General description				

Study programme competences	
Code	Study programme competences
A14	Planificar e dirixir unha travesía, determinar a situación por calquera medio de navegación, e dirixir a navegación.
A22	Cargar, manipular e estibar do xeito axeitado as diferentes mercadorías transportables nun buque.
A31	Transporte de cargas perigosas.
A32	Controlar o asentado, a estabilidade e os esforzos.
A34	Manter a seguridade e protección do buque, da tripulación e os pasaxeiros, así como o bo estado de funcionamento dos sistemas de salvamento, de loita contra incendios e demais sistemas de seguridade.
A36	Organizar, administrar e prestar os coidados médicos a bordo.
B2	Resolver problemas de xeito efectivo.
B5	Traballar de forma autónoma con iniciativa.
B6	Traballar de forma colaboradora.
B8	Aprender en ámbitos de teleformación.
B10	Versatilidade.
B12	Uso das novas tecnoloxías TIC, e de Internet como medio de comunicación e como fonte de información.
B14	Capacidade de análise e síntese.
B15	Capacidade para adquirir e aplicar coñecementos.
B16	Organizar, planificar e resolver problemas.
B19	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
B22	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.
C13	Que os estudantes posúan as habilidades de aprendizaxe que lles permitan continuar estudando dun modo que haberá de ser en grande medida autodirixido ou autónomo.

Learning outcomes	
Learning outcomes	Study programme competences

To be able to post information on a blog		B6 B8 B12 B19	C3 C7 C8 C13
To be able to share information with colleagues using cloud storage		B6 B12 B19 B22	C3
To be able to establish a network of professional contacts		B6 B12 B19	C3
To know the utilities and advanced programming possibilities of spreadsheets		B8 B14 B22	C7 C8 C13
To be able to develop an application to calculate the load, drafts, stability and structural resistance of the ship	A22 A31 A32	B2 B5 B8 B10 B12 B15 B16 B19	C3
To be able to program maritime-related plugins for a spreadsheet	A14 A22 A31 A32 A34 A36	B2 B5 B6 B8 B10 B12 B15 B16 B19	C3
To know how to correctly design the tables of a Database	A22 A36	B6 B8 B12 B14 B19 B22	C3 C13
To be able to integrate the information from a Database into a spreadsheet	A22	B2 B5 B6 B8 B10 B12 B19	C3

Methodologies	
Methodologies	Description
Problem solving	Master classes will be combined with problem solving by the students. This will be the most potentiated methodology during the course, and it will be used during the personal work of the students. The proposed problems will be related to the previous master class.  The exercises that the students solve must be delivered to the Virtual Campus before the deadline for delivery. For those exercises of greater difficulty for the students, a much longer period can be provided, which will end near the end of the semester.
Mixed objective/subjective test	Students who do not achieve a minimum grade of 5 with the problems and assignments proposed throughout the semester will have the right to be evaluated by means of a mixed test, in which they will have to solve problems similar to those proposed throughout the course.  The test will be developed using the Virtual Campus and Teams
Supervised projects	Students will be proposed to create a loading application for a ship that they can develop throughout the semester, incorporating the knowledge acquired during the master classes.
Collaborative learning	Students will use cloud storage to share class materials, and will have to create a profile on a social network that can facilitate job search and professional contacts. They will also have to contribute to a blog with a contribution of their own
Guest lecture / keynote speech	The sessions will take place in the classroom or through Teams and will be complemented with videos on Sharepoint. The week prior to the presentation of a topic, the teacher will post the contents on the Virtual Campus, providing the students with either materials or instructions on how to consult additional sources to deepen their study of the topic. After the presentation of the topic, the basic concepts will be worked individually on the computer by the students with the assistance of the teacher, being able to make use of the VDI virtual desktops.

## Personalized attention

Methodologies	Description
Problem solving Supervised projects	<p>Personalized attention is essential to direct the students in carrying out the proposed work, trying to provide solutions to the problems and doubts that arise throughout its development, as well as to guide students in solving the problems that created the most difficulties for them.</p> <p>It will be carried out in the teachers' office during the tutoring hours established at the beginning of the course and made known to the students by the appropriate means at the center and on the university's platform.</p> <p>In addition, the teacher will also be able to resolve the doubts received by electronic means such as e-mail, forums created for this purpose in the Virtual Campus, or videoconferences through Teams</p>

## Assessment

Methodologies	Competencies	Description	Qualification
Problem solving	B2 B5 B8 B10 B12 B15 B16 B19 B22 C3	The resolution of computer problems related to the contents of the lectures will be valued up to a maximum of 30 points. Exercises delivered after the deadline will be valued at 50%	30
Supervised projects	A22 A31 A32 B2 B5 B8 B10 B12 B15 B16 B19 C3	The development of a loading application will be valued up to a maximum of 50 points.	50
Collaborative learning	B6 B8 B12 B19 B22 C3 C7 C8 C13	Active participation in a professional social network will be valued up to a maximum of 10 points. Participation in a blog on the subject will be valued up to a maximum of 10 points	20

## Assessment comments

Students have two evaluation possibilities:

1. **CONTINUOUS ASSESSMENT.** Through this route, students have the possibility of passing the course by presenting a loading application, solving problems, and participating in a social network and a blog. In the case of reaching more than 50 points, they will not have to do the final mixed test of the 1st opportunity.

2. **FINAL MIXED TEST.** This route will be applied when students do not reach a minimum of 50 points throughout the semester. In this case, the student will examine the complete syllabus, and 100% of the grade will come from this mixed test. For students with recognition of part-time dedication and academic waiver of attendance exemption, as established by the "STANDARD THAT REGULATES OR RULES OF DEDICATION TO OR STUDY OF TWO GRADE AND MASTER UNIVERSITY STUDENTS IN UDC (Arts. 2.3; 3.b; 4.3 and 7.5) (04/05/2017):- Attendance / participation in minimum class activities: it can be compensated with remote development (on board) of the load application, conducting tutories by videoconference with Teams and using the Virtual Campus and the virtual VDI desktops- For problem solving and participation in the social network and blog, the delivery periods will be extended..

- Qualification: the same criteria will be applied..

The evaluation criteria contemplated in Table A-III / 6 of the STCW Code, and included in the Quality Assurance System, will be taken into account when designing and carrying out the evaluation.

## OBSERVACIONES:

Para o alumnado con recoñecemento de dedicación a tempo parcial e dispensa académica de exención de asistencia, segundo establece a "NORMA QUE REGULA O RÉXIME DE DEDICACIÓN AO ESTUDO DOS ESTUDANTES DE GRAO E MÁSTER UNIVERSITARIO NA UDC (Arts. 2.3; 3.b; 4.3 e 7.5) (04/05/2017):

- Asistencia/participación nas actividades de clase mínima: pode ser compensada co desenvolvemento a distancia (embarcado) da aplicación de carga, realizando as titorías por videoconferencia con Teams e facendo uso do Campus Virtual e os escritorios virtuais VDI

- Para a resolución de problemas e participación na rede social e no blog se ampliarán os prazos de entrega.

- Cualificación: aplicaranse os mesmos criterios.

Os criterios de avaliación contemplados no cadro A-II/1 do Código STCW e recollido no Sistema de Garantía de Calidade teránse en conta á hora de deseñar e realizar a avaliación.
