed those learning skills necessary to undertake further studies with a high level of autonomy |
| C1 | Adequate oral and written expression in the official languages. |
| C3 | Using ICT in working contexts and lifelong learning. |
| C4 | Exercising an open, educated, critical, committed, democratic and caring citizenship, being able to analyse facts, diagnose problems, |
| | formulate and implement solutions based on knowledge and solutions for the common good |
| C5 | Understanding the importance of entrepreneurial culture and the useful means for enterprising people. |
| C6 | Critically evaluate the knowledge, technology and information available to solve the problems they must face |
| C7 | Assuming as professionals and citizens the importance of learning throughout life |
| C8 | Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society. |

Learning outcomes

Methodologies

Description

Introductory activities

Activities that are carried out before initiating any teaching-learning process in order to know the competences, interests and / or motivations that the student has for the achievement of the objectives that are to be achieved, linked to a training program. With it, it is intended to obtain relevant information that allows articulating teaching to favor effective and meaningful learning, based on previous knowledge.

Guest lecture /
keynote speech

Oral presentation, complemented by the use of audiovisual media and the introduction of some questions addressed to students, in order to transmit knowledge and facilitate learning. The magisterial session is also known as a lecture, expository method or lecture. This last modality is usually reserved to a special type of lesson given by a teacher on special occasions, with a content that supposes an original elaboration and based on the almost exclusive use of the word as a way of transmitting the information to the audience.

| Directed discussion | Group dynamics technique in which the members of a group discuss freely, informally and spontaneously on a topic, although |
|---------------------|--|
| | they can be coordinated by a moderator. |
| Field trip | The field exit, understood as a strategy that consciously brings the individual closer to reality, is a valuable teaching and |
| | learning opportunity for students, by enhancing the observation process, gathering information, interpreting, posing |
| | conjectures. , explanations and projections that allow them to interpret their social environment and cultural context. |
| Workshop | Project Workshop: Training mode oriented to the application of learning in which knowledge of various subjects is introduced, |
| | always around an architectural project, where different methodologies / tests can be combined (exhibitions, simulations, |
| | debates, problem solving, practicals guided, etc.) through which students develop practical tasks on a specific topic, with the |
| | support and supervision of the teaching staff of the subjects involved. |
| Events academic / | Preparation of synthesis material of the work carried out in the matter for a joint exhibition at the end of the course in the event |
| information | organized by the Department of Architectural Projects, Urban Planning and Composition: ?Arquitecturas en Curso. DPAUC? |
| | (panels, models, drawings, videos, texts, performances, etc.) |
| | Attendance at informative events (congresses, conferences, symposiums, conferences, etc.), organized by the ETSAC or |
| | DPAUC, etc., indicated by the teaching staff of the subject as part of the current teaching content, with the aim of providing |
| | students with knowledge and experiences current references to a given field of study. |
| Student portfolio | The final result of the work done in the subject will be reflected in the student's personal and physical digital portfolios, |
| | physically available on paper and accessible through the computer tool for teaching Moodle. |
| | The results are evaluated, but through a tutored and guided teaching process, where the personal effort and the intellectual |
| | evolution of the student should be reflected in the final documentation. |

| | Personalized attention | | |
|---------------------|---|--|--|
| Methodologies | Description | | |
| Directed discussion | The student receives personalized attention regarding the work they are developing in the subject, through the teacher or | | |
| Workshop | teachers of the group to which they have been assigned. There will be the possibility of commenting and obtaining critical | | |
| Student portfolio | reviews from the other groups (if any), in order to contrast opinions and criteria to confront them with their own. | | |
| | The student's portfolio (see step 5Final student work-) will be subject to personalized reviews, to observe its evolution and | | |
| | verify its authorship. | | |
| | Teaching to students of mobility programs will be adapted to pedagogical conditions and special supervised work, as well as | | |
| | assessment tests and exams. | | |
| | | | |
| | | | |
| | | | |

| | | Assessment | |
|---------------|----------------|-------------|---------------|
| Methodologies | Competencies / | Description | Qualification |
| | Results | | |

| Workshop | A17 A30 A34 A35 | Methodology designed to promote learning - both autonomous and collaborative - of | 50 |
|-------------------|--------------------|--|----|
| | A67 B1 B2 B3 B4 B5 | students, under the tutelage of the teacher and in varied scenarios (academic, | |
| | C1 C3 C4 C5 C6 C7 | professional and competitive). It is referred primarily to the learning of "how to do | |
| | C8 | things". It is an option based on the assumption by students of the responsibility | |
| | | of their own learning. | |
| | | The teaching of mobility program students will be adapted to the pedagogical | |
| | | conditions and special supervised work, as well as tests and evaluation exams. | |
| | | This workshop subject is intended as callaborative work, public subjections, callecting | |
| | | This workshop subject is intended as collaborative work, public exhibitions, collective learning, possibility of corrections by other teachers | |
| Student portfolio | A17 A30 A34 A35 | The final result of the work carried out in the subject will be reflected in the student's | 50 |
| • | A67 B1 B2 B3 B4 B5 | personal portfolio, available and accessible through the Moodle teaching platform. | |
| | C1 C3 C4 C5 C6 C7 | 3, 44 | |
| | C8 | The results are evaluated, but through a tutored and guided teaching process, where | |
| | | the personal effort and the intellectual evolution of the student should be reflected in | |
| | | the final documentation. | |
| | | the final documentation. | |
| | | | |

Assessment comments

To pass the subject in the June opportunity it will be necessary:

-Have a minimum attendance 80% and correction of the classes with active participation in both the joint and individual revision classes of the works. (Minimum correction will be necessary for the satisfactory development of the exercise / s.

the corrections will be those necessary for the correct performance of the proposed exercise/s, the number of them will depend on the exercise and the student)

- Deliver the work in time and form (in accordance with the subject's calendar) and obtain a minimum grade of 4 in each exercise, and an average of 5. To pass the subject in the July opportunity it will be necessary:
- Have minimum attendance / correction of the classes with active participation in both the joint and individual revision classes of the works.
- Deliver on time and form the work during the course. Proceed to the modification during the months of June-July if the rating does not exceed 4 in each exercise, and an average of 5.
- Make those partial or global corrections of the exercise / s for its satisfactory development.
- -Preparation of synthesis material

of the work carried out in the matter for a joint exhibition at the end of the course in the event organized by the Department of Architectural Projects, Urban Planning and Composition: ?Arquitecturas en Curso. DPAUC? (panels, models, drawings, videos, texts, performances, etc.)

-Attendance

at informative events (congresses, conferences, symposiums, conferences, etc.), organized by the ETSAC or DPAUC, etc., indicated by the teaching staff of the subject as part of the current teaching content, with the aim of providing students with knowledge and experiences current references to a given field of study.
